IN BOARD OF ALDERMEN,
December 23, 1914.

ORDERED, That in conformity with the Revised Laws of Massachusetts, and under authority of Chapter 676 of the Acts of the Legislature in the year 1914, the several wards of the city be and they hereby are divided and established according to the following described lines, said division and designation to take effect as prescribed by Section 4 of said Chapter 676 of 1914:

Ward One—All that portion of the city lying north and east of a line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven, and drawn through the middle of Sawyer Street to the westerly line of the location of the Old Colony Railroad; thence northerly and westerly in that line and in the southerly line of the Watuppa Branch of the Old Colony Railroad to the line between the City of New Bedford and the Town of Dartmouth.

Ward Two—All that portion of the city lying between a line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven and drawn through the middle of the following streets, namely: Wamsutta, Purchase, Austin, County, Hazard, Summer, Roberson, and the last named line extended to the line between the City of New Bedford and the Town of Dartmouth, and the line

beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven and drawn through the middle of Sawyer Street to the westerly line of the location of the Old Colony Railroad; thence northerly and westerly in that line and in the southerly line of the Watuppa Branch of the Old Colony Railroad to the line between the City of New Bedford and the Town of Dartmouth.

Ward Three—All that portion of the city lying between a line beginning at a point in the Acushnet River at the line between the City of New Bedford and the Town of Fairhaven, and passing north of Popes and Fish Islands, and thence through the middle line of the following streets, namely: North, Newton, Mill and Kempton to the line between the City of New Bedford and the Town of Dartmouth, and the line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven and drawn through the middle of the following streets, namely Wamsutta, Purchase, Austin, County, Hazard, Summer, Robeson, and the last named line extended to the line between the City of New Bedford and the Town of Dartmouth.

Ward Four—All that portion of the city lying between a line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven, and passing south of Popes and Fish Islands, and thence through the middle of the following streets, namely: Walnut, County and Arnold, to the line between the City of New Bedford and the Town of Dartmouth, and the line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven passing north of Popes and Fish Islands, and thence through the middle line of the following streets, namely North, Newton, Mill and Kempton to the line between the City of New Bedford and the Town of Dartmouth.

Ward Five—All that portion of the city lying between a line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven and passing north of Palmers Island; thence through the middle of the following streets, namely: Potomska, Purchase, Thompson, Bonney and Rockland; thence westerly across the Rural Cemetery and through the middle of Winterville Road to the line between the City of New Bedford and the Town of Dartmouth, and the line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven, and passing south of Popes and Fish

Islands, and thence through the middle of the following streets, namely: Walnut, County and Arnold, to the line between the City of New Bedford and the Town of Dartmouth.

Ward Six—All that portion of the city lying south of a line beginning at a point in the Acushnet River in the line between the City of New Bedford and the Town of Fairhaven and passing north of Palmers Island; thence through the middle of the following streets, namely: Potomska, Purchase, Thompson, Bonney and Rockland; thence westerly across the Rural Cemetery and through the middle of Winterville Road to the line between the City of New Bedford and the Town of Dartmouth.

In Board of Aldermen, Dec. 23, 1914. Adopted and sent down for concurrence.

In Common Council, Dec. 23, 1914. Concurred.

Presented to and approved by the Mayor, Dec. 24, 1914.

A true copy, attest: W. H. B. REMINGTON, City Clerk.

EXTRACT FROM LAW.

Section 4 of Chapter 676 of the Acts of 1914, entitled "An Act relative to the re-division of cities into wards and voting precincts," is as follows:

Chapter 676, Acts 1914.

"Section 4. Said Chapter eight hundred and thirty-five is hereby further amended by striking out section two hundred and nineteen and inserting in place thereof the following new section: Section 219. For all elections held prior to the annual state primary in the second year following a re-division of a city into wards, and for the assessment of taxes prior to such time, the wards as existing prior to such re-division shall continue, and for such purposes the election officers shall be appointed and hold office, and voting lists shall be prepared, and all other things required by law shall be done as if no such re-division had been made. For all other purposes, the new division shall take effect on the thirty-first day of December of the year when it is made."

W. H. B. REMINGTON, City Clerk.

NEW PRECINCT LINES**1921.**

CITY OF NEW BEDFORD,

City Clerk's Office, Feb. 9, 1921.

The following order, making a division of the wards of the City of New Bedford, as established by the City Council, Dec. 24, 1914, into precincts is hereby published for the information of the inhabitants:—

W. H. B. REMINGTON,
City Clerk.

ORDER FOR DIVISION OF WARDS.

CITY OF NEW BEDFORD.

In Board of Aldermen, Feb. 9, 1921.

Ordered, That the wards of the City of New Bedford as established by the City Council of 1914, be and they hereby are divided into voting precincts, as follows:

WARD ONE.

Precinct 1A—All that part of ward 1 bounded by the following lines in sequence, viz.: Beginning at the Acushnet river and extending through the centre lines of Sawyer street, Purchase street, and Nye street to the Acushnet river.

Precinct 1B—All that part of ward 1 bounded by the following lines in sequence, viz.: Beginning at the Acushnet river and extending through the centre lines of Nye street, Purchase street, Deane street, Quansett street, Coffin avenue, Belleville avenue and Phillips avenue to the Acushnet river.

Precinct 1C—All that part of ward 1 bounded by the following lines in sequence, viz.: Beginning at the Acushnet river and extending through the centre lines of Phillips avenue, Belleville avenue, Coffin avenue, Quansett street, Deane street, the Old Colony Railroad location, Collette street, Acushnet avenue and Davis street to the Acushnet river.

Precinct 1D—All that part of ward 1 bounded by the following lines in sequence, viz.: Beginning at the Acushnet river and extending through the centre lines of Davis street, Acushnet avenue, Collette street, the Old Colony Railroad location, Hathaway street, Acushnet avenue and Tinkham street to the Acushnet river.

Precinct 1E—All that part of ward 1 bounded by the following lines in sequence, viz.: Beginning at the Acushnet river and extending through the centre lines of Tinkham street, Acushnet avenue, Hathaway street, the Old Colony Railroad location, Nash road, Bowditch street, Whitman street to the Acushnet river.

Precinct 1F—All that part of ward 1 bounded by the following lines in sequence, viz.: Beginning at the Acushnet river and extending through the centre lines of Whitman street, Bowditch street, Nash road, the Old Colony Railroad location, Belleville road, Acushnet avenue and Hatch street to the Acushnet river.

Precinct 1G—All that part of ward 1 bounded by the following lines in sequence, viz.: Beginning at the Acushnet river and extending through the centre lines of Hatch street, Acushnet avenue, Belleville road, the Old Colony Railroad location, the Watuppa Branch of the Old Colony Railroad to the line between the City of New Bedford and the town of Dartmouth, thence along said line to Plainville road and through the centre lines of Plainville road, Tarkiln Hill road, Old Colony Railroad location, Irvington street, and Hadley street to the Acushnet river.

Precinct 1H—All that part of ward 1 lying north of the following described lines, viz.: Beginning at the Acushnet river and extending through the centre lines of Hadley street, Irvington street, the Old Colony Railroad location, Tarkiln Hill road and Plainville road.

WARD TWO.

Precinct 2A—All that part of ward 2 bounded by the following lines in sequence, viz.: Beginning at the Acushnet river and extending through the centre lines of Wamsutta street, Front street, Cedar Grove street, Bowditch street and Sawyer street to the Acushnet river.

Precinct 2B—All that part of ward 2 bounded by the following lines in sequence, viz.: The centre lines of Sawyer street, Bowditch street, Cedar Grove street and Front street.

Precinct 2C—All that part of ward 2 bounded by the following lines in sequence, viz.: The centre lines of Austin street, County street, Linden street, County street and Purchase street.

Precinct 2D—All that part of ward 2 bounded by the following lines in sequence, viz.: The centre lines of Hazard

street, Summer street, Linden street, Reynolds street, the Old Colony Railroad location, County street, Linden street and County street.

Precinct 2E—All that part of ward 2 bounded by the following lines in sequence, viz.: The centre lines of Linden street, Summer street, Coggeshall street, Myrtle street, the Old Colony railroad location and Reynolds street.

Precinct 2F—All that part of ward 2 bounded by the following lines in sequence, viz.: The centre lines of Robeson street, Cedar street, Durfee street, Highland street, Hathaway road, the Old Colony railroad location, Myrtle street, Coggeshall street and Summer street.

Precinct 2G—All that part of ward 2 bounded by the following lines in sequence, viz.: The centre lines of Robeson street, and extension of Robeson street, to the line between the City of New Bedford and the town of Dartmouth, the said town line, the centre lines of Watuppa branch of Old Colony railroad, Hathaway road, Highland street, Durfee street and Cedar street.

WARD THREE.

Precinct 3A—All that part of ward 3 bounded by the following lines in sequence, viz.: Beginning at the Acushnet river and extending through the centre lines of North street, Pleasant street, Pearl street, Purchase street and Wamsutta street, to the Acushnet river.

Precinct 3B—All that part of ward 3 bounded by the following lines in sequence, viz.: The centre lines of North street, Hill street, Hillman street, State street, Willis street, State street, Pearl street, County street, Austin street, Purchase street, Pearl street and Pleasant street.

Precinct 3C—All that part of ward 3 bounded by the following lines in sequence, viz.: The centre lines of North street, Summer street, Parker street, County street, Pearl street, State street, Willis street, State street, Hillman street and Hill street.

Precinct 3D—All that part of ward 3 bounded by the following lines in sequence, viz.: The centre lines of Parker street, Richmond street, Robeson street, Summer street, Hazard street and County street.

Precinct 3E—All that part of ward 3 bounded by the following lines in sequence, viz.: The centre lines of North street, Ash street, Sycamore street, Cedar street, Parker street and Summer street.

Precinct 3F—All that part of ward 3 bounded by the following lines in sequence, viz.: The centre lines of North street, Park street, Parker street, the easterly line of Oak Grove cemetery, the centre lines of Robeson street, Richmond street, Parker street, Cedar street, Sycamore street and Ash street.

Precinct 3G—All that part of ward 3 bounded by the following lines in sequence, viz.: The centre lines of North street, Newton street, Mill street and Kempton street to the line between the City of New Bedford and the town of Dartmouth, the said town line to point in continuation of Robeson street, and thence in centre line of Robeson street to easterly line of Oak Grove cemetery, the centre lines of Parker street and Park street.

WARD FOUR.

Precinct 4A—All that part of ward 4 bounded by the following lines in sequence, viz.: Beginning at the Acushnet river and extending through the centre lines of Walnut street, Purchase street and North street to the Acushnet river.

Precinct 4B—All that part of ward 4 bounded by the following lines in sequence, viz.: The centre lines of Walnut street, County street, North street and Purchase street.

Precinct 4C—All that part of ward 4 bounded by the following lines in sequence, viz.: The centre lines of Arnold street, Lincoln street, Union street, Cottage street, Court street, Cedar street, North street and County street.

Precinct 4D—All that part of ward 4 bounded by the following lines in sequence, viz.: The centre lines of Arnold street, Chancery street, Kempton street, Park street, North street, Cedar street, Court street, Cottage street, Union street and Lincoln street.

Precinct 4E—All that part of ward 4 bounded by the following lines in sequence, viz.: The centre lines of Arnold street, Ocean street, Union street, Newton street, Court street, Liberty street, Mill street, Newton street, North street, Park street, Kempton street and Chancery street.

Precinct 4F—All that part of ward 4 bounded by the following lines in sequence, viz.: The centre lines of Arnold street, Brownell street, Court street, Florence street, Kempton street, Hunter street, Mill street, Liberty street, Court street, Newton street, Union street and Ocean street.

Precinct 4G—All that part of ward 4 bounded by the following lines in sequence, viz.: The centre line of Arnold street

to the line between the City of New Bedford and the town of Dartmouth, thence by said line, the centre lines of Kempton street, Mill street, Hunter street, Kempton street, Florence street, Court street and Brownell street.

WARD FIVE.

Precinct 5A—All that part of ward 5 bounded by the following lines in sequence, viz.: Beginning at the Acushnet river and extending through the centre lines of Potomska street, Purchase street, Thompson street, County street, Grinnell street, Acushnet avenue and Howland street to the Acushnet river.

Precinct 5B—All that part of ward 5 bounded by the following lines in sequence, viz.: The centre lines of Howland street, Acushnet avenue, Grinnell street, Sixth street and Walnut street to the Acushnet river.

Precinct 5C—All that part of ward 5 bounded by the following lines in sequence, viz.: The centre lines of Thompson street, Bonney street, Rockland street, Orchard street, Washington street, Crapo street, South street and County street.

Precinct 5D—All that part of ward 5 bounded by the following lines in sequence, viz.: The centre lines of South street, Crapo street, Washington street, Orchard street, Arnold street, County street, Walnut street, Sixth street and County street.

Precinct 5E—All that part of ward 5 bounded by the following lines in sequence, viz.: The centre lines of Rockland street, Rockland street continued, Lewis street, Grape street, Oak street, Clay street, Columbia street, Allen street and Orchard street.

Precinct 5F—All that part of ward 5 bounded by the following lines in sequence, viz.: The centre lines of Allen street, Columbia street, Clay street, Oak street, Grape street, Page street, Hawthorn street, Tremont street, Arnold street and Orchard street.

Precinct 5G—All that part of ward 5 bounded by the following lines in sequence, viz.: Beginning at the intersection of the centre line of Lewis street with the centre line of Winterville road, thence by centre line of Winterville road to the line between the City of New Bedford and the town of Dartmouth, thence by said town line to its intersection with the extension of the centre line of Arnold street, thence by centre lines of Arnold street, Tremont street, Hawthorn street, Page street, Grape street and Lewis street.

WARD SIX.

Precinct 6A—All that part of ward 6 bounded by the following lines in sequence, viz.: Beginning at the Acushnet river and extending through the centre lines of Gifford street, Water street, Division street, Acushnet avenue, Rivet street, Purchase street and Potomska street to the Acushnet river.

Precinct 6B—All that part of ward 6 bounded by the following lines in sequence, viz.: The centre lines of Division street, County street, Mosher street, Crapo street, Thompson street, Purchase street, Rivet street and Acushnet avenue.

Precinct 6C—All that part of ward 6 bounded by the following lines in sequence, viz.: The centre lines of Katherine street, Orchard street, Rivet street, Dartmouth street, Edward street, Field street, Babbitt street, thence by the easterly and southerly lines of Rural cemetery, the centre lines of Rockland street, Bonney street, Thompson street and Crapo street.

Precinct 6D—All that part of ward 6 bounded by the following lines in sequence, viz.: Beginning at the intersection of the line between the City of New Bedford and the town of Dartmouth with the shore at Clarks Cove, thence by said town line to the centre line of Winterville road, thence in centre lines of Winterville road, Rockdale avenue, Matthew street to the easterly line of Rural cemetery, the centre lines of Babbitt street, Field street, Edward street, Dartmouth street, Rivet street, Orchard street, Katherine street and Crapo street to Clark's Cove.

Precinct 6E—All that part of ward 6 bounded by the following lines in sequence, viz.: Beginning at Clarks Cove and extending through the centre lines of Crapo street, Mosher street, County street, Division street, Second street, Stapleton street, Brock avenue, Shore street and Grit street to Clarks Cove.

Precinct 6F—All that part of ward 6 bounded by the following lines in sequence, viz.: Beginning at a point in the Acushnet river and extending through the centre lines of Cove street, Viall street, Ruth street, Brock avenue and Warren street to Clarks Cove; beginning again at Clarks Cove and extending through the centre lines of Grit street, Shore street, Brock avenue, Stapleton street, Second street, Division street, Water street and Gifford street to the Acushnet river.

Precinct 6G—All that part of ward 6 bounded by the following lines in sequence, viz.: Beginning at the Acushnet

river and extending through the centre lines of David street, Brock avenue and George street to Clarks Cove; beginning again at Clarks Cove and extending through the centre lines of Warren street, Brock avenue, Ruth street, Viall street and Cove road to the Acushnet river.

Precinct 6H—All that part of ward 6 lying south of the line drawn from the Acushnet river and extending through the centre lines of David street, Brock avenue and George street to Clarks Cove.

TWENTY - SECOND
INAUGURAL ADDRESS
OF
Hon. CHARLES S. ASHLEY
MAYOR
CITY OF NEW BEDFORD
MASSACHUSETTS

AT THE
INAUGURATION OF THE CITY GOVERNMENT
JANUARY FIRST
NINETEEN HUNDRED AND TWENTY ONE

NEW BEDFORD
THE A. E. COFFIN PRESS — COFFIN BUILDING
1921

TWENTY-SECOND INAUGURAL ADDRESS
OF THE

Hon. CHARLES S. ASHLEY

“Many of us today take up the duty of conducting the municipal affairs as an experience with which we have grown familiar. We are quite well acquainted with our obligations and know our responsibilities.

“I do not feel called upon to address you as a body summoned from the private walks of life to enter upon the public business as a new or untried undertaking. No member of the Board of Aldermen is without previous service in the city government.

“Upon such of you as have been elected to the lower branch for the first time, I urge the propriety of your seeking early information upon the subjects which you will have to consider. I advise you to stand un-committed to any body or class of voters and un-pledged as to particular means and measures. Your best service will be rendered if you remain open-minded and ready to act solely for the whole public good.

“To those of your membership who have already represented their constituency in these halls, these words equally apply and to them they will not sound novel or unusual.

ADVISES “BE SAFE.”

“Nothing is to be gained by adhering to pre-conceived ideas or notions. You have to deal with real matters of vital public concern,—necessary, practical, easily understood and not involved or perplexing. The use of your best judgment, thoughtful consideration and earnest application will make clear to your understanding every phase of the city business. All that you

are to do is important; nothing is trivial or of no consequence, if your influence and votes are directed to the promotion of the city's interests, without fear or favor, according to your individual sound judgment, the ends achieved will be all satisfactory. Every feature of city administration is business and requires treatment accordingly. Theory, speculation or experiment should meet little favor at your hands. Be safe, broad-minded and practical.

"The many phases now commonly used as descriptive of past, present and now rapidly changing conditions will not be employed by me today in allusion to the World War, the high cost of living and the problems of readjustment. Certain oft-reiterated expressions have become trite, hackneyed and over-used. I decline to prophesy with respect to the outcome of events of national and universal concern. I cannot know what the future holds in store or how the various tides will turn.

"Certain it is that we should forward our work conscious that we are not specially endowed or possessed with unnatural gifts. We should be ready, industrious, active and diligent in the service of the city of New Bedford.

ON LABOR

"If there is to be a period when honest labor is to be without the ordinary opportunity to have necessary employment and wages, then it will be a misfortune indeed if we are unable, under authority of the nation, state and city, to utilize willing hands for necessary tasks that can properly and rightfully be taken up under governmental control.

"We should co-operate, as far as we may, with the efforts of the mercantile and manufacturing interests to avert business hardship and create improved industrial conditions.

“The annual budget which I have to prepare and submit will contain all the information usually set out in an inaugural address and subsequent communications. It will be my duty, however, apart from its presentation to acquaint you with plans and suggestions which I shall do from time to time throughout the year.”

ANNUAL REPORT

OF THE

Committee on Bath Houses

OF THE

CITY OF NEW BEDFORD
MASSACHUSETTS

For the Season Ending September 30, 1920

NEW BEDFORD, MASS.
THE A. E. COFFIN PRESS, PRINTERS
1921

December 23, 1920.

To the City Council,

GENTLEMEN :— The Joint Standing Committee on Bath Houses of 1920 hereby submits its annual report for the present year as follows:—

Greater improvements have been made at the Municipal Bath Houses this year than during any year since the building of the Public Bath Houses by the City of New Bedford.

Because of these improvements it has been possible to accomodate a much larger number of bathers this season than ever before, and for the first time in the history of the Municipal Bath Houses no prospective bather has been turned away because of the lack of facilities.

This despite the fact that during the mid-summer months of July and August in excess of 1,000 bathers were accomodated at the Municipal Bath Houses daily; 10,880 of these 60,000 bathers being cared for in one week, viz: the week beginning July 4th.

The great improvement at the Municipal Bath Houses was made at the beginning of the summer, after investigation and consideration by the members of the Committee.

Bids were obtained and the contract awarded for installing a box system at the Bath Houses by means of which each patron is given a large box in which to deposit his or her clothing. During the time the bathers are in the water these boxes are kept checked on racks provided for the purpose, and turned back to the patrons when they leave the water and desire to dress.

By means of this system, for which the Committee is indebted to Mr. A. A. Allen of Horseneck Beach for

the idea, the limited number of bathing houses are kept in constant use by a continuous line of patrons, and the former plan of permitting one patron to utilize a bath house for an entire morning or afternoon is entirely done away with.

Consequently hundreds of bathers can now be accomodated with facilities where in the past only a few score could be accomodated at a time because of the limited number of bath houses. This system, while the original cost of installing it was high, has completely done away with the chief fault which has been in past years found with the local bath houses, namely that when the greatest number of people desired to use them in the hottest spells of mid-summer hundreds had to be turned away daily because of the lack of facilities.

Nor was this the only big improvement made at the Bath Houses this year by your Committee. At a cost of \$475.00 the roof of the administration building, which has long been in poor repair and leaking badly, was replaced by a new roof making the building safe from rain and melting snow which threatened to ruin the valuable property stored in the building.

This Committee also replaced the broken and decayed rafts which were in existance since the bath houses were first built with new and modern rafts so constructed that they can be removed from the water at the end of the season at no great expense, such as was necessary to remove and store the former rafts.

In all your Committee spent during the present year approximately \$5,000.00 for installing the new box system of checking, a new roof, new rafts, cashiers' stand, turnstiles, and other innovations which have brought the Municipal Bath Houses up to a degree of efficiency and usefulness to the general public never before equalled in the history of this municipal recreation and health institution.

Of course this expenditure shows in the Committee's report, but in all fairness the \$5,000.00 spent in this manner should be credited as permanent improvements which will last for many years.

Because of the great demand for labor in the local mills during the early summer, and the high wages which were at that time being paid to all classes of workingmen and women the Committee, in order to secure efficient help at the Bath Houses granted an increase in pay to all employes. While this increase in pay resulted in a corresponding increase in the amount of the weekly pay-roll, it gave the following living wages to the following employes:— George A. Wooldridge, Superintendent and Caretaker, \$35.00 per week; Artuhr Wooley, Assistant Superintendent, \$33.25 per week; William A. Adams, Hamilton Norwood, Michael Malone, Frank Williams, Attendants, each \$4.00 per day; Rock Mathieu; Joseph Oliver, Vincent Cotnoir, Life Guards, each \$4.50 per day; Daniel O'Brien, Night Watchman, \$4.00 per day; Frank Butterworth and Mrs. Harry Seddon, Cashiers at \$4.00 and \$3.00 per day respectively; Mrs. Margaret Doyle, Mrs. Jane Chapman, Mrs. K. Taber and Mrs. M. Neal, Women Attendants at \$3.00 per day.

The Committee's pay-roll during the mid-summer months when all the employes were at work totalled \$435.75 per week. The total pay-roll for the present year aggregated \$7,081.72 which included the maintenance of a Caretaker at the Bath Houses during the time the houses were not open to the public at a salary of \$24.15 per week, which salary has recently been increased to \$27.00 per week.

The Committee was so satisfied with the services of George A. Wooldridge, who has been temporarily employed as Caretaker at the Bath Houses, that at the expiration of his temporary services as Caretaker last month he was elected permanent Caretaker and his pay advanced from \$24.15 to \$27.00 per week.

The Committee has loaned to the Park Board for the use of the patrons of the new Bowling Green at Hazelwood Park thirty steel lockers with the agreement that these lockers shall be returned to the Committee on Bath Houses upon demand should any future Committee find need for their use.

The Committee at the beginning of the bathing season increased the rental charges for the use of bath houses, suits and towels in order to meet as far as possible the increased cost of laundry wages and everything else, placing the rental of a bath house at ten cents, the rental of a bathing-suit at ten cents and the rental of a towel at five cents.

The anticipation of the members of the Committee that this proposed increase in the rental charges would not suit the patrons of the bath houses was not realized as to the best of the knowledge of the members of the Committee the public realized the necessity for this increase and paid the toll without objection.

In consequence of the increased rental prices for bath-houses, suits and towels and the facilities for accomodating a larger number of bathers than formerly the Committee has taken in during the past season the sum of \$4,140.25 in fees, which is the largest gross receipts ever taken in during any one season by a Committee on Bath Houses.

And while the total receipts do not equal the total expenditures, even after deducting the sum spent on permanent improvements, the Committee feels that it has fulfilled its mission as it has provided healthful recreation for 66,941 men, women and children who have patronized the bath-houses to say nothing of the many additional thousands of mothers and children who have spent many happy hours during the summer seated on the broad board walks around the bath-houses, the

pier or the beach, in the open air watching the bathers and enjoying the cool breeze from the cove.

The Committee herewith presents its tabulated record of the year's expenditures, receipts and statistics connected with the operation of the Municipal Bath Houses :—

Week Ending		NUMBER OF BATHERS		Receipts

Miscellaneous	60.15
Total	\$ 8,156.68
Pay-rolls for 1920	7,081.72
Total expenditures for 1920	\$ 15,238.40

The record sum of \$475.00 was obtained from lively bidding for the refreshment privilege at the Bath Houses for the season of 1920. This sum, like the \$4,140.25 received from fees from the rental of bath-houses, suits and towels, was not however credited to the Committee, but in accordance with law was turned into the account unappropriated funds.

The Committee desires to give credit to the Caretaker, Mr. Wooldridge for the very successful water carnival which closed the season at the Bath Houses Labor Day. Eight swimming events were held, the prizes being fifteen articles contributed by local merchants or interested citizens. The races were hotly contested and were watched by a crowd of approximately 6,000 spectators.

Before closing this report the Committee desires to make a few recommendations which it hopes the City Council and the Committee on Bath Houses of 1921 will carry out.

The first recommendation is that the refreshment house, which now occupies a position on the pier, and is not only an eye-sore but an inconvenience, be removed and placed elsewhere, and that the pier be partially covered with an attractive sunshelter pagola, where sheltered from the rays of the hot sun hundreds of mothers and children could spend hours watching the bathers and enjoying the breezes from the cove. Plans for such a decorative and useful structure have been drawn by direction of this Committee and are in the custody of the Superintendent of Public Buildings. It is to be hoped that the in-coming Committee on Bath Houses will be able to obtain from the City Council an appropriation sufficient to build this sun-shelter.

The expenditure of more than \$1,500.00 during the past year for laundry work again brings to mind the advisability and feasibility of installing a laundry at the Bath Houses. The Committee feels that for a comparatively small expenditure of money machinery could be purchased and a laundry placed at the Bath Houses which could do the necessary work at less than is now being spent annually for laundry work. The Committee believes that the initial cost of buying the machinery and installing the laundry would be paid

for from the saving in laundry bills within a few years. The Committee hopes that this project will be carefully studied by its successors.

Still another project which the Committee recommends to the Bath House Committee of 1921 for study and consideration is the removal of the steel lockers in the general locker rooms and the replacement of these metal lockers with wooden ones. The Caretaker reports that the dampness from the salt water, to which the steel lockers are constantly subjected, is rapidly rotting the metal and ruining the locks upon the lockers.

By replacing the metal lockers before they are ruined to too great a degree the Committee feels that they could be utilized by some other municipal department or departments where they are away from the salt dampness and where they could be useful articles for many years, while wooden lockers would be better for use at the Bath Houses and would outlast the metal ones by many years.

This project is one which deserves consideration by the new Committee.

For the Committee,

THOMAS KIRKHAM,

Chairman.

City Clerk.

REPORT OF THE Superintendent of Public Buildings

OFFICE OF SUPERINTENDENT OF PUBLIC BUILDINGS,
NEW BEDFORD, MASS., DEC. 31, 1920.

To his honor the Mayor and the City Council:

Gentlemen:—I have the honor to submit this report on the condition of public buildings under construction December 31, 1919; also the work performed under my supervision up to and including December 31, 1920.

EMERY STREET SCHOOL

This building is now plastered and inside finish being installed. It is expected that the building will be completed and ready for school purposes by March 1st.

The delay in the construction of this building was caused by the abnormal conditions existing in the building trades throughout the country for the last two years, the contractor having done very creditable work in face of these conditions. A full description of this contract was given in my report for 1919.

CONCRETE BLEACHERS

During the month of September the Park Board awarded a contract to the E. A. Abbott Co., of Boston, Mass., (lowest bidders) for the erection of concrete bleachers at Victory Park, Brock Avenue, which were completed and accepted by the Board in December.

This stand constructed entirely of reinforced concrete making it absolutely fireproof is 120 feet long and has a seating capacity for 1,000 persons. Two dressing rooms are located under the stand, one at each end, equipped with shower baths, etc. Between the dressing rooms a public comfort station has been installed containing eight plumbing fixtures.

The plumbing work was done by Wood, Brightman & Co., of this city, being selected by the Park Board as the lowest bidders.

The entire work was performed under the supervision of this department.

The total cost was..... \$32,937.00

PORTABLE SCHOOL

Another portable school building was added during the year to the list of portable schools to care for the fast increasing school population pending the erection of the new schoolhouses.

In the month of August the city property committee contracted with the E. F. Hodgson Co., of Boston, Mass., for the erection and furnishing complete of a portable school building to be located on the Thomas R. Rodman schoolhouse grounds corner Rockdale Avenue and Mill Street, the building being of a similar type of those previously furnished by this same firm.

The building was completed and accepted by the Committee on Oct. 6th.

The total cost of the building and furnishings complete was..... \$4,203.75

CONTINUATION SCHOOLS

In compliance with a Legislative Act of the year 1919, requiring each city and town in the Commonwealth to maintain continuation schools for the benefit of the boys and girls employed in the industrial plants, the Committee on City Property during the month of August awarded a contract to John B. Ricard of this city, the lowest bidder, for the erection of two one story frame buildings to be used for this purpose. One of these building is located on the south part of the John H. Clifford schoolhouse lot corner Coggeshall and Bowditch streets, the other on the south part of the Thomas Donaghy schoolhouse lot corner Acushnet Avenue and South streets. The buildings were completed and accepted by the Committee November 30th, and turned over to the school board the same date. The entire work was done under the direction of this department.

The entire cost of the two schools exclusive of furnishings, was \$19,578.00

REPAIRS TO PIER NO. 4

Early in the year the attention of the Committee on Wharves was called to the dangerous condition of Pier No. 4 of the City Wharves where the buildings of the New Bedford Fish Co., are located. Plans and specifications were ordered prepared by this department for the repairs to this pier, which comprised a new concrete retaining wall, new frame and planking which covered an area of approximately 2,547 square feet.

A contract was awarded in the month of May by the committee to John B. Ricard of this city, the lowest bidder who completed the work in the latter part of July. The total cost of this work was..... \$7,782.25

IMPROVEMENTS AT PUBLIC BATH HOUSES.

Extensive improvements were made at the public bath houses during the early summer consisting of building two new rafts, installing new turnstiles, building box racks, new counters, changing front entrance doors, and other interior improvements. This work was done by Charles O. Brightman under a contract for the sum of \$2,575.

The box system for the caring of clothing of the bathers was adopted by the Committee and a contract made with the Acushnet Saw Mills Co., to furnish 1,000 wooden boxes 2 feet 6 inches long and 6 inches deep for this purpose.

This contract was completed and accepted by the committee before the opening of the bathing season. The cost of this work was \$880. The entire work was done under the supervision of this department.

ROCHAMBEAU STREET AND MT. PLEASANT STREET SCHOOLHOUSES.

At a meeting of the Committee on City Property held November 5, it was voted to accept the specifications prepared by LaBrode & Bullard, Architects, of this city for two school buildings containing twenty class rooms and assembly hall and gynasium each (exact duplicates) to be erected on the following sites:

ROCHAMBEAU STREET SCHOOL NO. 1.

To be located on the lot bounded by Rochambeau, Carlisle, Bowditch streets and Brooklawn avenue.

MT. PLEASANT STREET SCHOOL NO. 2.

To be located on the lot bounded by Mt. Pleasant, Sawyer, Highland and Buchanan streets.

Bids were called for to be submitted in two groups—one for the sub-contracts, including heating and ventilating, plumbing and electrical work, and the other for the general contract, which price will include the sub-contracts.

Bids for the sub-contracts were received on the 19th of November, the lowest bids being as follows:

	Rochambeau Street.	Mt. Pleasant Street.
Heating and ventilating—Power Heating and Ventilating Co., Boston, Mass.	\$45,450.00	\$45,450.00
Plumbing — Jeremiah Coholan, New Bedford	25,500.00	25,500.00
Electrical work—Robbins Elec- trical Co., New Bedford, Mass.	11,312.00	11,312.00

The above firms and prices were selected by the Committee on City Property for this work and given to the various contractors figuring to be embodied in their proposal for the entire work which was submitted on November 22nd, the lowest bid being as follows:

	Rochambeau Street.	Mt. Pleasant Street.
J. W. Bishop Co. (Worcester and New Bedford)	\$668,279.00	\$658,356.00

The difference in cost being caused by the variance in the contour of the two sites.

The bid was submitted to the City Council for further action, and at a meeting held December 9th, it was voted to award both contracts to the J. W. Bishop Co.

Work of excavating both sites has already commenced.

NEW SUMMER STREET SCHOOL.

The Committee at the same time and place also accepted plans and specifications prepared by Nat C. Smith, Architect, for the erection of a two story school building to contain 18 class rooms and assembly hall, the new building to replace the present old high school building located on the lot bounded by Summer, North, Mill and Chestnut streets.

Bids for this work were also received in two groups as outlined in the above mentioned schools.

The proposals for the sub-contracts were received on the 19th of November, the lowest bidders being as follows:

Heating and ventilating—M. A. Dame & Sons	
Co., Lynn, Mass.	\$40,416.00
Plumbing—Jeremiah Coholan, New Bedford,	
Mass.	15,937.00
Electrical work—Connor Electrical Co., Boston,	
Mass.	12,392.00

Bids for the general contract which included the prices of the sub-contracts were received on the 22nd of November, the lowest bid being as follows:

J. W. Bishop Co. (Worcester and New Bedford)	\$566,331.00
--	--------------

These bids were submitted to the City Council for further action, and at a meeting held on the 9th of December the Council declined to appropriate the necessary amount to prosecute this work or award any contract.

The matter will again be taken up by the City Government of 1921.

In compliance with Section 146, of the revised ordinances, I hereby report the amount expended in alterations and repairs on public buildings during the year 1920, together with recommendations for necessary alterations and repairs to public buildings for the year 1921, as follows:

The new garage ordinance which was printed in my last year's report became effective Jan. 1st.

Under the new law the Inspector of Buildings shall furnish a plan to the Board of Aldermen, drawn to scale, showing the ground, size and shape of building, the location of the building with relation to the street, its location upon the lot on which it is now located or to be built, the structure on this and the several adjoining lots, and the names of the owners of all the several lots of land included in the plan.

A fee of Five Dollars shall be collected by the Inspector of Buildings to cover the cost of preparing said plans, said fees to be turned into the City Treasury forthwith.

During the year 274 applications were received for the location and erection of garages for which a plan was prepared for each applicant and forwarded to the Board of Aldermen for their official action.

Total amount of fees collected during the year...\$1,370.00

INSPECTION OF STREET SIGNS.

As required by Section 16, Chapter 22, of the City Ordinances, 108 applications for permission to maintain signs extending over the public highway were forwarded to this office by the City Clerk during the year for inspection as to their method of fastening to their supporting surface, height of same and distance extending over sidewalk. Many were found to be existing contrary to law, the owner being notified of the requirements necessary to comply with the law. This required in many instances several inspections of one application.

ELEVATOR INSPECTION.

In accordance with Chapter 806, Acts of 1913, it shall be the duty of the Inspector of Buildings in every city of the Commonwealth to inspect all elevators in their respective cities annually, and a practical test of the safety devices and other requirements coming under this act, the Inspector to make a detailed report thereof to the Chief of the Massachusetts District Police upon forms furnished by him, and a complete record of each inspection to be kept by such Inspector; said Inspector also to issue licenses to all passenger operators after a thorough examination as to their fitness, etc. In compliance with the above law 279 freight and 32 passenger elevators were inspected by this department during the year. A record filed of each elevator inspected and a notification sent to the owners of the changes necessary to be made to comply with the law.

CONCLUSION.

In conclusion, I wish to express my appreciation and thanks to the Mayor and the various committees of the City Council for their cordial co-operation in all matters pertaining to the work of this department.

Respectfully submitted,

JOSEPH L. GIBBS,
Supt. Public Buildings,
Inspector of Buildings,

Report of Cemetery Commissioners

The business of this department during the past year has proceeded very much as usual. The larger appropriation to this department by the City Council enabled this Board to meet the increased demand in wages, and we have been able to carry a sufficient force in the several cemeteries to conduct the work as has been generally required, such as the preparation of new land for burial purposes, seeding and grading, the perpetual and annual care of lots under the city's charge, the maintenance of the avenues, park sections, borders and greenhouses, and the general overhead expense of this department.

But little has been done as to new development in portions of the older cemeteries and particularly in Pine Grove.

A new office building has been completed at the entrance of Rural Cemetery, containing an office for the foreman in charge, a spacious waiting room, toilet conveniences for men and women. This building also provides quarters where services can be held when necessary. A special appropriation was provided for the cost of this building, and the Board did not have to take the money from the accumulation of the sales of lots account.

The house formerly occupied by the sexton at Rural Cemetery was turned over to the City Property Committee, and later sold by them, and has been removed from the grounds. The site has been filled in and will be graded and seeded in the spring, and an embellished lawn will hereafter be maintained.

The Board were able to partially lay the 18" drain pipe at the west of the main boulevard in this cemetery to the extent of about eight hundred feet. This should be completed the following year, that all the surface water in that section of the grounds can be taken care of. This drain is connected with the Mathew street sewer, the nearest and proper outlet for the great amount of surface water which accumulates here in the spring.

In December, 1919, this department lost by death, Mr. Nelson L. Pike, then sexton of Rural Cemetery. For nearly twenty-five years, he had acted in this capacity and was one of the most valuable employees of this department. He was so well known that it is unnecessary to speak of his public spirit as an officer of this department, he was most faithful and took enthusiastic interest and the greatest care in general direction of all work in connection with these grounds. His fellow associates cannot forbear to express at this time, their personal loss by his death.

Upon the death of Mr. Pike, the office of sexton has been abolished, and the grounds will now be in charge of competent foremen and the Superintendent.

It is also our sad duty to record the death of the late Superintendent, Mr. Hurlbert E. Thomas. On March 4th, while in attendance to his regular duties, he was seriously injured as he was about to leave an electric car at Rural Cemetery, which came in collision with another car at this point. From these injuries, Mr. Thomas never recovered and lingered but a few days, his death occurring March 23, 1920. When he was a boy, he entered the cemetery work under the late Charles F. Cornell, then sexton of Oak Grove Cemetery, and for thirty years diligently applied his services to the work required of him in these grounds. He succeeded Mr. Cornell as sexton in 1907. At the

death of Mr. Cornell, he became general superintendent of the city's cemeteries. His long connection with this work made him invaluable for his knowledge of the grounds and he could render ready information without reference to chart or records. Mr. Thomas has always shown untiring interest and ability in the executive work of this department and has taken prominent part in all matters relating to the improvement and embellishment of the cemeteries.

During the coming season, special development in Pine Grove Cemetery should take precedence over all other improvement. The growing demand for renewed operations in these grounds is apparent to the Board. The several avenues in that section east of Bowditch Street should be constructed; a new section is necessary for single graves and an additional lay-out should be provided and set aside for the veterans of the World War and their dependents.

Sections cannot be reached without the construction of avenues. These avenues should be permanently constructed, which would involve an expenditure of at least fifty thousand dollars (\$50,000.00), as they are the principle features to the building of a new cemetery.

In the open section of the cemetery, the Board has set aside the north portion of Section 12 for the exclusive use of the veterans of the Spanish-American War, their widows and dependents, and have annually petitioned the City Council for a special appropriation of two thousand five hundred dollars, (\$2,500.00) for the development and perpetual care of this lot, but as yet the Council has not met this appeal.

It is also essential that special provision should be made for the development of a section to be set aside for the veterans of the World War and their dependents, which will involve a much larger expenditure as the same will have to be developed from new land.

An average number of sixty-five men have been employed by this department in the several grounds. \$62,219.39 of the receipts of this department have been paid for labor in the several cemeteries this season.

Since the organization of the perpetual care system, the Board are glad to announce that this year has been the banner year for deposits to this fund, one hundred and twenty-five lots have been added to the list, and the sum of \$18,571.49 has been deposited in the banks to accrue interest to apply to their perpetual care.

The rapid growth of our city which has been so marked in the last few years has created a proportional growth and an increased interest in the city of the dead. This interest must receive its proper attention and certain demands must be met. There are also many lot owners now residing in distant cities, who still have a vital interest in our local cemeteries, and the report of this department is annually requested to be sent to them as far west as the Pacific Coast. It is also more and more evident that the cemeteries are becoming the criterion of the refinement of the city, a moral barometer by which the civilization and culture of the people can be judged.

The Board desire to express its appreciation of the valued services rendered this department by the City Engineer, Mr. George H. Nye, during the season and to the City Council for its generous consideration in providing funds for the department.

Respectfully submitted,

Cemetery Commissioners	{	JOHN G. NICHOLSON, <i>Chairman</i> .
		WILLIAM M. HIGHAM.
		CHARLES H. VINAL, <i>Secretary</i> .

SUPERINTENDENT'S REPORT.

To the Board of Cemetery Commissioners.

Gentlemen : — In assuming the office of Superintendent of Cemeteries, to which I was appointed by the Board, March 29, 1920, I realized the added responsibilities placed upon me in their broadest sense. My experience in cemetery work had been confined to Pine Grove Cemetery alone and it was my duty to report only to your late Superintendent, Mr. Thomas. Today, I realize my responsibility is not only to you as a Board, but to the City Government; and beyond the City Government, to the citizens of New Bedford, who hold a greater or less interest in the ten thousand lots, now under my supervision in the several grounds. I trust, therefore, you will receive with forbearance this, my first annual report of the cemeteries under my supervision, with such suggestions and recommendations which I believe will be for the best interest of the several lot owners, and the greater development and improvement in this department.

An average number of about sixty-five men have been employed in the several grounds since the opening of the spring work until the close of the year.

I have sought out and have endeavored to follow along the general methods required in our cemeteries, with such diversions as have seemed advisable and which your board have from time to time directed.

Eight hundred feet of the 18" drain have been completed in Rural Cemetery. About four hundred feet more is needed to finish this line and I suggest that arrangement be made for this work as soon as the ground is sufficiently settled and dry the coming season.

Since new sections have been opened up in the south part of the cemetery, it is quite exposed to trespass from Mathew street, and some material damage is

the result of this. I strongly recommend that an iron fence enclosure of standard design be constructed on the Mathew street boundary of this cemetery.

A new avenue should be constructed running parallel with Mathew street, giving access to that section to be prepared for single graves and small lots.

The growth in this cemetery has been so extensive that the water supply should be sufficiently extended to meet the request of lot owners on the newer sections. I recommend this extension.

In Oak Grove Cemetery, general repairs have been made to the greenhouses ; the bases and side walls have been re-built with brick, and the roof re-glassed. This will be a fuel saving to the department.

A drain has been constructed from the basement of the office building.

Nine hundred lineal feet of avenues have been tarvia covered this year.

In both the old and new parts of Oak Grove Cemetery, the paved slope leading to the lower levels on the west sections are badly thrown by the frost, deeply rutted and in need of repair. This pavement should be all taken up, the avenues re-bedded and block paving should be re-placed. This I am satisfied would be much safer and greatly improve the appearance of these avenues.

Six new catch basins should be constructed, the wash would then be taken care of and damage by heavy rain to the lower avenues would be averted.

This cemetery is now fully developed and the maintenance and improvement only are required in the general line to follow.

It is quite essential that the boundary wall on the north line of these grounds should be re-built of substantial construction, such as a double face wall or cement structure of field stone. This wall is about seven hundred lineal feet.

In the old part of Oak Grove Cemetery, Sections J and Q have remained much as the ground originally appeared before general improvement was taken up by this department. Many of the mounds still remain and the whole is cared for only as neglected ground. As these sections are near the Parker street entrance, I would suggest that they be filled in, and graded, seeded and properly embellished. This would not only greatly improve the appearance but would add much to first impressions on entering these grounds.

As has been decided by the Board, that should the proper funds be placed to the credit of this department by the City Council, Pine Grove Cemetery will be the centre of special development the coming season, the wisdom of this action is apparent. The increased demand for lots in these grounds must be met.

It is necessary at this time when burials are made on the public ground to carry bodies by hand to this section as no avenues are as yet constructed. A force of men should be set at work at once if possible, digging out the avenues for construction work in all that portion lying east of Bowditch street. It is my judgment that these avenues should be permanently constructed and not made merely roadways.

It is necessary that a two floor tool house be constructed in Pine Grove Cemetery. I strongly recommend that this be built as soon as possible, its location I believe should be in that part of the cemetery intersected by Marion street, off of Acushnet avenue. It should be of stone or cement construction, providing stock room, work shop, tool room and lockers for the men.

I trust also that a new receiving tomb for these grounds will have your consideration.

As soon as avenues can be constructed, a new section for small or five grave lots and for single graves

should be provided.

While the several recommendations I have herewith presented may not be fully achieved during the season of 1921, I am led to believe that they will be generally acceptable to the Board.

The following summary of work accomplished in the several cemeteries has received my supervision during the season now closed.

Respectfully submitted,

SIDNEY B. DEMORANVILLE,
Superintendent.

Summary of Work Done In 1920.

	Rural	Oak Grove	Pine Grove
Sq. ft. land dug over.....	103,000	1,900
Sq. ft. land graded.....	15,000
Sq. ft. land rough graded.....	34,000	1,600
Sq. ft. land seeded.....	44,600	10,060

 Cong. Church 20. Friends, 27. Griffin Street, 1.
 Private cemetery on Braley Rd. 1.

PERPETUAL CARE.

The feature of perpetual care is being more widely accepted than ever before. To know their lots are being cared for annually seems to be most gratifying to the people to the extent that one hundred and twenty-five lots have been added to our list and a deposit of \$18,571.49 placed this year with the City Treasurer.

The total amount now standing to the credit of the perpetual care account is \$266,515.70. The interest accruing from this sum is applied to the care of its particular lot. This, combined with the funds applied from the general appropriation, tends to make the cemeteries beautiful.

The money deposited for perpetual care is deposited in the Savings Banks of the Commonwealth and the interest only is available for the annual repair, preservation or embellishment of such lot and the erections thereon. The sum deposited should be not less than one hundred and fifty dollars, (\$150.00) to allow sufficient interest to accumulate to take general care of the lot and provide for any extraordinary expense which may at times be necessary.

	Total number of lots in Perpetual Care 1920	Amount deposited
Rural.....	1,046	\$129,490.62
Oak Grove.....	812	101,643.59
Pine Grove.....	63	6,406.49
St. Mary's.....	73	7,725.00
Peckham West.....	24	3,975.00
St. John's.....	13	1,300.00
Congregational Church...	20	2,400.00
Friends.....	27	3,275.00
Griffin street.....	1	100.00
Private cemetery on Bra- ley road.....	1	200.00
	<hr/> 2,080	<hr/> \$266,515.70

Several owners are taking advantage of the provisions made by this department whereby their lots can be re-conveyed to the city in trust, wherein the title can never be changed and the lot closed to all burials except those mentioned in writing by the original owner.

Report of Caretaker of Soldiers and Sailors Graves.

New Bedford, Mass., December 1, 1920.

To the Honorable City Council of the City of New Bedford:

Gentlemen:—

I herewith submit the following report of the work done on neglected Soldiers' and Sailors' graves in the several cemeteries of the City of New Bedford, as authorized in Chap. 122, Acts of Legislature, 1914 :

	Grass cut on	Graves fitted
Rural Cemetery.....	177 graves	15
Oak Grove Cemetery.....	162 "	1
Pine Grove Cemetery.....	25 "	..
St. Mary's Cemetery.....	69 "	..
Sacred Heart Cemetery.....	14 "	..
Peckham West Cemetery.....	24 "	3
St. John's Cemetery.....	9 "	..
Friends' Cemetery.....	2 "	..
Total.....	482 graves	19 graves

The amount appropriated for this work was \$400.00, and of this amount \$378.00 was expended for labor and \$16.00 for supplies, leaving a balance of \$6.00.

Respectfully submitted,

SIDNEY B. DEMORANVILLE,
Caretaker of Soldiers' and Sailors' Graves.

CITY OF NEW BEDFORD.

IN BOARD OF ALDERMEN,

Jan. 27. 1921.

Received, ordered printed in City Documents for concurrence.

W. H. B. REMINGTON,
City Clerk.

IN COMMON COUNCIL,

Jan. 27, 1921.

Concurred.

HAROLD WINSLOW,
Clerk.

CITY OF NEW BEDFORD,
May 14, 1921.

To the City Council Committee on Finance :

Gentlemen:—The sub-committee on the valuation of city property reports herewith a list of city property and its value. The valuation of real estate has been secured from the Board of Assessors, and the valuation of other property has been secured from the officers in charge of the several departments. The entire valuation is believed by your sub-committee to be a fair valuation of the city property.

THOS. KIRKHAM,
ROBERT A. BARTLETT,
WILLIAM E. PARKER,

Committee.

CERTIFICATES.

I certify that on April 22, 1921, I examined the securities and deposits representing the investments of the sinking funds of the City of New Bedford and the several school and library funds in the custody of the commissioners, trustees and treasurer, and found that they agreed with the statements and report of the City Treasurer to the City Council.

CHARLES J. MCGURK,
City Auditor.

We certify that we have examined the foregoing report and statements of the City Auditor and believe the same to be correct.

NAPOLEON RICARD,
SAMUEL TAYLOR,
WILLIAM E. PARKER,

Sub-committee of the joint standing committee on finance, appointed to examine the books and accounts of the City Treasurer and the City Auditor.

The foregoing report and statements of the City Auditor are approved.

THOMAS KIRKHAM,
SAMUEL TAYLOR,
ROBERT A. BARTLETT,
JAMES F. COLLINS,
Committee on Audit.

REPORT OF THE Commissioners of the Sinking Funds.

City of New Bedford,
March 23, 1921

To the City Council of the City of New Bedford, Mass.:

Gentlemen:—At a meeting of the Commissioners of the Sinking Funds of the City of New Bedford, held at this date, it was

Voted:—To adopt the foregoing statement of the Treasurer of the Sinking Funds as the report of the Commissioners of the Sinking Funds of the City of New Bedford, required by the statutes of the Commonwealth of Massachusetts to be made annually to the City Council.

BENJ. A. TRIPP,
CHAS. S. KELLEY, JR.,
HARRY C. ROBINSON,

Commissioners of the Sinking Funds.

New Bedford, Mass.,
March 23, 1921.

<i>Harry C. Robinson, Esq.</i>	}	<i>Commissioners of the New Bedford Sinking Funds.</i>
<i>Chas. S. Kelley, Jr., Esq.</i>		
<i>Benjamin A. Tripp, Esq.</i>		

Dear Sirs:—I have finished my examination of the books and accounts of the Treasurer of the Sinking Funds, for the year ending December 31, 1920, and hereby certify that they are correct. I have also examined the cash and securities representing the investments, amounting to \$2,041,748.65 and find that they agree with the Treasurer's report.

Yours very truly,

JAS. P. FRANCIS,
Certified Public Accountant.

Twenty-Eighth Annual Report

ENGINEER'S REPORT

City of New Bedford,
Engineering Department,
January 1, 1921.

To the City Council of the City of New Bedford:—

Gentlemen:—In compliance with section 56 of the city ordinances, defining the duties of the City Engineer, I respectfully submit the following report of the expenses and operations of the Engineering Department for the year ending November 30, 1920.

EXPENDITURES

Salaries and payrolls.....	\$35,316.50	
Bound stones.....	24.00	
Telephone	131.18	
Local transportation	2,170.99	
Drawing supplies.....	234.08	
Blueprint materials	285.94	
Printing, stationery, advertising, etc.....	232.53	
Sundry supplies	192.11	
Office furniture and repairs	139.27	
Platting system expenses.....	405.12	
General instruments for office and field....	295.66	
Traveling expenses, express, postage, etc...	60.77	
Printing annual report.....	140.00	
Public statutes and reference books.....	32.00	
Meteorological instruments	62.63	
Coggeshall Street Bridge	281.38	
	<hr/>	\$40,004.46

RECEIPTS

Appropriation, regular.....	\$40,000.00	
Transfer to balance.....	4.46	
	<hr/>	\$40,004.46

EXPENDITURES

Gross	\$40,004.46
-------------	-------------

RECEIPTS

Credit from sale of blueprints, material and maps	\$138.63	
Net expenditures	39,865.83	
	<hr/>	\$40,004.46

EXPENDITURES FOR ACCOUNT OF INTERCEPTING SEWER

Fiscal Year 1920.

Public Service Corporations	17.93
	<hr/>
	\$35,316.80

*Includes administration, \$3,697.00

As defined in section 50 of the city ordinances, it is the duty of the City Engineer to keep certain records and, in addition, to perform all engineering work requested by the city government or any committee thereof or by any department of the city; also, by vote of the Board of Aldermen, he shall act as executive officer having charge of the maintenance and operation of the intercepting sewer.

From this it will be seen that a large portion of the work required of this department originates from the demands of other branches of the city government. The expense of such work is, I think, very properly provided for in the appropriation made to this department for engineering, giving a clear understanding of the cost of this service as a whole to the city. The volume of this work has increased rapidly in the last few years and now requires a larger force than formerly. During this year two experienced men have been added to the department.

Without attempting to itemize the details, I submit the following summary showing the general character of work required of the Engineering Department:

Furnishing surveys, plans and titles, and attendance at hearings on all street layouts or taking of land for municipal purposes, also data, plans and attendance at hearings before the legislature or state commissions.

Investigating and reporting on all plans submitted for approval to the Board of Survey, also making surveys and plans for their action in new territory. Investigating and reporting on all plans submitted by the public service corporations, and furnishing lines, grades, etc., for tracks and conduits when laid, and making records of same.

Furnishing specifications, surveys, measurements, levels, designs, estimates and plans for street construction, including sidewalks, and certification of quantities for the payment of the same.

Furnishing designs, plans, lines, grades, and inspection for the construction of sewers, and plans for the assessment for the same.

Furnishing designs, plans, estimates and inspection for all structures, other than buildings, and for dredging.

Furnishing surveys, plans, lines, and grades for the Water Works Department.

Designing and laying out all avenues and sections in the cemeteries, also furnishing lines and grades for construction and plans of the same for record.

Making necessary surveys and plans and furnishing lines and grades for new construction in the parks.

Furnishing grading plans and giving necessary lines and grades for the erection of all municipal buildings.

Furnishing architects with plans showing lines and grades of streets where important buildings are proposed, and marking the line and grade of the adjacent streets for every building erected in the city.

Furnishing the Assessors with a daily record of every transfer of New Bedford property recorded in the Registry of Deeds and all probate records of the same. During the year there have been 4,137 such transfers reported. Keeping the assessment plans in this office and the office of the Assessors posted to date, and furnishing the office of the Assessors with detail plans of all the larger buildings used for manufacturing, stores, etc., also with all the increases of land made by filling.

Furnishing the Inspector of Wires annually with plans showing the location of all conduits, poles, trees and street lights in the city.

Furnishing the Board of Health with various maps of sewers, etc., and making investigations and plans.

Investigating all petitions for location of structures within the street and furnishing reports and plans of same for the City Clerk.

Investigating all claims for damages on account of defective streets and furnishing plans and photographs for evidence in any suit that may arise. Furnishing attendance in court cases and rendering all possible assistance to the City Solicitor. Also taking measurements and preparing plans for evidence as requested by the Police Department in the preparation of its cases.

The strictly departmental work consists of maintaining complete plans of all street layouts, public lands, sewers, drains, etc.; setting and maintaining bounds on all the streets of the city; preparing schedules for the numbering of streets, furnishing numbers to property owners and keeping a record of the same; continuing the meteorological records started in this city more than 100 years ago and furnishing the public with the record of the weather through the daily papers. The value of this work to the public may be judged from the fact that it takes nearly the entire time of one clerk to take orders for work and furnish information.

GENERAL.

We are beginning to face some new problems in street layouts due to changing conditions. The older streets of New Bedford are narrow, with buildings near the line and with short blocks and frequent crossings. The increasing use of automobiles has rendered this condition both inconvenient and dangerous. To ease the corners of these streets the standard radius of the corner curb has been increased from 8 to 10 feet; and in many cases where the streets make acute angles we have used a curbing of very much larger radius. Studies are also being made of special cases to so change the street lines as to add to the convenience and safety of their use.

During the year in our permanent street work 16,550 square yards of Hassam stone block pavement has been laid and 76,354 square yards of Warrenite bitulithic. The bitulithic pavement which has been used in this city for a long time has given such good satisfaction that this year, after careful study, we have laid it on streets in the mill districts which are subject to extremely heavy traffic. It seems to give better results than the Hassam block pavement which we had previously adopted as the standard surface for such streets. The block paving in nearly all cases has been broken or spawled off by heavy loads or steel tires, although this type of traffic does not appear to injure bituminous surface, owing to its elasticity and the elimination of impact. We have had practically no cases of base failure except such as were due to improperly filled trenches.

Work has been done on the following trunk sewers during the year :—Bolton street, Myrtle street, Harwich, Plympton, Dawson and Conduit streets, Harvard street system, and a portion of the Morris street system ordered.

The Harvard street system will provide sewerage for the district bounded by Potter street, Shawmut avenue, Hathaway road, and Highland street, comprising 106 acres, and the Morris street system is the first step in providing for that part of the city lying north of the Tarkiln Hill road where the most rapid development is now taking place. The sewerage of this district involves a new problem in this city as conditions here are more nearly comparable to those prevailing in inland cities. The natural drainage of this district is into small fresh water streams which cannot be polluted with sewage without creating a nuisance. It is proposed to care for that part of the district which will need attention within the next few years by draining into the intercepting sewer through the present sewer in Belleville avenue. The construction of a low level sewer and pumping station for the section east of Belleville avenue and Morris street sewer system will be called for, however, in the near future.

During the last three years complaints have been made of the condition of the river near Howard avenue and these complaints have been investigated by the State Board of Health and by this office. The trouble appears to be due to a gradual change in the conditions in that locality. At that point the river was always shallow with exposed mud flats at low tide which in themselves were offensive but, the district being sparsely settled, there were practically no complaints. More recently, however, houses have been erected near the river in this vicinity and the condition has been rendered more objectionable undoubtedly due to some sewage which reaches that section and to the discharge from a manufacturing plant located in Acushnet. The only complete remedy for this condition probably lies in dredging the channel and filling the adjacent banks so as to remove the exposed flats entirely. This remedy will be very expensive.

The original plans for the intercepting sewer system contemplated the drainage of the territory east of the present interceptor by low level sewers and pumping stations. This work has been carried out to only a slight degree and a

portion of it should be done each year. The most important sections of this possibly are a connection of the Howland street sewer outlet with the interceptor and the removal of all sewage from the river above the Coggeshall street bridge. At the Belleville station two 10 inch pumps were originally installed and connections made for addition of 12 inch and 14 inch pumps. The capacity of the two 10 inch pumps has now been passed and during the year we have contracted for and just installed a 14 inch pump to relieve them.

During the year we have made surveys and plans for the completion of the encircling main for the Water Works extending from the New Bedford line to the pumping station at Quittacus.

At the draw span of the New Bedford and Fairhaven bridge the top of one of the accumulators, which we used at a working pressure of 3,000 pounds per square inch to operate the hydraulic machinery used in opening the draw, blew off. A careful examination showed that a part of this top had apparently crystalized through its use for a period of more than 20 years, while the remainder still had a fibrous texture. This caused a tearing effect on part of the break which probably accounts for the fact that the top was not blown through the floor of the bridge. We operated the draw during the summer season, with great difficulty, with only one accumulator and in the fall replaced the old apparatus with an entire new equipment, furnished by the Watson-Stillman Company, having a third more capacity than the original. This apparatus is now working very satisfactorily.

At Popes Island no bulkhead was constructed during the current year but 30,740 square feet of land was filled. In order not to interrupt the work of dumping another section of the bulkhead will probably be required to be built next year.

Comparatively little work was done on new plans for the Board of Survey this year on account of the volume of construction work. There have been approved by the Board of Survey 1.46 miles of streets this year, making a total of 29.60 miles since the organization of the board.

The following is a list of the present employees of this office ;

Assistant engineers :

Leonard J. Hathaway, Jr.

William H. Chase

Ira M. Chace, Jr.

Field force :

Milton H. Dean

Elmer L. Deane

Wilfred T. Fahey

Fred H. Hewitt

James S. McQuade

Edward F. Mulally

Raymond L. Viereck

Office force :

Paul G. Covill

Benjamin F. Howe

Edward M. Slocum

Plotting system :

Norman Barstow

Percy Batchelder

Clerk :

Jessie Loughlin

Respectfully submitted,

GEORGE H. NYE,

City Engineer.

Average for year	+4.24			-3.454			3.884
Extreme for year		+2.7	-1.2		-5.50	-2.80	

All figures above refer to so called "Mean High Water" which is used at 0.85 feet below City Datum.

Observations for 24 past years indicate that:

Average high water is .8206 below City Datum.

Average low water is 4.389 below City Datum.

Average range of tide is 3.153.

ANNUAL REPORT
OF THE
CHIEF ENGINEER
OF THE
FIRE DEPARTMENT

FOR THE YEAR ENDING DEC. 31, 1920

EDWARD F. DAHILL, Chief Engineer.

**COMMITTEE OF THE CITY COUNCIL
ON
FIRE DEPARTMENT.**

ALDERMEN,
CLIFTON W. BARTLETT,
CHARLES M. CARROLL,

COUNCILMEN,
JAMES L. McCARTHY,
HARRISON T. BORDEN,
JOHN McCULLOUGH 3rd.

BOARD OF ENGINEERS.

CHIEF ENGINEER,
EDWARD F. DAHILL,
Office, Station No. 2.

FIRST ASSISTANT ENGINEER,
JAMES J. DONAGHY,
Headquarters, Station No. 2.

SECOND ASSISTANT ENGINEER,
FRANK R. PEASE,
Headquarters, Station No. 4.

THIRD ASSISTANT ENGINEER,
JOHN W. DONAGHY,
Headquarters, Station No. 10

FOURTH ASSISTANT ENGINEER,
FREDERICK E. RICKETSON,
Headquarters, Station No. 2.

CLERK,
JOSEPH P. KENNEDY,
AIDE TO CHIEF,
LIEUT. FREDERICK G. GIFFORD.

CHAUFFEUR,
FRANCIS J. KENNEDY.

CAPTAINS IN CHARGE OF STATIONS.

REPAIR SHOP, STATION NUMBER ONE,
JAMES H. DOWNEY, Master Mechanic,
Appointed December 31, 1919.

HEADQUARTERS, STATION NUMBER TWO,
ROBERT E. ALLEN, Telephone Operator,
Appointed June 9, 1918.

STATION NUMBER TWO,
JOHN J. MAHON,
Appointed September 9, 1917.

STATION NUMBER THREE,
JAMES H. MAHONEY,
Appointed December 31, 1914.

STATION NUMBER FOUR,
HARRY H. KIMBALL,
Appointed February 2, 1920.

STATION NUMBER FIVE,
THOMAS H. FORBES,
Appointed April 1, 1897.

STATION NUMBER SIX,
FRANK A. LEWIS,
Appointed January 7, 1917.

STATION NUMBER SEVEN,
EDWARD H. COGGESHALL,
Appointed April 26, 1910.

STATION NUMBER EIGHT,
GEORGE H. COOK,
Appointed April 1, 1897.

STATION NUMBER NINE,
REUBEN TABER
Appointed November 25, 1917.

STATION NUMBER TEN,
AMBROSE F. MERCHANT,
Appointed November 25, 1917.

STATION NUMBER ELEVEN,
FRANK A. C. GREENE,
Appointed December 27, 1918.

ASSISTANT SUPERINTENDENT FIRE ALARM,
CAPT. ROBERT E. ALLEN
Appointed March 26, 1913.

FIRE ALARM AND TELEPHONE OPERATORS,
LIEUT. JAMES T. WING,
Appointed December 31, 1914.

LIEUT JOHN HUBBARD
Appointed August 30, 1920.

WILLIAM D. FLAGG,
Appointed December 31, 1919.

DEPARTMENT MECHANICS,
GEORGE H. BAYLIES,
Appointed March 13, 1910.

PHILIP J. PREVOST,
Appointed December 31, 1919.

BATTERY MAN,
RAIMUND F. O'BRIEN
Appointed December 3, 1920.

DEPARTMENT LINEMAN,
Vacancy.

PENSION ROLL.

CHARLES W. ALLEN, driver of Hose No. 3, joined the department April 25, 1892, placed on pension roll August 16, 1917.

EDWARD F. A. COWEN, hoseman Engine Co. No. 1, joined the department May 17, 1893, placed on pension roll August 16, 1917.

N. HERBERT GREENE, hoseman Engine Co. No. 4, joined the department October 31, 1882, placed on pension roll October 20, 1917.

JOHN H. BACKUS, department mechanic, joined the department June 9, 1894, placed on pension roll October 19, 1919.

DAVID A. COBB, seriously injured May 27, 1915.

REPORT

Headquarters Fire Department,
Chief Engineer's Office.

December 31, 1920.

The Honorable, the City Council:

Gentlemen:—The year of 1920 established new high records for expenditures for this department and for fire losses, the first largely due to the increased force made necessary by the "Two Platoon" system, the second to a number of serious fires. Expenditures must increase but fire losses should decrease. How to bring about less fires and smaller losses is a serious problem; education does not seem to be the answer. To carelessness and indifference more than to ignorance or intent are many fires and attending losses due.

The fire records show that 685 alarms have been responded to, and that the fire losses total \$393,650.44. Higher losses are due in some measure to increased valuations and to greater repair and replacement costs, but it is felt that the valuations of some buildings and their contents underwent great expansion with the heat.

Three fires account for more than sixty per cent. of the loss:

Mayflower Baking Co., January 2,	\$19,000.00
Potomska Mills, April 23,	65,000.00
Union Street fire, October 23,	161,000.00

The conflagration of October 23 started in a restaurant at 129 Union Street, and before it was brought under control, several wooden buildings were entirely destroyed, while twenty-two buildings, some of them

many blocks distant, were involved. All of the buildings damaged on First, South Second, Spring, School and Madison streets had shingle roofs which were quickly ignited by flying embers.

The department has suffered the loss by death of three members. Several members have sustained injuries, the most serious accident having occurred to Hoseman George Gleason, who suffered a broken leg at the New Bedford Cordage Co. fire, October 11.

The position of Fourth Assistant Engineer was re-created in the early part of the year. Two hundred and four officers and members constitute the present force.

Two Ahrens-Fox motor combination pumping engines were purchased and put in service, one at station 3, displacing the White engine, the other at Station 10, displacing the Robinson engine. The White engine has been equipped with a chemical tank and a fair supply of ladders; it is now at Station 9, having displaced the Webb engine, and is particularly well equipped and adapted for the services required in the territory it covers. During the year Hose 2 has been rebuilt and the work of rebuilding Hose 5 commenced. When the contemplated ladder company is organized and quartered with its truck at Station 8, our city will be reasonably protected. In commission are:

- 8 Motor combination pumping engines.
- 3 Electric aerial trucks equipped with Dahill Quick Hoists.
- 4 Motor combination chemical and hose carriers.
- 4 Runabouts for the Chief and Assistant Engineers.
- 1 Supply car for the Repair Force.
- 1 Runabout for the Fire Alarm Branch.

In reserve are:

- 1 Electric aerial truck equipped with Dahill Quick Hoist.
- 2 Motor combination pumping engines.
- 1 Motor combination chemical and hose carrier.
- 1 Motor hose carrier.
- 5 Steam fire engines equipped with short towing poles.

The Webb engine, formerly No. 9, was purchased in 1910 and has given excellent service. It is still capable of fair service and will be held in reserve as a necessary supply pumping unit.

The fire alarm system has been greatly extended. Three private and twenty-five public boxes were installed during the year, most of the public boxes in newly developed sections. The locations of some of the older boxes have been changed to give better protection to thickly settled districts. One hundred fifty-nine public and seventy-three private boxes are now in use. The discontinuance of several of the large tower bells necessitated the purchase of a steam whistle; through the courtesy and co-operation of the Union Street Railway Co., this has been erected at the company's power station.

It is still hoped that the Massachusetts legislature will eventually awaken to a realization of the radical weaknesses of Chapter 132, Acts of 1919, and will amend it to give to the property owners due and proper consideration, to the members of the department prompt recognition of and protection in willing service, and to the department officers the control that is absolutely necessary for highest efficiency.

The calls for assistance from nearby towns increase in number. During the year, ten responses to Dartmouth, two to Acushnet, one to Freetown and one to Marion have been made. It might seem unneighborly and uncharitable to refuse assistance in time of need, but that assistance can be rendered only by subjecting local property to greater risk. While the conflagration of October 23 was raging, and the possible extent of its spread and the danger of other fires far distant caused grave concern, Fairhaven alone of all the towns which have profited much and often by the services of this department offered assistance. Assistance to cities and towns maintaining fire departments should not nor will it be refused when conflagration or serious fire threatens them. Whenever such assistance has been rendered to other cities their officials have been prompt in expressing their appreciation and in offering to reimburse this city. There is satisfaction and confidence in the knowledge that our neighboring cities and the Town of Fairhaven will respond to our calls for assistance promptly and cheerfully.

The calls from the surrounding towns seldom come from town officials but the residents appear to think it their right to summon this department. The habit should not be encouraged. While this department has often saved the home for the owner, taxable property for the town, and money for the insurance companies, very seldom has any one of these interested parties expressed appreciation or offered compensation. The subject deserves your earnest consideration.

Deaths

ARTHUR R. McDONALD, pension roll; died January 23, 1920; joined the department December 12, 1893.

FREDERICK R. SYMONS, ladderman, Ladder Co. No. 1; died June 8, 1920; joined the department May 25, 1903.

LIEUT. HORACE S. BENNETT, telephone operator; died December 7, 1920; joined the department May 5, 1901.

Fatality

ERNEST ALLERMAN, burned to death in fire which destroyed his home January 17, 1920.

Out of city: Dartmouth 10, Acushnet 2, Freetown 1, Marion 1	14

The automobiles used by the department officers and that used by the Fire Alarm Branch are no longer suitable nor safe to use. New automobiles should be provided promptly.

Two thousand feet of 2½ inch hose are needed.

The department needs, and the National Board of

Fire Underwriters requires, an additional ladder truck to be held in reserve. This need and requirement can be met by the purchase of a city service truck or the necessary parts and materials can be purchased for assembly by the Repair Force.

Two of the steam fire engines are not of value to the department. They, with the Robinson motor engine which was purchased in 1913 and which has been condemned for further use, should be sold.

My gratitude is due and is extended to His Honor, The Mayor, the City Council, the Committee on Fire Department, and to the officers and members of this and of the other municipal departments for the constant, helpful spirit of cooperation which I have received from them.

Respectfully submitted,

EDW. F. DAHILL,
Chief Engineer.

ANNUAL REPORT

Chief of the Fire Department for the year 1920.

IN BOARD OF ALDERMEN,

Feb. 18, 1921.

Received, ordered printed in City Documents and
sent down for concurrence.

W. H. B. REMINGTON,
City Clerk.

IN COMMON COUNCIL,

Feb. 24, 1921.

Concurred.

RUTH G. HILTON,
Clerk pro tem.

FORTY-SECOND ANNUAL REPORT
OF
THE BOARD OF HEALTH
OF THE
CITY OF NEW BEDFORD

To the City Council for the Year 1920

NEW BEDFORD, MASS.:
NEW BEDFORD PRINTING CO., PRINTERS

1921

REPORT

New Bedford, January 1, 1921.

To His Honor the Mayor and Gentlemen of the City Council:

The Board of Health submits herewith its report for the year 1920:

DEATH RATE.

The whole number of deaths during the year was 1749, and the general death rate, based on the population disclosed by the federal census was 14.42 per thousand. The census enumeration was made in January and is hardly an accurate estimate of the mean population for the year, but the Board has decided to use it in figuring the death rate, rather than to take the assessors' estimate, which would give us a more favorable rate of 13.9 plus.

The number of deaths of children under one year was 428; the number of births, 3656; and the infant mortality rate, 117.

WORK OF THE YEAR.

Elsewhere in this report will be found detailed accounts of the activities of the year. In the main, it has been a year of continuing policies already established and of expanding our personnel in order to render more efficient service. Perhaps the greatest effort has gone into baby welfare work, on which seven nurses are now engaged under the direction of the director of field work. The well baby clinics have had ever increasing patronage, and have been an important factor in teaching mothers the proper care of infants.

The Board has added one new activity to its preventive work by taking over the dental clinics established by the City Council several years ago and carried on since by the New Bedford Dental Society. The latter organization did valuable work in caring for the teeth of children in the schools. This the Board intends to enlarge, believing that its value and importance have been amply demonstrated. It is proposed to open additional clinics, and to employ a number of dental hygienists for the instruction of school children in the care of teeth and for cleaning.

VACCINATIONS.

During the year there were 2,531 free vaccinations performed at the office of the Board.

PLUMBING.

During the year there were issued 810 permits for plumbing work of all kinds, 538 being for old buildings and 272 for new structures. The work is classified as follows:

Water closets,	1,229
Sinks,	903
Bathtubs,	562
Washbowls,	964
Washtubs,	166
Urinals,	55
Drains,	56
Deep traps,	5
Surface traps,	10
Conductors,	11

LICENSED UNDERTAKERS

AGENT'S REPORT.

New Bedford, January 1, 1921.

To the Board of Health:

GENTLEMEN:

The statistical record of the work performed during 1920 is herewith appended, that portion in charge of the director of field work appearing elsewhere in this report:

BIRTHS, 1920.

	No. of Births reported to Board	No. reported by Midwives	Visits by Nurse	Reports of Ophth. Neon.	Reports of Supp. Conj.
January	319	80	65	2	12
February	282	60	59	3	11
March	317	66	61	2	14
April	289	62	44	0	17
May	270	33	56	2	17
June	318	77	70	1	11
July	289	86	69	2	15
August	235	87	76	2	12
September	268	75	70	4	10
October	211	105	62	0	10
November	261	70	74	3	15
December	298	89	70	0	9
Totals	3407	946	776	21	153

It will be seen by the figures in the above table that 28 per cent. of the births reported to the department by the City Clerk were by midwives, and another feature of this record is that out of 174 cases of opthalmia neonatorum and suppurative conjunctivitis treated by the oculists of the Board, 50 patients, or 28.7 per cent. were infants brought into the world by midwives. Mrs. Lyons, the opthalmia nurse, had 28 patients during the year, who were treated by her under the direction of Dr. A. Normandin and Dr. Charles M. Atchison, making in that period 776 visits. The eyes of some of these infants required very close attention, in several instances visits being made twice a day for three weeks before being discharged as cured. Not a child lost its sight.

The following table shows the milk record for the year so far as the bacterial count is concerned. Every milk peddler is now required to sterilize his utensils with live steam, and as they furnish the producer with cans for the daily supply, there is no

reason why the milk furnished this market should not be equal to any in the State, provided the producer does his part in properly handling his product. It is claimed by the licensed dealers that many consumers do not give the care to milk that they should after it reaches their homes, and there is reason to believe that this is true in a great many cases. The American Public Health Association is on record declaring pasteurized milk the only safe milk, and if cow's milk must be used as an article of food, why not make it as safe as possible by insisting on pasteurization, which process destroys the disease germs that cause the trouble:

MILK, 1920.

	No. of Samples	From Cans	From Bottles	Duplicates	BACTERIAL COUNT

Totals	579	43	536	42	344	126

TENEMENT HOUSES

There were made during the year 3,999 tenement house inspections. The city has been divided into 40 areas, each area being recorded separately, the records giving the number of persons in each area, together with the number of tenements therein. This work has been in charge of Inspector Raymond. The tenement areas with findings are as follows:

Block 1—North side of Kenyon street, west side of Belleville avenue, south side of Coggeshall street, east side of North Front street; 955 persons; 172 tenements.

Block 2—North side of Coggeshall street, east side of North Front street, south side of Beetle street, west side of Belleville avenue; 729 persons; 139 tenements.

Block 3—East side of Belleville avenue, between Coggeshall and Sawyer streets; 821 persons; 122 tenements.

Block 4—North side of Logan street, south side of Kenyon street, east from Acushnet avenue to waterfront; 2121 persons; 418 tenements.

Block 5—North side of Kenyon street, east side of Acushnet avenue, south side of Coggeshall street, west side of North Front street; 1001 persons; 179 tenements.

Block 6—East side of Acushnet avenue, north side of Coggeshall street, west side of North Front street, south side of Beetle street; 388 persons; 96 tenements.

Block 7—East of Belleville avenue to Riverside avenue, between Coggeshall and Davis streets; 986 persons; 160 tenements.

Block 8—Holy Acre, east of Acushnet avenue from Pearl to Wamsutta streets; 255 persons; 59 tenements. In this block, the Board of Health has seen fit to have two tenement houses abandoned, contending that they were "unfit for human habitation."

Block 9—North side of Beetle street, east side of North Front street, south side of Holly street, west side of Belleville avenue; 1027 persons; 138 tenements.

Block 10—North side of Holly street, east side of North Front street, south side of Nye street, west side of Belleville avenue; 896 persons; 139 tenements.

Block 11—North side of Nye street, east side of North Front street, south side of Dean street, Belleville avenue; 1017 persons; 189 tenements.

Block 12—North side of Dean street, east side of North Front street, south side of Phillips avenue, Belleville avenue; 739 persons; 144 tenements.

Block 13—North side of Phillips avenue, east side of North Front street, south side of Davis street, and Belleville avenue; 1148 persons; 207 tenements.

Block 14—North side of Davis street, east side of North Front street, south side of Hathaway avenue and Belleville avenue; 525 persons; 108 tenements.

Block 15—North side of Hathaway avenue, east side of North Front street, south side of Nash road and Belleville avenue; 734 persons; 136 tenements.

Block 16—North side of Nash road, south side of Belleville road, east side of North Front street, west side of Diman street; 911 persons; 153 tenements.

Block 17—North side of Nash road, south side of Belleville road, east side of Diman street, and Belleville avenue; 844 persons; 138 tenements.

Block 18—North side of Belleville road, both sides of Bates avenue, Acushnet avenue to Healy street; 519 persons; 98 tenements.

Block 19—South side of Cedar Grove street, north side of Weld street, east side of County street and Purchase street; 756 persons; 210 tenements.

Block 20—North side of Weld street, south side of Cedar Grove street, east side of Reynolds street, west side of County street; 633 persons; 150 tenements.

Block 21—South side of Weld street, north side of Austin street, west side of Purchase street, and east side of State street; 930 persons; 225 tenements.

Block 22—East side of Purchase street, south side of Pearl street, north side of Maxfield street, to the river front; 477 persons, 118 tenements.

Block 23—East side Purchase street, north side of North street, south side Maxfield street, to the river; 608 persons; 126 tenements.

Block 24—East side of McGurk street, west side of Salisbury street, north side of Ruth avenue, south side of Cove; 972 persons, 221 tenements.

Block 25—East side of Salisbury street, west side of Roosevelt street, south side of Cove street and north side of Ruth avenue; 914 person, 206 tenements.

Block 26—East side of Roosevelt street to waterfront, south side of Cove street to north side of Ruth avenue; 896 persons; 216 tenements.

Block 27—North side of Scott street, east side of Crapo street, south side of Jouvette street, west side of County street; 1216 persons; 259 tenements.

Block 28—North side of Jouvette street, south side of Mosher street, east side of Crapo street and west side of County street; 1133 persons; 247 tenements.

Block 29—North side of Mosher street, east side of Crapo street, south side of Katherine street, and west side of County street; 1051 persons; 238 tenements.

Block 30—North side of Katherine street, south side of Rivet street, west side of County street and east side of Crapo street; 1005 persons; 202 tenements.

Block 31—North side of Rivet street, south side of Thompson street, east side of Crapo street, and west side of County street; 579 persons; 152 tenements.

Block 32—North side of Thompson street, south side of Rockland street, west side of County street and east side of Crapo street; 606 persons; 89 tenements.

Block 33—East side of Water street, north side of Cove street, south side of Blackmer street, to the river; 1228 persons; 201 tenements.

Block 34—North side Blackmer street, south side of Grinnell street, east side of Water street, to river front; 1375 persons; 272 tenements.

Block 35—North side of Rivet street, south side of South street, east side of Purchase street, west side of Water street; 2530 persons; 508 tenements.

Block 36—East side of County street, west side of Water street, north side of Delano street and south side of Rivet street; 1819 persons; 371 tenements.

Block 37—East side of County street, west side of Water street, south side of Delano street, north side of Cove street; 1353 persons, 333 tenements.

Block 38—East side of Acushnet avenue, west side of Water street, north side of South street and south side of Howland street; 1679 persons; 359 tenements.

Block 39—From Acushnet avenue (east) to Water street (west), Howland street (north), Coffin street (south); 1000 persons; 249 tenements.

Block 40—East side of Water street to waterfront, north side of Grinnell street, south side of Coffin street; 976 persons, 232 tenements.

There are 7,979 tenements in the above described area, and at the time of inspection 39,352 persons were housed there, nearly one-third of the city's population.

TUBERCULOSIS.

It is gratifying to report that the physicians of New Bedford are taking an interest in the war against the White Plague. For several years they have conscientiously reported their cases to the Board as required by law, even sending suspicious cases to the Tuberculosis Clinic for diagnosis. As a result the record

for the year shows a marked falling off in both the number of cases reported and the number of deaths, this, too, in the face of the belief that new cases are being reported as fast as discovered. To be exact, in 1916 the number reported of all forms of the disease was 404, and 198 deaths; in 1917, 487 cases, 183 deaths; in 1918, 486 cases, 236 deaths; in 1919, 426 cases, 173 deaths; and last year, 393 cases and 161 deaths. Of the 393 cases reported 344 were of the pulmonary type, and of the 161 deaths, 130 died from pulmonary tuberculosis.

In this connection, it may be interesting to know, that with the beginning of 1921, the department had in the city 750 active cases of the pulmonary type of the disease, which are under the supervision of the Board's T. B. nurses and the T. B. Clinic, which is in charge of Dr. Sumner Remick. In addition to this number there are 315 persons arrested from the disease who make regular visits to the Clinic for observation, and 84 persons classified as improved. These are also visited by the nurses and attend the Clinic at regular intervals. Of the 750 active cases in the city, 122 are receiving treatment at different sanatoria in the State, and seven being rendered outside aid.

The following record shows the work carried on at the two institutions principally used by the department in the treatment of these cases:

New Bedford Sanatorium

Patients treated,	247
Cases discharged,	144
Arrested,	50
Improved,	26
Quiescent,	9
Apparently arrested,	3
Unclassified,	6
Unimproved,	17
Died,	33

Of the patients 112 were married and 135 single.

The nativity of the patients treated follows:

New Bedford,	103
United States (other than N. B.),	37
Azores,	28
Canada,	28
Austria Poland,	15
Russia,	5
England,	15

Ireland,	3
Cape de Verde,	5
Portugal,	4
Italy,	2
Greece,	1
Albania,	1

The occupations of these patients are classified as follows :

Mill operatives	85	Salesmen	2
Students	75	Clerks	2
Housewives	45	Motion picture operators	2
Laborers	5	Carpenters	2
Children	5	Nurses	3
Maids	2	Painters	2
Mechanics	2		

One each :

Electrician	Teamster

Housewives,	2

INFLUENZA.

Influenza broke out Jan. 6, 1920, in a family on River road, six members of the family being seriously affected. Shortly after the Isolation Hospital was opened to receive the most seriously ill in that household, and from that time until the latter part of April the department wrestled with its old enemy of 1918. Before the epidemic subsided 787 cases were reported, and of this number 70 were treated at the local institution with Miss Gertrude Irwin in charge. Of the whole number reported 55 succumbed to the disease, three of this number dying at the hospital, which as stated was kept open until the latter part of April. Every case sent to the hospital was first examined by Medical Inspector Senesac, with the result that at no time did we have in that institution cases of mixed infection as was the case during the epidemic of 1918. Patients were not rushed into that institution regardless of condition, only suitable cases for institutional treatment being received, and while Dr. Senesac and Miss Irwin had a number of the severe types of the disease under their care, but three died.

DIPHTHERIA AND SCARLET FEVER

Have had their swing with the children in the community, the record for these diseases being in excess of any years since 1906. Diphtheria proved the most fatal. Of the 208 cases reported, 34 proved fatal. January, February, March, October, November and December were the months in which this disease got in its work, and as is often the case, reports came in at the same time that word had been received of the death. The fatality of cases last year was in excess of any years since 1907, with the exception of 1913, when there were 35 deaths. This is a fact which cannot be disputed, and it seems desirable to call the attention of physicians to the circumstances, for it is the physician who is first called in on this disease. If too late, nothing can be done. If not too late, the first essential is a

prompt diagnosis, and the use at once of diphtheria antitoxine. Intensive studies have been made by several observers in Massachusetts and New York, which show that the majority of deaths occur when the administration of antitoxin has been delayed.

During the year 45 per cent. of the cases of diphtheria were children under school age, and 29.6 per cent. of the reported cases of scarlet fever were also under school age. The following is the record of reported cases under school age by months:

	Scarlet Fever.	Diphtheria.
January	14	11
February	11	7
March	5	5
April	16	2
May	21	5
June	10	1
July	4	5
August	0	5
September	1	6
October	4	16
November	5	16
December	1	15

THE ISOLATION HOSPITAL

Was opened for seven cases of scarlet fever and four cases of diphtheria. After that institution had been closed for influenza late in April it was kept open continuously until early in July, and again opened during November.

THE DEATH RATE.

The total number of deaths that occurred in New Bedford last year, exclusive of stillbirths, was 1749. Of this number, 428, or nearly one-quarter, were under one year of age, and of those dying during the first year, 136, or nearly one-third died within the first month. Placing it on a percentage basis, 24.5 per cent. of all the deaths were under one year, and 31 per cent. of the deaths under one year were under one month. The enormous sacrifice during the first month is for the most part the result of improper care of the mother during the time she is carrying the child. Whether through ignorance or indifference, does not appear, but the fact remains that the loss of life is heavy.

The mortality rate for the year just ended, based on the figures furnished by the Federal Census (121,217), is 14.42+. As the census was taken early in January, it is reasonable to assume that the mid-summer estimate of the city's population (125,295) is nearer correct. This being so, the mortality rate should be 13.9+, which is a slight falling off from the rate of 1919.

The fact that 31 per cent. of the deaths of children under one year did not reach the first month renews the argument that more attention should be given the expectant mother. It is a recognized fact that poverty and ignorance are the baby's greatest enemies, and if ignorance is the greater, it would seem that more intensive work along prenatal lines might pull down the ever increasing large number of those who die under one year of age. In an enlightened community, like this, where so many are willing to lend a helping hand towards the uplift of mankind, the record is not very flattering.

The leading causes of death were pulmonary tuberculosis, 130; heart disease, 155; cancer, 82; diarrhoea and enteritis (under two year), 149, and broncho pneumonia, 221. The following is the records of deaths and mortality rate since 1889:

Year	No of Deaths	Death Rate	Population
1890 . . .	775	18.9 +	41,000
1891 . . .	960	21.81 +	*44,000

INFANT MORTALITY.

Again the infants of Portuguese parents outnumber all others in the yearly death column. The whole number of infant deaths in 1920 was 428, fourteen in excess of the record for 1919. Of this number over one-half were children of Portuguese parents. To be exact, these unfortunates were 50.4 per cent. of the whole number. The Board has now been engaged in this work for five years, employing trained nurses, two speaking the Portuguese language. The record for the year is shown as follows:

Portuguese	233
American	99
French	52
Polish	10
English	9
Austrian	5
Italian	4
Greek	4
Albanian	3
Unknown	3
German	2
Russian	1
Swede	1
Brazilian	1
Dutch West Indies	1

The infant death rate since 1888 is shown in the following table, the record for 1919—116.8—being the lowest in the history of the city. Evidently the work inaugurated by the Board in 1915 is bearing fruit:

The infant death rate since 1889 is shown in the following table:

Year	Births	Deaths, under 1	Rate
1889	1178	217	184.21
1890	1077	215	199.63
1891	1350	282	208.88
1892	1678	279	166.26
1893	1647	350	212.50
1894	1971	338	171.48
1895	1799	330	183.43

REPORT OF DIRECTOR OF FIELD WORK.

January 1, 1921.

To the Board of Health:

GENTLEMEN :

I herewith submit my report for the year ending December 31st, 1920. During the first three months of the year it was my privilege to speak in the mills and factories at the noon hour, giving talks on "The Nature and Control of Contagious and Infectious Diseases," and "Personal Responsibility for Health." These talks were given to groups of men and women ranging in numbers from 60 to 300, and totalling 2347. This afforded not only an opportunity to explain the causes of the contagious and infectious diseases that our public health work is seeking to control but also to advertise the clinics that are being conducted under the direction of the Board. Those who gathered together for these talks were attentive and eager listeners, grateful for the instruction given them and the interest shown in them and their families. When the mills are opened again I hope to resume this work, for there are great possibilities of good in it.

In addition to the talks given in the mills and factories, invitations were extended to me from clubs and various other organizations to deliver addresses on "Public Health Work," and an opportunity was given me of presenting our work to many whose co-operation will mean much to us in the future.

The work that is being done for the control of tuberculosis in our community is well organized and has done untold good. More must be done, however, to get hold of incipient cases, and in order to do this we must have the co-operation of all the physicians in our city. Knowing what even a few months of activity may mean to a patient if the disease be not detected, we rightly hope that speedily the time may come when every physician will be constantly on the lookout for suspicious symptoms and see that a thorough examination of the chest is made when such symptoms appear.

Already good work is being done in our schools for the preservation of the health of the children, but this work should be developed until every boy and girl in need of care in open-air schools or fresh-air rooms will be properly looked after.

The work done by our nurses who are visiting and caring for those who are suffering from tuberculosis is being well done.

Our nurses are interested in their work and are most sympathetic in their attitude towards those who are in their care. Our nurses have been most successful in their efforts to get all the members of a family in which tuberculosis has been found to go to our clinic for examination. By this means we are able to get hold of many who have an active process in the lung, but do not suspect it.

Besides being in attendance at the three weekly clinics our two nurses, who are visiting patients in their homes, made 5458 visits.

During the year 1920 our corps of nurses doing Baby Welfare work was increased from four to seven. The city is now divided into seven districts and a nurse is assigned to each of them. Since the number of nurses was increased to seven there has been a marked gain in the number of babies brought to our clinics. In May the attendance was 192 and in October 484. Unfortunately, the record of attendance from January to May has been lost, but counting 150 as a fair average for these four months, the number of babies brought to our clinics during the year was 3407. We have gained the confidence of the mothers and only those who have visited our clinics can appreciate what this work means for the coming generations. Over one thousand feeding cases have been cared for by the doctors in charge of our clinics. Before hot weather comes upon us again we should have at least five instead of three clinics weekly. Our nurses have been faithfully and efficiently looking after the babies in their respective districts. The total number of visits made by nurses doing Baby Welfare Work was 22,683. Of these 753 were visits to cases where a midwife had been employed, and 546 were visits made to pregnant women.

We are looking forward to the development of our prenatal work and hope to steadily increase the number of prenatal cases in our care, and to give them adequate supervision. During the year 1921 our nurses will be called upon to visit more frequently the pregnant mothers. During the last three months of pregnancy the blood pressure will be taken at least once in every ten days and the urine also tested for albumen. We hope in this way to reduce materially the number of cases of eclampsia that have annually occurred in our city and save many of the children who are lost through the want of adequate prenatal care.

The summer of 1920 was a very trying one, not only on account of the prolonged spell of hot, muggy weather, but also because of the unprecedented congestion due to the want of an

adequate number of houses available for the people. Yet at all times there will be a goodly number of infants who can be saved only by hospital care during a portion of the summer. Such provision might be made for the care of these children by utilizing a school building or having a floating hospital. During the year 1920 there were 3656 births reported and 425 deaths of children under one year, giving New Bedford a mortality rate for deaths under one year of 117.07.

The reports of the Parochial School nurses and the dental hygienist are also herewith submitted to the Board. Miss Ross was transferred from the Baby Welfare Work to Tuberculosis Work December 1st, so that her report covers only the month of December.

I wish to express my heartfelt gratitude to the following organizations for the prompt and effective response made to all calls upon them for help in our work: The Children's Aid Society, the Instructive Nursing Association, the Country Week Society, St. Luke's Hospital, and the Anti-Tuberculosis Association.

Respectfully yours,

W. B. GEOGHEGAN,
Director of Field Work.

REPORT OF PAROCHIAL SCHOOL NURSES

New Bedford, Mass., January 1, 1921.

To the Board of Health:

GENTLEMEN:

Following is the report of the parochial school nurse for the past year:

Number of schools under supervision,	10
Number of visits to schools,	368
Number of visits to homes,	991
Number of cases of defective vision,	119
Number of cases of enlarged tonsils and adenoids,	326
Number of cases of otitis media,	27
Number of cases of impetigo,	60
Number of cases of scabies,	34
Number of cases of eczema,	8
Number of cases of tinea,	15
Number of cases of malnutrition,	11
Number of cases of chorea,	6
Number of cases of cervicle adenitis,	7
Number of cases of conjunctivitis,	3
Number of cases of anaemia,	5
Number of cases of tuberculosis,	2
Number of cases of deficient mentality,	2
Number of cases investigated and cared for not included in the above,	147
Number of cases of defective vision where glasses were obtained,	83
Number of cases of defective teeth treated either by own dentists or clinics,	172
Number of cases of enlarged tonsils and adenoids where operations were performed,	155

I wish to thank the parents, teachers, Children's Aid Society, City Mission, Dental Clinics and all others for their kind co-operation.

Respectfully submitted,

MARY L. SHER.

52 patients instructed in home care of mouth at chair.	

KATHRYN L. RYAN, D. H.

REPORT OF INSPECTOR OF MILK AND PROVISIONS.

New Bedford, January 1, 1921.

To the Board of Health:

GENTLEMEN:

I herewith submit my report as Inspector of Milk and Provisions for the year ending December 31st, 1920. During the year there have been issued 426 store licenses, 82 team licenses for the sale of milk and 77 store licenses, and 3 team licenses for the sale of oleomargarine, making a total of 588, for which the legal fee of 50 cents was received and paid to the City Treasurer as per his receipt for same on file. All licensed dealers now have steam plants and 14 are equipped with pasteurizers. Each year some additional dealers install a pasteurizing plant, so that it will not be long before at least one-half of our milk supply will be pasteurized. It would seem as though the time was very near, in fact has already come, when all of the milk distributed in the city should be pasteurized, with the exception of the small amount which is already certified. One of the serious things that confront us regarding the milk supply is the laxity of many of the producers regarding the care of milk from the milking time until the dealer takes possession of it. On many farms the compulsory use of ice would entail a hardship, but most farms have cool well water which could be used in the cooling of the milk to a much greater extent than it now is and would wonderfully help the situation. The

dealers' plants and producers' premises have been inspected at various times throughout the year, as shown on my daily report. The sausage factories have been inspected and a report made to the Board of Aldermen prior to their granting them a license. The ice cream plants have been kept under supervision during the season and the cold storage plant has been inspected in accordance with the law.

Respectfully submitted,

H. B. HAMILTON,
Inspector of Milk and Provisions.

MEDICAL INSPECTOR'S REPORT.

January 1, 1921.

To the Board of Health:

GENTLEMEN:

I herewith submit my report as Medical Inspector and attending physician for contagious diseases:

Took 368 cultures.

Released 387 cases of Scarlet Fever.

Investigated 48 cases of Typhoid.

Examined 79 persons having or reported as having Tuberculosis.

Investigated: 111 cases of Influenza.

8 of Measles.

2 of Varicella.

3 of Encephalitis Lethargica.

1 of Anterior Poliomyelitis.

1 Cer. Spinal Meningitis.

And 72 others reported as having some contagious disease.

Vaccinated and kept under observation 6 persons exposed to Smallpox.

Made 112 calls to patients for the Board.

In addition to the above also made 70 calls on infants under one year, treating 24 babies during the month of August.

Respectfully submitted,

A. N. SENESAC, M. D.,
Medical Inspector.

REPORT OF SCHOOL EXAMINER.

To the Board of Health:

GENTLEMEN:

Enclosed is my report of the examination of children wishing to leave school for the purpose of going to work during the year 1920.

I am impressed with the general well being of the average child as to health, development and appearance. I am surprised at the small number of tuberculous conditions, considering the general state of the world. I wish to emphasize the great need of more careful consideration of the teeth, as almost all of the applicants have particularly unclean teeth. Tonsils and adenoids have been searched for for years, but one seems apt to look right over the tongue depressor and miss the teeth.

Total number examined,	1444
Boys,	849
Girls,	595
Tuberculous infections,	151
Old Adenitis,	4
Bronchial Glands,	145
Old Joints,	2 151
Anaemic,	6
Endocarditis Chronic,	113
Number of cards refused until subsequent examinations were made on account of cough and heart action,	13
Number of cards not signed,	6
Number directed to "outside work,"	12
Number advised to seek outside work,	165

Most respectfully,

CHAS. F. CONNOR.

REPORT OF BACTERIOLOGIST.

New Bedford, January 1, 1921.

To the Board of Health:

GENTLEMEN:

I herewith submit my report for the year ending December 31, 1920:

Diphtheria:

Whole number of cultures examined,	589
Whole number of cultures positive,	71
Whole number of cultures negative,	514
Whole number of cultures unsatisfactory,	4

Tuberculosis Pul.:

Whole number of specimens examined,	162
Whole number of specimens positive,	48
Whole number of specimens negative,	102
Whole number of specimens unsatisfactory,	12

Tuberculosis Pul., N. B. Sanatorium:

Whole number of specimens examined,	93
Whole number of specimens positive,	62
Whole number of specimens negative,	27
Whole number of specimens unsatisfactory,	4

Typhoid Fever:

Whole number Widal reaction,	25
Whole number positive,	8
Whole number negative,	17

Respectfully submitted,

A. H. MANDELL, M. D.,
Bacteriologist.

REPORT OF OCULISTS.

New Bedford, Mass., January 1, 1921.

To the Board of Health:

GENTLEMEN :

I herewith submit the following report as oculist to the Board from Jan. 1, 1920, to Dec. 31, 1920:

Number of visits,	795
Number of cases of Ophthalmia Neonatorum,	3
Number of cases of Suppurative Conjunctivitis,	95
Number of cases of other diseases of the eyes,	717

All cases have resulted in no impairment of vision.

Respectfully submitted,

ALPHONSE NORMANDIN, M. D.,
Oculist.

New Bedford, Mass., January 1, 1921.

To the Board of Health:

GENTLEMEN :

I herewith submit the following report of work performed by me as oculist to the Board for 1920: I made eleven hundred and sixty-three calls on children suffering from diseases of the eye. All cases have resulted in no impairment of vision.

Respectfully submitted.

CHARLES M. ATCHISON,
Oculist.

REPORT OF OPHTHALMIA NURSE.

New Bedford, January 1, 1921.

To the Board of Health:

GENTLEMEN:

I herewith submit my report of the work performed by me under the direction of Dr. A. Normandin and Dr. Charles M. Atchison: Infants treated, 28; visits made, 776. In several cases visits were made twice a day for three weeks before the patients were discharged.

Respectfully submitted,

THERESA LYONS,
Ophthalmia Nurse.

REPORT OF TUBERCULOSIS CLINIC.

New Bedford, January 1, 1921.

To the Board of Health:

GENTLEMEN:

I herewith submit my annual report of the work performed by me at the Board of Health Tuberculosis Clinic:

Number patients examined,	3906
Number re-examinations,	2983
Number of new Pulmonary cases,	177
Number suspicious cases,	163
Not Tuberculosis,	290
T. B. Glands,	8
T. B. Bones,	2
Sanatorium treatment advised,	169
Home treatment advised,	12
Referred to Public Health Nurses,	192
Arrested cases,	25

Respectfully submitted,

S. H. REMICK, M. D.,
Chief of T. B. Clinic.

REPORT OF VENEREAL DISEASE CLINIC.

New Bedford, Mass., January 1, 1921.

To the Board of Health:

GENTLEMEN:

I herewith submit my annual report as Chief of the Venereal Disease Clinic:

New admissions:	Male.	Female.

Number of patients discharged:		
With permission,		130
Without permission,		31
Number of patients,		440
Number of visits for treatment and advice,		3517
Number Arsphenamine treatments,		618
Number of Wasserman tests,		408
Number of examinations for the Gonococcus,		101

Respectfully submitted,

A. H. MANDELL, M. D.

REPORT OF INSPECTOR OF SLAUGHTERING.

New Bedford, January 1, 1921.

To the Board of Health:

GENTLEMEN:

My report as Inspector of Slaughtering for the year 1920 is hereby submitted:

Number of beef cattle slaughtered,	76
Number of swine slaughtered,	502
Number of calves slaughtered,	122
Number of sheep slaughtered,	69

Of the beef cattle, 8 were condemned; of the swine, 1 was condemned; of the calves, 1 was condemned, as unfit for food; of the sheep, none were condemned.

Respectfully submitted.

H. B. HAMILTON,
Inspector of Slaughtering.

PLUMBING INSPECTORS' REPORT.*To the Board of Health:*

GENTLEMEN:

Following is the work performed by the Plumbing Inspectors for the year ending December, 1920:

Inspections, including investigations of nuisances, defective plumbing and relief valves, 3708.

Respectfully submitted,

LOUIS H. RICHARDSON,
WILLIAM DEACON.

Inspectors of Plumbing.

NEW BEDFORD EXTRACTOR COMPANY'S REPORT.

New Bedford, January 1, 1921.

To the Board of Health:

GENTLEMEN:

We submit herewith our report for the year ending December 31, 1920:

Total garbage treated,	10,258 tons
Horses (133), Cows (2), Ponies (2),	71 tons
Total material disposed of,	10,329

All small animals delivered are included in the garbage tonnage shown above.

Respectfully submitted,

NEW BEDFORD EXTRACTOR COMPANY,
By C. M. Schindler, Asst. Treas.

June 9, 1921.

Concurred.

HAROLD WINSLOW, Clerk.

Annual Report

OF THE

Inspector of Animals

TO THE CITY COUNCIL

For the Year 1920.

NEW BEDFORD
THE A. E. COFFIN PRESS — COFFIN BUILDING
1921

ANNUAL REPORT

NEW BEDFORD, MASS.

JANUARY, 1, 1921.

To His Honor, the Mayor and the Board of Aldermen:

GENTLEMEN:—My report as Inspector of Animals for the City of New Bedford, for the year 1920, is herewith submitted.

The usual inspection of all cattle, sheep, swine and goats was made in January and February in accordance with the law, and a detailed report as to their health and stabling conditions was made to the director of Animal Industry on completion of the work.

There were at that time 575 dairy cows, 120 other cattle, 262 pigs, 2 sheep, and several goats, all of which were in good health, and with very few exceptions, comfortable housed.

Only 2 cases of tuberculosis in cows have been found and properly disposed of during the year. There has not been a case of glanders found, though several suspicious

cases have been investigated. The last case of rabies was disposed of late in December, 1919, so that while a number of dogs have been suspicious and held in quarantine at various times during the year, no positive cases have developed.

The number of horses from other states which come here and are held in quarantine for observation has been less this year than usual. There has been no outbreak of hog cholera as has been the case for some years past, due possibly to the fact that more and more the preventative treatment is being given.

Respectfully submitted,

H. B. HAMILTON,

Inspector of Animals.

CITY OF NEW BEDFORD.

IN BOARD OF ALDERMEN,

January 27, 1921.

Received, ordered printed in City Documents for concurrence.

W. H. B. REMINGTON,
City Clerk.

IN COMMON COUNCIL,

January 27, 1921.

Concurred.

HAROLD WINSLOW,
Clerk.

Annual Report

OF THE

Inspector of Wires

TO THE CITY COUNCIL

For the Year 1920.

NEW BEDFORD:
THE A. E. COFFIN PRESS — PRINTERS
1921

ANNUAL REPORT.

New Bedford, January 20, 1921.

To His Honor the Mayor and the City Council of the
City of New Bedford.

Sirs:—I respectfully submit my annual report of
this department, from November 30, 1919 to December
1, 1920.

INSPECTION OF INSIDE WIRING.

During the year have made 5998 inspections.

Have issued to the New Bedford Gas & Edison Light
Co., 2472 permits to connect electric services.

Sent out to contractors and property owners 2100 re-
ports on defective wiring.

Have issued 981 certificates on rough work.

Have superintended electrical work in the Emery St.
school, also passed on plans and specifications for
three new school houses.

REMOVAL OF OVERHEAD WIRES AND CONSTRUCTION.

On January 29, 1920, after a meeting of the
Inspector of wires, City Engineer, and Superintendent
of Streets, the following letter was sent to the Mayor
and Board of Aldermen:—

To His Honor the Mayor and Board of Aldermen:—
Gentlemen:—

In compliance with Section 3 of Chapter 335, Acts of 1914, as follows:—

The Inspector of Wires, City Engineer and Superintendent of Streets, shall annually in the month of January, present to the Mayor and Board of Aldermen, a list of public ways and places specified in Section two, or parts thereof, from which in their judgment, the overhead wires and construction shall be removed in accordance with the provisions of this act.

We herewith present to you the following list:

High St.	Purchase to County...	1150 ft.
Mill St.	Purchase to County...	1149 ft.
North St.	Purchase to County...	1147 ft.
Hillman St.	Purchase to County...	1166 ft.
Maxfield St.	Purchase to County...	1181 ft.
Total.....		5793 ft.

On February 11, 1920, after a hearing, the following order was sent to the several wire using companies as follows:—

City of New Bedford,
In Board of Aldermen,
February 11, 1920.

WHEREAS, under the provisions of Chapter 335 of the Acts of 1914, due notice has been given and a hearing has been held by this Board, it is hereby

ORDERED, That all telegraph, telephone, electric light, electric motor or power, and all other wires, cables and conductors, in and above the hereinafter designated streets, and all poles and structures in said streets used for the support of same, excepting such structures, poles, cables, wires and conductors as are excepted by said Chapter 335, Acts of 1914, shall be removed within the time named in said Chapter, or that said wires, cables or conductors shall be placed, maintained and operated in underground conduits.

Locations for said underground conduits shall be petitioned for in accordance with the provisions of Chapter 335, Acts of 1914, and all acts in addition thereto or amendments thereof.

The streets or parts of streets designated and affected by this order are as follows, to wit:—

High St.	Purchase to County	1150 ft.
Mill St.	Purchase to County	1149 ft.
North St.	Purchase to County	1147 ft.
Hillman St.	Purchase to County	1166 ft.
Maxfield St.	Purchase to County	1181 ft.
Total		<u>5793 ft.</u>

And the City Clerk is hereby directed to serve notice of the adoption of this order upon the owners of all wires, cables, or conductors, in and above said streets, and all poles and structures in said streets, for the support of same, by mailing to each of said owners, by U. S. registered letter mail, an attested copy of this order.

And the City Clerk is hereby further directed to cause this order to be recorded in the Book of Location Order Records, as provided in Chapter 509, Acts of

1911, and to furnish a copy of this order to the Inspector of Wires, the City Engineer and the Superintendent of Streets of the City of New Bedford.

IN BOARD OF ALDERMEN, Adopted and ordered recorded in Book of Location Order Records, February 11, 1920.

A true copy attest:

W. H. B. REMINGTON, City Clerk.

OUTSIDE WORK.

During the year I have investigated and reported to the Mayor and Board of Aldermen on 234 petitions of wire using companies involving 543 poles, and 14 conduit locations.

POLICE SIGNAL SYSTEM.

During the year three new patrol boxes have been installed. Two patrol boxes have been relocated on pedestals connected by underground cable. Two of the old type box pedestals have been replaced by pedestals of the Bridgeport type.

New underground cable has been installed for a distance of 1072 feet to accomodate the relocating and adding of boxes; and 728 feet of new cable has been installed to replace defective cable.

Two of the new patrol boxes made necessary the extending of overhead lines for a distance of 2125 feet with new construction. Disused overhead lines have been permanently removed for a distance of 625 feet. Existing overhead construction has been rebuilt for a

distance of 440 ft. All of the boxes have been repainted during the year. There are 66 patrol boxes and two flashlights connected with the system.

The City has been divided into three sections by Chief Doherty, which calls for the same division of the Police Signal System. This will require a desk at Weld St. and one at the South Water Street Station.

Signal lights to notify patrolmen when on their beats to call the station, are greatly needed.

Very truly yours,

WM. P. BRIGGS,
Inspector of Wires.

CITY OF NEW BEDFORD.

IN BOARD OF ALDERMEN,

Jan. 13. 1921.

Received, ordered printed in City Documents for concurrence.

W. H. B. REMINGTON,

City Clerk.

IN COMMON COUNCIL,

Jan. 13, 1921.

Concurred.

HAROLD WINSLOW,

Clerk.

The Sixty=Ninth Annual Report

OF THE

TRUSTEES

OF THE

FREE PUBLIC LIBRARY

CITY OF NEW BEDFORD

MASSACHUSETTS

For the Year 1920

NEW BEDFORD
THE A. E. COFFIN PRESS — PRINTERS

TRUSTEES' REPORT

To the Honorable, the City Council of the City of New Bedford, Mass.

The trustees present their sixty-ninth annual report to the City Council in the Report of the Librarian, which has been adopted by the Board.

Respectfully submitted,

BOARD OF TRUSTEES,

GEORGE H. TRIPP,
Clerk of the Board.

LIBRARIAN'S REPORT

To the Trustees of the Free Public Library:

Gentlemen:

In presenting the sixty-ninth report of the Free Public Library, it may be well to notice the completion of ten years in this building. In this time the library has greatly extended its service the circulation of books has practically doubled, the enlarged facilities offered by the departmental system of administration has allowed the public freer access to the treasures of the library than was possible before.

The year just closed has been an exceptionally busy one, the books taken out for home use have approached the half-million mark (480,000), the use of the Reference Room shows a greater appreciation of the opportunities offered to obtain information on all kinds of questions which are brought to the library for solution, the circulation of pictures from the Art Room, largely for use in the schools, was 84,000, and the other departments show a corresponding activity.

Two publications demand especial attention, a revised edition of the Catalogue of books, pictures, etc., relating to whaling owned by the library, and a second part of the Books on printing and the liberty of the press, the bequest of the late William L. Sayer. The whaling catalogue has

aroused great interest among library officials and book collectors, special commendation of the list being noted in an English library journal, and requests for the pamphlet have been very numerous.

Other publications have been a List of Serials and Continuations which ran through several numbers of the Monthly Bulletin, a Bibliography of Pilgrim Literature, a Lenten Reading List, and a list of Views of New Bedford owned in the library, which is now being published in the Bulletin. There are over 700 pictures, photographs, stereopticon prints, etc., in our collection.

The books added by purchase were 6,425, costing \$9,478, an average of a trifle under \$1.50. The number of school rooms now supplied with library books is 202 and is constantly increasing.

The Library Lectures have been given as in the past nine years, and the audiences were large and appreciative. Some of the lectures have drawn a thousand people.

There have been several exhibits in the Rotunda. A collection of old New Bedford maps attracted a good deal of attention when displayed in the Spring. Later, a hundred local theatrical posters, showing the character of the amusements offered to the New Bedford public fifty years ago, gave enjoyment to many especially to those who had the age and the memory to recall them. The U. S. Commission on Camp Activities showed a collection of pictures of memorial buildings, erected or projected in various cities. There was a very creditable collection of posters, prepared by the pupils of the High School in connection with Good Speech Week, and an exhibition of twelve paintings by Henry S. Eddy, a native of this city.

In the spring a number of Book-talks on Monday afternoons continued the service which had been given during the

war, when volunteer readers contributed to the pleasure of audiences, who were invited to "bring their knitting."

The use of the building as a civic center of literary activities has been very gratifying, sometimes as many as five or six organizations using some part of the building in one day. The number of meetings held in this library was 348, by 39 different organizations.

The Genealogical Room has been enriched by a number of histories of local families, prepared for the library by Mr. George L. Randall.

The only painting purchased is a view of the New Bedford wharves in the palmy days of whaling, by Perc E. Cowen.

A marble bust of the late James Arnold was presented to the library by the children of William J. Rotch. The work of Crawford, the eminent American sculptor, it is a worthy addition to the art treasures of the library.

During the Spring the Librarian was granted leave of absence for a month to make a tour of the Northwest and the Pacific States, in the interest of the Enlarged Programme of the American Library Association. He accompanied the Chairman of the Committee in charge of that work, Mr. Frank P. Hill, Librarian of the Brooklyn, N. Y. Public Library. During the trip, they addressed library trustees and other officials on the subject in Chicago, St. Paul and Minneapolis, Spokane, Tacoma, Seattle, San Francisco, Los Angeles, and Riverside. The local contributions to the fund at present amount to \$717.

Library branches have been planned for the Community Centers, and one in the DeValles School has been in operation for some months.

The library has recently subscribed to the Legislative Information Service which supplies daily reports on the progress of legislation in Massachusetts. This should prove of great value to business men interested in the doings of our law-makers.

Books have been borrowed freely when needed from the Boston Public Library, which has extended to this library exceptional courtesy in helping supply our needs, when books were demanded which were not in our collection. The policy of libraries the country over is now to render mutual assistance and disregard merely geographical lines.

In the same spirit we have been able to send books to numerous towns on the Cape and elsewhere, and the service has been very welcome.

Thanks are due the local papers for their ready response to requests to print matters of library interest.

The branches have done satisfactory work, and the reports of their activities and the detailed reports of the several departments of the library will be given in appendices to this report.

The esprit of the staff is excellent, and their efforts to render acceptable service to the public has been often highly commended by those who use the library.

Respectfully submitted,

GEO. H. TRIPP, Librarian.

REFERENCE DEPARTMENT.

The work in this room this year has been much the same as it has been in previous years. The only unusual thing the Reference Department has attempted this year has been a complete renovation of the Pedagogical Room. This room formerly contained a collection of some of the text books used in the public schools and some old books on teaching. Our idea is to make it an up-to-date collection of books on pedagogy in all its phases. With this idea in view, the former collection, with a very few exceptions, was relegated to the stack, and its place filled with all the newer and more interesting books on teaching which the library possesses. The entire collection was catalogued and the catalogue placed conspicuously on the table. Heretofore a person desiring the use of the room was obliged to go to another department for the key; now he may go directly to the Pedagogical Room itself. There are separate shelves for books on continuation schools and for a collection of books on Americanization. At Mr. Keith's request books on civics were added.

That such a room was needed is evidenced by the circulation statistics. The room was opened in its new capacity in September, and during that month the circulation exceeded that for the entire year of 1919, and it has kept up very well during the other three months. Our aim is to keep this collection up-to-date, and to do so through the co-operation of the teachers.

We have had this year several requests from High School teachers to have material reserved for their classes. This material, in addition to that collected for debates, has kept the High School shelves full most of the school year.

It has been our privilege also to send one hundred forty-nine books and magazines to eleven small towns on the Cape and the Vineyard.

RUTH W. HATCH.

ART ROOM.

During the past year the problem in this department has been to increase the picture supply to meet the ever growing demand.

The Pilgrim Tercentenary, the organization and spread of Americanization, classes calling for books and pictures illustrative of "racial backgrounds," together with a wide variety of historical and geographical topics, have drawn heavily upon our material. Part of the time it has been necessary to have one more assistant to handle the circulation, which includes 84,018 pictures, although the entire collection is about half that number.

Many visitors were attracted to the exhibition of Mr. Henry T. Eddy's paintings.

It is gratifying to hear that bookcases for the music collection will soon be in readiness for the Art Room, for we hope that this long contemplated arrangement will give much more satisfactory service to the public.

JANE E. GARDNER.

REPORT OF JUVENILE ROOM.

The Juvenile Department and the School Library Collections show a large increase in the circulation of books through their various agencies. Especially is this true of the North Branch, which has circulated 9562 more books this year than in 1919. It is natural and right that the increases should come from the north and south ends of the city where are to be found great numbers of children. A trip through these sections of the city after school hours makes one wonder whether *all* the children in New Bedford live at the ends of the city. These great numbers of young readers cannot

be adequately served by our present system and your Children's Librarian strongly urges some plan whereby the children may have separate rooms at the branch libraries with special attendants in charge.

There are 202 sets averaging 50 books each in the School Room Libraries in circulation, including sets in the new Continuation Schools for girls and boys. These latter sets have been in use for a little over two months and the teachers and pupils are most enthusiastic over their books.

A splendid collection of several hundred books was gathered through this department and sent to Dr. Grenfell for his work in Labrador. This is the fourth box sent through the generosity of New Bedford donors.

Children's Book Week, Nov. 15-20, furnished an excellent opportunity for service and its influence has been far reaching. The Children's Librarian acted in an advisory capacity at the local book-store afternoons during that week, helping people select books for their children. The Library and the Book Store circulated widely an attractive book list of children's books and everything possible was done to interest parents, teachers, and children themselves in the buying of better books. A talk was given by the Children's Librarian on "Books for Children" before the Mothers' Club at the North Christian Church.

An interesting outgrowth of this week is a set of letters written by the children of the Public Schools on their favorite books. Many of these letters would do credit to older people. There is on file a selected set from every school—not necessarily the best letters from the point of excellence in workmanship, but the most unique and original in expression. The letters make interesting reading and serve to show that the children of New Bedford use freely the Library and its agencies. A vote was taken throughout the city on the children's favorite books. The returns will be

counted later and results tabulated. This co-operation on the part of the schools awakened among the children a new interest in books.

JANE ELLIS THUMAN.

GENEALOGICAL DEPARTMENT.

Early in the year, this department furnished material to participants of the prize contests which the Woman's Club held for stimulating interest in the Landing of the Pilgrims and what it has come to mean to our nation today.

The Genealogical Department has an interesting collection of photographs, stereographs, and post cards of New Bedford and vicinity. This collection has been added to during the year, and now numbers 708 pictures.

Nine of the genealogies upon which Mr. Randall has been working for the library are ready. They treat of the following families: Bennett, Benson, Cannon, Clark, Clarke, Cook, Cooke, Cowing, Davis, Haskins, Hatch, Hathaway, Mendall, Merihew, Mosher, Nicholas, Parlow, Pittsley, Reynolds, Rose and Wordell.

A brief but interesting history of our city has been written by Miss Emma L. Gartland. It is called, "New Bedford's Story for New Bedford's Children." Several copies have been added, and we hope the boys and girls will make use of them.

Attention is called to the following new books:

"Towns of New England and Old England, Ireland, and Scotland, Part I." It is issued by the State Street Trust Company of Boston, to commemorate the Tercentenary of the Landing of the Pilgrims, and is replete with illustrations.

"Cape Cod and the Old Colony," by Albert Perry Brigham.

"The Women who came in the Mayflower," by Annie Russell Marble. The author carries us back to the time when some of our Pilgrim grandfathers and grandmothers were the boys and girls, young men and young women of Plymouth, and brings forcibly to our minds that first winter when homesickness, illness, and death confronted the faithful little band.

Perhaps fewer inquiries for genealogical data came to us through letters this year, but there came earnest seekers, some from a distance, who found our genealogical collection of great help.

ALICE H. TRIPP.

REPORT OF NORTH BRANCH.

The year just passed has been one of great activity at the North Branch. The book circulation has been larger than ever before, and the patronage of the reading tables has shown a constant increase.

The use of the same magazines by juveniles and adults has given rise to some complaint by the latter, copies frequently being brought to the desk showing where a page continuing a story has been torn from the binding for the sake of the paper doll or colored advertisement on the other side.

Several Americanization classes have been brought in by their teachers to get cards and books.

In connection with this it must be said that no books in the Library are more appreciated than those in foreign lan-

guages and it is a great pleasure, after a child has carried books home a few times, to have the parents come in to make their own selection.

Aside from being a book centre, the branch has been of use in various small ways which are, perhaps, hardly worth mentioning, but which prove its usefulness to the public for whom it was provided.

Respectfully submitted,

ELSIE COLLINS.

ELK—BROOKLAWN PARK

CITY OF NEW BEDFORD
BOARD OF PARK COMMISSIONERS

December 1, 1920.

To His Honor the Mayor and the City Council:—

GENTLEMEN :—

We submit herewith the report of the Board of Park Commissioners together with the financial statement for the year ending December 1, 1920.

This statement shows that the greatest possible care has been exercised in reducing the cost of maintenance, while the increased cost of labor and material has curtailed many of the improvements we had looked forward to completing this year.

As stated the regular appropriation did not permit of any extensive permanent improvements, but we trust to have a sufficiently large enough appropriation this year to carry out certain urgent improvements.

Several repairs were made on the buildings and animal cages the past year. The Administration House at Hazelwood Park was connected with the West Brock Avenue sewer.

BRIDGE APPROACH

An addition to the small aviary constructed last year has been built at Buttonwood Park during the past season. The birds in our collection are in first class health and during the past few months we have obtained some bright plumage birds for our visitors. The following birds were added:—2 Macaws, 2 Toucans, 4 Peafowl, and 3 Ringneck Pheasants.

Our zoo at Buttonwood Park continues to be a center of attraction. As we had an oversupply of bears from the viewpoint of small quarters, it was deemed advisable to construct an addition to the bear pit.

A heavy granolithic sidewalk was built around Ashley Park. At this plot, the walks, especially on Bolton Road and South Orchard Street were in such condition that it was impossible to walk over them with any degree of comfort.

The department purchased a Beaman Motor Lawn Mower the past season. This piece of apparatus has proved a valuable asset in keeping the athletic fields at the parks in perfect condition, for in this class of work time is an important factor and the excellent condition of these various plots during the past season was a tribute to the efficiency of this machine.

A special appropriation of \$35,324 was expended in constructing concrete bleachers at Victory Park. With this fund the City of New Bedford has acquired much needed accomodations for the service and comfort of the public. This stand with a seating capacity of one thousand is con-

PAGEANT—COMMON

structed of concrete with granolithic finish. Under the stands there are provisions made for shower baths and dressing rooms for the players. The use of our parks for recreative purposes is annually commanding increased interest, and the social enjoyment afforded by this improvement fullfils our expectations as attested by the increased attendance at the various games, and by the hearty commendations received at this office.

Heretofore, parks have been measured by acreage, improvements, and cost per capita of the population. These statistics must still be preserved by a new formula which will give us also better knowledge of the use of the parks by the people. We are trying to have them used by all ages, grown-ups as well as children.

As previously stated the use of the parks for recreative purposes has increased in popularity. During the past year one additional baseball diamond was laid out making a total of six park diamonds on which the regular mill league schedule is played. These games have been in every sense of the word successful, as attested by an attendance of four thousand at the half holiday contests, and an attendance of ten thousand at the Sunday games. The conduct of our sports have been exemplary in every respect and has met with popular approval.

One additional tennis court was constructed at Buttonwood Park during the past year and all the others were graded and placed in good condition. Tennis holds its popularity and makes the courts much in demand. The Mill

Tennis League played its schedule of matched games at the various parks and the inter-city contests were also staged on our courts.

The parks were thrown open to every possible form of patriotic endeavor, compatible with their proper maintenance.

The playground season ended with a Pageant at the Common. Several hundred children from the various playgrounds participated in this exhibition which was witnessed by a large and appreciative audience.

We should give earnest consideration to the question of park extension to include the purchase of land adjacent to the west line of Buttonwood Park for the purpose of completing a boulevard around the pond. This improvement is in strict harmony with, and embodied in the general plan prepared by our City Engineer, George H. Nye. In urging the purchase of this land its relation to the physical growth of the city is taken into consideration. We feel if it is not acquired at this time, the needed land will soon be impossible to acquire by reason of the cost which improvements, if made, will put upon it.

We have urged in the past that attention should be directed toward the construction of a comfort station at Buttonwood Park. The season of 1921 gives every promise of an increased attendance at the park to enjoy the many sports and games. As stated, this park of approximately one hundred acres affording recreation for twenty thousand visitors each week-end, is in urgent need of up-to-date sanitation facilities. With the advent of Sunday sports this appeal has now become a necessity.

The Greenhouse constructed on leased land was disposed of during the past season. From an economic standpoint, we would recommend the construction of a new greenhouse on park property. It is obvious that such a structure is absolutely necessary for future work in protecting and cultivating delicate plants and flowers.

In concluding this report it is our painful duty to record with deepest regrets the loss of our former Superintendent, Thomas W. Cook, who died on February twenty-second. Mr. Cook had been an active member of the Park Department for twenty years. He took great interest in the betterment of our parks, in their extension and improvements to meet the public needs, and his activity in that direction was backed by his earnest desire to promote the best interests of the community.

Respectfully submitted,

WILLIAM P. COVELL,
WILLIAM F. CASWELL,
GEORGE H. HEDGE,
JOSEPH BARNES,
GEORGE H. CUSHING.

DEER—BUTTONWOOD PARK

SUPERINTENDENT'S REPORT.

New Bedford, Mass.,

December 1, 1920.

To the Board of Park Commissioners:—

It is my pleasure to submit the following report of work done at the various parks for the year ending November 30, 1920:—

At the request of some of the citizens of Ward Six, there was made at Hazelwood Park a Bowling Green, and lockers were installed for the accommodations of the bowlers. Subsequently, it was voted by the City Council to place concrete bleachers at Victory Park. The bleachers accommodate one thousand people and there are two dressing rooms for the players. They ought to prove very popular and I am sure will be much appreciated by the public.

The old baseball diamond at Buttonwood Park, known as Diamond No. I, was removed a short distance away from Rockdale Avenue on account of the many dangers to passersby. A new football diamond was also made at this park and one tennis court added. Buttonwood Park was further embellished by the planting of mountain laurel and a path was made through the woods to Hawthorn Street.

LUCAS HOUSE—HAZELWOOD PARK

Much brush and dead trees were removed from all the parks. In a general way the public seemed to enjoy the parks and the recreation facilities offered by them more each year.

The playground work was placed in charge of your Board by the City Council this year. Some of the apparatus has already been installed at Ashley Park and at the Common. During the coming year it is my hope to further this work and install the remaining apparatus at the various playgrounds. The playgrounds have proved very successful. We have given the children the benefit of the Hathaway Playground by keeping it open the entire year.

On the second day of the playground season five hundred children availed themselves of the privileges offered them at the Common, which shows their popularity. Our playgrounds have done much the past summer towards keeping the children from the streets. Public safety demands such protection. If our playgrounds teach the children the principles of good conduct and right living the money spent for recreation is a good investment.

We have accomplished many things the past year in the way of repairs to our buildings and if the City Government could find a way to give our department an appropriation of \$100,000 a year, this would enable us to place the parks in a high standard.

Respectfully submitted,

EVERETT B. SHERMAN,

General Supt. of Parks.

PLAYGROUND—GROVE PARK

FINANCIAL REPORT.

New Bedford, Mass.,

December 1, 1920.

*To His Honor the Mayor, Board of Aldermen, and Members
of the City Council:*

GENTLEMEN :—

The Overseers of the Poor of the City of New Bedford respectfully submit their annual departmental report covering the fiscal year December 1, 1919, to November 30, 1920:

It is needless to relate the depths of distress to which so many families were plunged during the recent industrial depression, caused by the curtailment and shut-down of the mills. It is enough to recall that it was so. To this department fell the task of relieving these unfortunate families in so far as food, fuel, medical attendance, and in some instances, merchandise was concerned. Is it any wonder, then, that we are nearly bereft of our funds? The world over there are always those who take advantage of a situation like that passing, as came to light during this crisis, but in most instances the deserving ones were alleviated of their suffering to a great extent.

We feel that with the resumption of work by some of the mills long idle the tension of the strain on departmental funds will relax, and for this we sincerely hope.

The appended tables give full particulars as to the amount expended for each division.

Respectfully submitted,

KOPEL COHEN, Chairman,
EDWARD DeMELLO,
A. DENNIS PERREAULT,

CHARLES A. POIRIER,
Secretary.

CASES AIDED IN 1920.

Number settled in New Bedford,	1,966
Number of State cases,	619
Number settled in cities and towns,	89
	<hr/>
Total cases,	2,674

	1713	1607	20	55	278	56

Dr. Brault resigned on April 30, 1920.

Dr. Senecal appointed May 1, 1920.

The rate per visit of doctors to all cases outside of Alms-house has been computed to be one dollar and thirteen cents (\$1.13).

Almshouse.

Good progress has been made as regards increased production from the farm. New farming implements, methods and interest in the farm by the city government and this department as a whole has promoted its progress. A garage, having four spaces for cars, was constructed, which was badly needed. It provided proper space for our horse-drawn farming implements, also for a pipe shop and engineer's workshop. The cost of the garage was approximately \$2000 for covering cost of all stock used. The labor was entirely furnished by the farm, and now we have one of the finest garages, which was much needed and which was secured at a low cost. More work is being secured from able applicants than formerly through having them become interested in the farm and themselves. Our progress is most favorable in every way.

Our livestock and farming implements are of the best. The care taken in the management of the farm in its entirety has been of the best, and we have an Almshouse of which the City of New Bedford should be proud.

March 9, 1921.

To His Honor, the Mayor and Members of the City Council.

GENTLEMEN :

I hereby submit to you the annual report of the Department of Weights and Measures for the financial year ending November 30th, 1920, enclosing a tabulated report of the work performed and the inspections made during the fiscal year.

The inspection work for the year shows a decided increase over last year and it is due to this phase of our work that we have been able to protect the purchaser of large amounts as well as the small buyer, lessening in no measure the protection of the latter, the larger force of men being of great value in this field.

The city has been well covered during the year and we feel that for every dollar expended on our department we have returned full value to the citizens of New Bedford.

The scope of the work of the department is being gradually enlarged, the new rulings in regard to gasoline pumps especially requiring our constant attention. The testing of glass graduates in use in the drugstores of the city is also a duty that we have had turned over to us by the State Department.

The Department of Weights and Measures, during the past year, as the report will show, was the means whereby eighteen convictions were obtained in the District Court and fines or sentences were imposed in all cases. This work was due wholly to the efficient methods of inspection now in force in this department.

The Department is still handicapped in regard to transportation, the two teams now in use being hired by the week. It is utterly impossible, at times, to watch suspects who are provided with automobiles, it being comparatively easy for them to slip away from us with our antiquated methods of travel.

During the year eleven state, twenty - three special city and twelve county licenses were issued, from these the city receiving a revenue of \$575.00.

I wish to express my appreciation to Your Honor and the members of the City Government for the assistance you have given us in making this department of such importance to the city of New Bedford.

Very truly yours,

JOHN HOBIN,
Sealer of Weights and Measures.

ANNUAL REPORT
OF THE
SCHOOL COMMITTEE

AND
SUPERINTENDENT OF SCHOOLS

OF THE
CITY OF NEW BEDFORD

For the Year 1920

NEW BEDFORD:
NEW BEDFORD PRINTING CO., PRINTERS

1921

IN SCHOOL COMMITTEE.

DECEMBER 31, 1920.

Voted, That the Secretary prepare the Annual Report of the School Board for the year 1920, which shall include the reports and recommendations of the Superintendent and his subordinates, and that 1200 copies of the same be printed.

The following report for the year 1920 is respectfully submitted:

Report of the School Committee.

STATISTICS.

I. POPULATION AND VALUATION.

The population of the city (census of 1890) was	40,705
The population of the city (census of 1895) was	55,251
The population of the city (census of 1900) was	62,442
The population of the city (census of 1905) was	74,321
The population of the city (census of 1910) was	96,652
The population of the city (census of 1915) was	109,462
The population of the city (census of 1920) was	121,217
Valuation of the taxable property (1920) was	\$182,889,883.00
School houses and lots,	3,316,675.00
Other school property,	245,214.19

II. APPROPRIATION.

Rate of taxation,	\$27.20
Amount for school purposes not including new buildings,	\$1,045,000.00

III. SCHOOL CENSUS.

Number of children between five and sixteen years of age, and illiterates between sixteen and twenty-one years of age, reported by the census enumerators, in accordance with the census record taken April 1, 1920:

Between 5 and 7 yrs.	2,944
Between 7 and 14 yrs.	15,159
Between 14 and 16 yrs.	4,069
Between 16 and 21 yrs. (illiterates)	1,602

IV. SCHOOL ORGANIZATION, June 25, 1920.

High school,	1
Grammar schools,	6
Mixed schools—Grammar, Primary and Ungraded,	8
Primary schools,	16
Suburban schools,	2
Fresh Air schools,	3
Orthopaedic school,	1
Conservation of Eyesight schools,	2
Cooking schools,	3
Manual Training schools,	4
	<hr/> 46

V. SCHOOL BUILDINGS, June 25, 1920.

Permanent schoolhouses,	35
Portable schoolhouses,	22
	<hr/> 57

VI. TEACHERS AND PRINCIPALS.

Whole Number in Service, January, 1921.

High school: 46 teachers, 1 clerk,	47
Elementary schools,	404
Special teachers and assistants,	24
School nurses,	4
Evening High school,	12
Evening Elementary schools,	91
Mill and other classes,	24
Continuation schools,	27
	<hr/> 633

PUBLIC SCHOOLS.

	1920	1919		
Enrollment of pupils,	16,207	15,827	increase	380
Average membership,	14,748	14,312	increase	436
Average daily attendance,	13,700	13,133	increase	567
Aggregate attendance,	2,555,050	2,298,275	increase	256,775

PRIVATE AND PAROCHIAL SCHOOLS.

	1920	1919		
Enrollment of pupils,	4,385	4,327	increase	58
Average membership,	4,055	6,085	decrease	2,030
Average daily attendance,	3,872	6,142	decrease	2,270
Aggregate attendance,	713,589	718,494	decrease	4,905

PUBLIC, PRIVATE AND PAROCHIAL SCHOOLS.

	1920	1919		
Enrollment of pupils,	20,592	20,154	increase	438
Average membership,	18,803	20,397	decrease	1,594
Average daily attendance,	17,572	19,275	decrease	1,703
Aggregate attendance,	3,268,639	3,016,769	increase	251,870

TABLE 1.

The cost of instruction per scholar is based on the average number belonging and the total amount expended for the maintenance of each department, not including the expenditures from the Sylvia Ann Howland Educational Fund or Dog Fund, during the year.

High school,	\$164.52
Elementary schools,	57.51
Evening Elementary schools,	12.65
Evening High school,	16.31
Day school,	63.77

RECEIPTS AND EXPENDITURES. 1919-1920.

CALENDAR 1921.

TERMS.

Fall term begins Sept. 8, 1920; ends Jan. 28, 1921.

Spring term begins Jan. 31, 1921; ends July 1, 1921.

Fall term begins Sept. 7, 1921; ends Jan. 27, 1922.

VACATIONS.

Mid-winter vacation, one week, beginning Feb. 21, 1921.

Spring vacation, one week, beginning April 18, 1921.

Summer vacation, nine weeks, beginning July 4, 1921.

Christmas vacation, one week, beginning December 26, 1921.

HOLIDAYS.

Good Friday,

March 25

Memorial Day,

May 30

Columbus Day,

October 12

From Wednesday noon before Thanksgiving the remainder of the week.

SCHOOL SESSIONS.

High School: 8:30 a. m. to 1:15 p. m. Recess of twenty minutes as near the middle of the session as practicable.

Pupils may be required to return from 2:30 to 4:00 p. m. for special assistance, to make up neglected lessons or for discipline.

Grammar and Manual Training schools: Morning session, 9.00 to 11.45 o'clock. Afternoon session, 1.30 to 3.45 o'clock, without recess.

Primary and Kindergarten Classes: Morning session, 8.45 to 11.45 o'clock. Afternoon session, 1.30 to 3.30 o'clock. Recess in these classes for every pupil, 15 minutes in the forenoon, 10 minutes in the afternoon, as near the middle of the session as practicable.

In all other classes the sessions shall be prescribed by the Superintendent, subject to the approval of the Board.

Whenever in the judgment of the superintendent the weather is so extremely inclement as to imperil the health of the pupils, or the conditions are such as seriously to interfere with pupils going to school, he shall have authority to order a no school signal.

The signal for no session of the schools shall be two strokes on the fire alarm, once repeated (2-2), at 7.30 a. m. for the morning session, and at 11.50 a. m. for the afternoon session.

OFFICE OF SUPERINTENDENT OF SCHOOLS.

166 William† Street.

Office open 8.30 a. m. to 4.30 p. m., except Saturdays.

Saturday 8.30 a. m. to 11.00 a. m., 2.00 to 4.00 p. m.

ALLEN P. KEITH, Superintendent.

Office hours, 8.30 to 9.00 a. m., 12 to 1 p. m.; except Saturdays.

Saturdays, 8.30 to 10.00 a. m.

JOSEPHINE B. STUART, Assistant Superintendent

Office hours, 8.30 to 9.00 a. m., except Saturdays.

Mondays and Wednesdays, 4.00 to 5.00 p. m.

ELIZABETH B. TRIPP, Grade Supervisor.

Office hours, 8.30 to 9.00 a. m., except Saturdays.

Thursdays, 4.00 to 5.00 p. m.

EDWARD T. N. SADLER, Director of Continuation Schools.

Office hours, 11.30 to 12.30 p. m. except Saturdays.

Chief Clerk.

VIOLA C. MANSEAU, 30 Durfee Street.

Pupils in special classes not included in above table.

Respectfully submitted,

ALLEN P. KEITH,

Secretary.

Report of the Superintendent.

To the Honorable School Committee:

Dr. Croacher and Gentlemen:—I have the honor to submit the sixtieth annual report of the Superintendent of Schools of this city.

CONTINUATION SCHOOLS.

In accordance with the State law Continuation Schools were opened at the beginning of the fall term. These schools, which are supported jointly by city and state, are under the direction of Edward T. N. Sadler, who upon his appointment worked early and late getting together a corps of teachers and organizing the classes. When one stops to realize that there were over two thousand pupils to classify and assign to classes and that care had to be taken to distribute the employees of each organization among the ten sessions in the week and to keep the classes in working order with the members constantly changing their places of employment, it will readily be seen that Mr. Sadler's task was no easy one. He has organized his department so efficiently that he has won the commendation of the state officials in charge of the work. He has certainly proven to be the right man in the right place. For a more detailed statement of the plans and aims of these classes you are referred to Mr. Sadler's report which will be found in the appendix.

AMERICANIZATION.

The appointment of a director of Americanization and the employment of a full time supervisor to organize and extend

the work has given an impetus to this movement which leads us to the conclusion that for the first time we are attacking this problem with the promise of actually reducing the number of illiterates in this community. Miss Josephine Shanahan, who had made a success in this line of activity at Quincy, came to New Bedford on November first and since that time has organized thirty-five mill classes and ten club classes and in addition has greatly increased the number of adults attending the evening schools. Working with Mr. Sadler, the director, she has organized Saturday morning classes to prepare teachers for this particular line of work as with the resumption of full time in our industries we are sure to have many more classes. The employers have co-operated in every way with Mr. Sadler and Miss Shanahan by providing and furnishing school rooms and by taking a personal interest in the formation and progress of the classes. The semi-public organizations of the city have also given us every assistance. Such team-work is bound to win and fills the future with promise.

TEACHERS' COUNCIL.

On April thirtieth the School Committee voted unanimously to create a Teachers' Council and adopted the following Constitution and By-Laws:

TEACHERS' COUNCIL:

Acts as an advisory body to the School Committee and Superintendent.

Official means whereby teachers can cooperate in administration of the schools.

CONSTITUTION.

Article I—Name.

The name of this organization shall be "The Teachers' Council of New Bedford".

Article II—Purpose.

The purposes of this organization are:

1. To secure a more active and effective participation of the teachers, in an advisory capacity, in the professional direction of the schools.
2. To furnish the teaching body a definite and organized means for conference with the School Committee or for the expression of its sentiments or judgments with reference to questions of school policy.
3. To encourage professional improvement through the study and discussion of important problems of education and school management.
4. To afford the largest possible opportunity for initiative on the part of the teacher.

BY-LAWS.

Article I—Membership.

The membership of the Council shall be as follows:

Section 1. Five representatives, including the principal, from the teachers of the high school.

Section 2. Eleven representatives, including one primary principal, one grammar principal, and one teacher from each grade, from the teachers of the elementary schools.

Section 3. One representative from the supervisors.

Section 4. The superintendent of schools and the assistant superintendent of schools ex-officiis.

Article II—Officers.

Section 1. The officers of the Council shall be a president, a vice-president, and a secretary.

Section 2. The term of office for the officers shall be one year. They shall be elected at the first meeting of the Council after the adoption of these by-laws and thereafter at the first regular meeting of each school year to be held on the last Tuesday in September.

Article III—Committees.

Section 1. The officers shall constitute an executive committee to propose and arrange programs for the meetings, subject to the approval of the Council.

Section 2. A committee of conference shall be created for the purpose of conferring with the School Committee. This committee shall be composed of the President (member and chairman) and four other members.

Article IV—Meetings.

Section 1. Regular meetings of the Council shall be held on the last Tuesday of each month during the school year beginning in September and ending in May. When such date occurs during a vacation period the President shall announce a substitute date for the meeting.

Section 2. Special meetings may be called by the executive committee.

Section 3. Twelve members shall constitute a quorum.

Article V—Election of Members of Council.

Section 1. The members of the Council shall be elected by ballot by those members of the New Bedford Teachers' Association who belong to the groups mentioned in Article 1, during the first week of June and shall hold office for one year.

Article VI—Amendments.

These by-laws may be amended or repealed by a two-thirds vote of all the members of the Teachers' Council; provided that notice of such proposed action shall have been given at the regular meeting immediately preceding; and providing that the proposed action shall be included in the notice for the meeting at which final action is to be taken; and provided further, that a notice of the action of the Council shall be filed with the secretary of the School Committee at least three days before the regular meeting of the School Committee next following the meeting of the Council at which such action may have been taken, provided that no such amendment or repeal of

the by-laws shall become effective until such amendment or repeal has been approved and adopted by the School Committee. The amendment or repeal of these by-laws may be proposed by the School Committee to the Teachers' Council by a vote of the School Committee taken at a regular meeting, provided that due notice of such proposed action shall have been given at the regular meeting of the School Committee immediately preceding.

The first Council was elected last June with the following personnel: Miss Nelson, Mr. Williams, Mr. Searles, Mr. Marvell and Mr. Dorman of the high school, Miss Fish, Miss Bennett, Miss Delaney, Miss Murphy, Miss Gartland, Miss Hathaway, Miss Jenney, Miss Austin, Mrs. Cole, Miss Knight and Mr. Campbell of the elementary schools, Miss Bedlow of the supervisors and Miss Stuart and myself ex-officiis. The officers are Mr. Williams, president, Miss Bedlow, vice-president, Miss Nelson, secretary. At its meetings plans for improving teachers in the service have been discussed in addition to questions of policy submitted by the superintendent and others. This official link between the Board and the teachers will prove most helpful in administering the work of the department.

TEACHERS' ASSOCIATION.

The New Bedford Teachers' Association now has over five hundred members and is quietly carrying on a campaign for professional uplift. At the December meeting six of those teachers who had attended summer school, gave papers on the studies which they had pursued and gave the results of their application in class room work. All six of the papers were most interesting, and I am sure that the spirit of friendly suggestion and willingness to pass on experiences will prove most helpful. The meeting was followed by a dinner in the lunch room, after which a social hour was enjoyed in the gymnasium. The present plans call for one such meeting each month.

INSTRUMENTAL MUSIC.

In April the High School Orchestra and the School Band gave a concert at the Framingham meeting of the Massachusetts school superintendents. This program was at the request of Commissioner Payson Smith, who had heard our Saturday morning orchestra and was desirous of extending the work through the state. A short address explaining the origin and progress of the movement preceded the concert. The organizations never appeared to better advantage and the audience received our girls and boys enthusiastically. The following letters are self-explanatory:

I want to express to you and, through you, to the School Committee of New Bedford my very deep appreciation of the cooperation which made it possible for the superintendents of schools of Massachusetts to hear the school band and orchestra of New Bedford.

I know it was the unanimous opinion of the superintendents that the exhibition was probably the best ever presented by any school orchestra in this state. I was profoundly impressed with the excellence of the performance and I could not help thinking of the constantly extending influence throughout New Bedford and the community at large of the instruction whose results we had opportunity to observe. I am confident that the concert given by your pupils will create a very great interest in the extension of similar work in other cities of the Commonwealth.

(Signed) PAYSON SMITH,
Commissioner of Education.

I have thought a dozen times since the Convention that I ought to drop a line to you and tell you what so many other people have told you, that the music furnished by the New Bedford Band and Orchestra was inspiring indeed. Personally I had no idea that a schoolboy performance could be of such high grade. I think you know that the school men appreciated the music very much indeed. I certainly did and I send you this line to tell you so.

(Signed) JOHN J. MAHONEY,
State Supervisor of Americanization.

I am very hopeful as the result of the splendid report that I was able to give of the fine concert given by your school at the Superintendents' Conference in Framingham, to add an additional music teacher to our public schools. I wish to congratulate you most heartily on your fine musical organization. You no doubt

did the State of Massachusetts a fine service in bringing the organization to Framingham. You have set a pace which will be hard for the rest of us to follow, but like the old man driving his mule through town, on observing the sign "Speed limit, 8 miles per hour" said "Come on old boy, we may not be able to make it, but we will try."

(Signed) HARVEY S. GRUVER,
Superintendent of Schools,
Worcester, Mass.

(Worcester has had a supervisor of instrumental music since September.)

SALARIES.

The last increase in salary which was granted to the employees of the department and which took effect May first was most generous, and New Bedford is now one of the leading cities of the state in recognizing the value of the teachers' work in the community. I feel that our teachers realize that this action by the School Committee places an additional responsibility on them and that they intend to prove by their devotion to their calling that they are in every way deserving of the confidence which the public has in them and in their work.

COURSE OF STUDY.

Our whole corps of teachers, through various committees, is now engaged in a revision of our course of study and we hope that the result of their work will give us one of the best courses of study that New Bedford has ever had. The revision will of necessity take more time than the former method of arranging a course but it will be the direct outgrowth of the best in the experience of our teachers in actual contact with local conditions and will be well worth all the time it takes.

NEW BUILDINGS.

We hope to occupy the new Emery Street school building in February and thus relieve some of the part time classes in the south part of the city.

Contracts have been let for two new twenty-room buildings and a third will probably be let before this report is printed. Work on these buildings cannot be rushed too fast as we need additional room immediately. Both of the new twenty-room buildings are so planned that they may be used for community purposes independently. The plans for the Summer Street school provide for an independent hall with a stage suitable for the presentation of class plays and other forms of entertainment which require scenery. Plans are also being made for the remodeling of the Knowlton and Congdon schools for Junior High School purposes.

SCHOOL ACCOMMODATIONS.

Every city in the country finds itself short of school room as a result of the suspension of building public structures during the war. In New Bedford, owing to our rapid growth in population, we are far short of our actual requirements. So many of our newcomers are non-English speaking that an additional burden is placed upon our department, as we ought to have small classes for these new arrivals. Additional school rooms for special classes are also needed and I earnestly hope that the building program begun during the past year may be carried on until we have solved this problem successfully.

The next new building to be erected should replace the Dartmouth Street building and should contain not less than twenty rooms, occupying the whole square. The remodeling of the Congdon building for Junior High School purposes will necessitate making provision to house some of the children now in that building, and the Dartmouth Street site seems well located to take care of this problem and provide for the growth of that section of the city.

A central Junior High School building should be planned to be ready when the Knowlton and Congdon buildings are completed that the reorganization of the department may be made for the whole city at the same time.

The School Committee building should be further remodeled immediately. The department has trebled in size since the building was planned and we are no longer able to do the business required expeditiously in our cramped quarters.

CADET TEACHERS.

The present plan of admitting New Bedford young ladies to the teaching corps following one year of teaching experience after graduation from normal school is not satisfactory. Upon their graduation from normal school all seem to aim to get positions in the country schools nearby in order that they may live at home. This plan serves our neighbors admirably, but deprives us of the rich experience which comes from close supervision in a graded school system. The young teacher needs guidance and help, and plenty of it, and in order to gain this end I present the following plan for your consideration: New Bedford students who graduate from a recognized normal school and who have maintained an average B record during their course may be appointed as cadet teachers for one term at a salary at the rate of seven hundred and fifty dollars per annum. If their work warrants it they may be elected for an additional term at the same rate of pay. The cadet teachers shall work under the direction of a helping teacher who shall receive in addition to her regular stipend salary at the rate of two hundred dollars per annum, each of said teachers to have charge of two cadets and be responsible for the discipline and instruction of the rooms in which the cadets are placed. I believe that the plan outlined above will give us better teachers than the present plan, and our new teachers will go to their first assignments with a much broader training and better understanding of what is expected of them in New Bedford.

RECOMMENDATIONS.

I would respectfully recommend:

1. That the plan of appointing "Cadet Teachers" be given a trial during the coming year.

2. That the School Committee rooms be remodeled to provide additional office and storage room.

3. That the City Council be requested to provide:

A new central building for Junior High School purposes.

A new twenty-room building on an enlarged site to replace the Dartmouth Street building.

A special appropriation with which to complete the installation of adjustable furniture and slate blackboards in all school buildings.

The British Labor Party, in its simple, practical, but exalted demand for a program of education which shall "bring effectively within the reach not only of every boy and girl, but also of every adult citizen, all the training, physical, mental and moral, literary, technical and scientific, of which he is capable", sets an objective worthy of our best efforts.

New Bedford, through the elementary and high schools, the special classes, the vocational school, the continuation schools, the evening schools, and the so-called Americanization classes, is generously trying to effect this aim. The Public Library and all the semi-public organizations of our city are co-operating in every way possible and yet we have but made a beginning. Our task is a large one and progress must of necessity be slow. The campaign of publicity with effective follow-up work which has been inaugurated has met with such promising results that we are hopeful of much more progress during the coming year.

Respectfully submitted,

ALLEN P. KEITH.

Report of the Assistant Superintendent.

Mr. Allen P. Keith, Superintendent of Schools:

Dear Sir:—In accordance with your request I herewith present the annual report of the assistant superintendent of schools for the year 1920.

The special features of the work of the year have been the survey of some of the work of Grade 4B begun in January, 1920, and the revision of the course of study begun in the following September. The task of examining the pupils' papers and tabulating the results of the survey met with many interruptions. Not only did it share in the break in school work which was felt in many classes by the return of the influenza in February and March but the opportunity for a revision of the course of study, the supply of the present edition being exhausted, has deferred the completion of the report on the survey. While this second visit of the influenza did not disturb the city to the extent produced by the epidemic of 1918, yet the school nurses and principals in some sections have called attention to the fact that a large number of teachers and children were attacked this year. Several schools report that the effects of this second outbreak were very noticeable in the lists for promotion in June.

A SURVEY IN GRADE 4B.

A few weeks before the pupils of Grade 4B were promoted to the grammar grades a written test was given to the

pupils in this grade. The purpose of the test was not so much an examination into the knowledge acquired in the primary grades (though this was also included) as it was an attempt to measure the pupils' ability to think for themselves in following directions, to recall and to apply work learned in earlier grades, to interpret knowledge taught in the present grade, and an attempt to measure the habits in health posture, self-direction, and self-control which had been formed in the primary grades. Since ability and habit along these lines are not the work of any one term acquisition would be influenced largely by the extent to which the principals of the schools had maintained good standards in each grade and had secured co-ordination between the grades.

Tests of this nature are no new thing in our schools, and no year passes without seeing some grade tested along the lines of intelligence, technical accuracy and knowledge of subject-matter, and each year shows the influence of these tests upon the teachers' interpretation of the course of study and upon their standards of requirement in intelligence and self-effort from their pupils. These requirements are based upon the principle that while demands cannot create intelligence, which is an endowment of nature born with the individual, yet intelligence, like other capacities, tends to increase with use and tends to atrophy when unused, and the child's intelligence is developed by furnishing him an opportunity to use it and a motive for using it.

This year's papers show a marked gain in the pupil's ability to apply intelligently the directions which form a part of this test and of similar tests given three years ago. This year's survey was more searching and much wider in scope than any previously used in our schools. While the pupils saw merely simple directions and requirements aimed to test their knowledge of the subject-matter and the technical work of the grade, these questions and directions provided a test of intelligence and also furnished an opportunity for the observer

to measure the pupils' habits of self-direction and self-control. Before the examinations were given the tests for intelligence were submitted to the state examiners in charge of the mental clinics held here each month, and were endorsed by them as being well adapted to the purpose of testing the intelligence of children through their response in following directions and in interpretation. The questions were also arranged in a manner to disclose any tendency to depend upon a neighbor or to copy another pupil's work, each child being given a set of questions differing from his neighbor's, and each set of questions requiring individual work along the same lines throughout the class.

Marked differences in conditions are to be found in the different sections of the city and in tabulating the results of the survey classes were sometimes grouped according to recognized differences in conditions in order to note whether these exerted a constant influence upon the schools in each group. But these differing conditions produced no discernible difference in results. Classes with high marks and classes with low marks were found in each group, whether composed of children of foreign parentage or of children of native birth, children who had attended half-time classes in lower grades or those who had attended full time. Social and industrial conditions of homes, average age of pupils, whatever the divergencies between groups, it was apparent that these conditions had not uniformly affected results.

The lines of investigation included training in habits, training in intelligence, training in technical accuracy in written language, and training in knowledge of subject-matter. In training in habits, as in other training, ample allowance must be made for the nature of childhood. The child who attains an average of 80% in good habits is as praiseworthy as the one who attains 80% in knowledge, and these habits are equally necessary and may be even more conducive to good citizenship than is knowledge of subject-matter. The child who fails in conduct or habits unless prompted by the teacher is as low in

attainment as are those who must be prompted in knowledge to the same extent. Sometimes we rigidly hold our pupils responsible for accurate responses regarding subject-matter while we assume the entire responsibility for the discipline of the class, forgetting that the good citizen controls his acts not because he is compelled to do so by those in authority but because he wishes to do right and is able to control his own conduct. Control by the teacher and even punishment may be needed to make the pupil realize his responsibility for his own conduct, but it is evident that he is not being trained for citizenship unless he is given the opportunity to practice self-control under the helpful influences which should hedge his inexperience while allowing him the necessary freedom. It is equally evident that the pupil's health habits must be under his own control until they become automatic and that when we secure good posture only while the teacher is watching, suggesting, and prodding we have done very little toward fitting the pupil to conserve his health.

In the survey habits of self-control were tested by requesting principals and teachers to remain mere spectators throughout the exercise, refraining from even the slightest hint concerning conduct or work in order to give the pupils an opportunity to show how far self-control had become habitual, and to what extent pupils were still leaning upon the teacher for guidance and control. As far as these results have been tabulated they have been arranged in the form of graphs. Those which accompany this report (Fig. 1, 2, 3) measure the pupils' health habits in posture during the written test. Figure 1 gives the result of an attempt to answer the following questions:—*To what extent have good habits been formed? To what extent does fatigue affect posture in written work? May children be expected to lose good posture after they have been writing for some time?* The term *good posture* was interpreted as a writing position which is easy, natural, comfortable, and hygienic. It should guard against tension, eye-strain, curvature of the spine, impeded circulation and a hollow

chest, and at the same time should assist in securing good results in penmanship.

Figure 1 represents one-half of the classes taking the examination. In each group the enclosed white space represents the average percentage of good posture during a short measured period beginning five minutes after the signal for work was given. The parallel shaded space records the average percentage of good posture in the same class during an equally short period ending thirty minutes after the class began to write. The recorder noticed that in several classes the children were so interested in the test that they began the work without thought for posture, but habit asserted itself as the work went on and the second period found the pupils in hygienic positions. (Fig. 1, I, II). Other classes began with such conscious effort to secure good posture that some relaxation naturally followed before the end of the exercise. (Fig. 1, III). A few showed the effects of teacher-control and the neglect of training in individual responsibility and formation of habits of self-direction and control (Fig. 1, VII, X). The shaded columns recording the percentage of good postures at the end of a half-hour of written work do not indicate any general falling away from good posture which might be attributed to fatigue.

Having answered the questions concerning fatigue the next six classes were measured in order to answer a question which was frequently asked by the principals of these schools measured first, i. e., *Percentages of good posture have been given but to what extent were the other postures bad? Were they fair or poor or very poor?* These six schools are represented in Fig. 2, and the gradings, *excellent, good, fair, poor, very poor* are indicated by letters. *Fair* indicates pupils whose postures were faulty along some of the lines tested. *Poor* represents the pupils who made little or no effort to conserve health through posture and who were sitting in positions which were injurious to health, and *very poor* indicates a greater

HABITS - HYGIENIC POSTURE

Fig. 3

degree of injurious posture. To some extent these extreme cases might be due to the withdrawal of teacher-control during the test and might not indicate habitual practice, but they indicate absence of training to which the pupils are entitled.

Figure 3 attempts to answer the question, *In what respects were the poor positions injurious to the pupils' health?* The five schools represented here were measured along the lines of *tension* caused by failure to maintain an easy, comfortable, natural position, *wrong angle of vision* resulting from failure to place the work directly in front of the eyes, *impeded circulation* produced by feet drawn far back, head bent forward, etc., *hollow chest* due to rounded back and rounded shoulders, and *curvature of the spine* produced by allowing the left fore-arm to extend farther up on the desk than the right fore-arm or to drop below the desk at the left side, in each case throwing the shoulders out of level and curving the spine. The absence of tension was so general that this point is not included in the graph.

Graphs to represent the results in intelligence, technical accuracy, and a knowledge of subject-matter are being prepared and other valuable data still remain to be tabulated. This survey has been supplemented with other measurements taken during the year by the grade supervisor and the assistant superintendent and a full report of these with the graphs which they furnish would make a pamphlet well worth our study.

INCREASE IN SALARIES.

The large but deserved increase in salaries granted during the year cannot fail to strengthen the work of the schools. This does not mean that the consecrated, efficient teacher who has given her best effort regardless of meagre financial recognition should earn the increase in salary by increased effort. In many cases greater effort is beyond what is humanly due from her, and sometimes beyond her reasonable ability since

she has already given her best efforts. No doubt the lessened financial strain and relief from nervous tension which the increase in salary brings and the added peace of mind produced by this recognition of the value of her work creates a condition, an atmosphere, which in itself is conducive to better work on the part of every teacher, but the chief effect of the increase in salary is felt when vacant positions are to be filled. The larger salary enables the department to attract better trained and more experienced teachers to fill these vacancies, and so helps to eliminate poor teaching at its source, i. e., the poorly equipped teacher.

THE COURSE OF STUDY.

During the fall term no little intensive work on the revision of the course of study has been accomplished. Teachers and principals have reviewed the present course to discover the changes needed to adapt it more closely to present day aims and have sent in many valuable suggestions with reasons for their adoption. Committees of teachers in each grade have been nominated by the teachers of the grade and these have been appointed. The results of the work of the committees will be reviewed by the standing committees before being sent to the supervisors and superintendent. The final revision will be based to a large extent upon the suggestions of the grade teachers, principals, and committees, the aim being to make the work even more democratic than has been the case in former revisions. As teachers have had an active voice in the revisions of the past, fewer changes have been suggested than would be the case if this were the first time that their influence had been felt in shaping the course.

PROGRESS.

The logical outcome of the administration's practice of sharing responsibility with teachers and principals and of advocating and illustrating methods which develop motivation

and initiative, is a corps of teachers who are not only loyal, intelligent workers efficiently carrying out the plans presented to them but who are rapidly coming to the front as leaders themselves. Recent years have seen a noticeable growth in interest along the lines of new educational movements in the corps and each year finds an increasing number of teachers taking summer courses at the universities, forming winter classes for study, organizing clubs for mutual help or meeting in grade groups for the discussion of common problems, and freely taking part in teaching exercises and other activities presented by the Teachers' Association. This interest has led to the development of initiative in the schoolroom and, in the grammar grades especially, to the wider freedom of the socialized recitation. Within the past few months I have been invited to observe this form of recitation in four eighth-grade classes in the city. These recitations were conducted entirely by the pupils, in some classes with a careful observance of the rules of parliamentary procedure and in some with an absence of all formality. In each class the recitation was marked by an intelligent interest, an earnestness of purpose, a distribution of self-directed effort, and a breadth in scope of knowledge which are seldom reached in a teacher-conducted recitation. Good work is also being done in some of the lower grammar grades, but the greater maturity of the pupils' minds in the higher grades tends to make its introduction there more profitable than with much younger children. Yet in these lower grades the method has furnished a better preparation for citizenship than the same teachers had secured under the plan of teacher-directed formal recitation. Not all teachers have had the courage to try the plan, and it is well that it should not be attempted unless a teacher sees its objectives so clearly and can motivate her pupils so wisely that the results of her attempts to socialize the recitation are not merely the exchange of a teacher-controlled exercise for a pupil-controlled exercise with only the gain of a little passing interest to offset the increased narrowness of the leader's outlook and experience and the still more mechanical form of the recitation.

CONCLUSION.

We should not stand too near when estimating progress along the various lines touched upon in this report. When we take the long look the elevated areas of successful accomplishment appear to subside and level up the depressed areas of weakness, and the general trend of the movement becomes apparent. This long look leads us to think we are moving in the right direction and we may trust the rate of progress to the spirit of growth and of service found in our schools.

Respectfully submitted,

JOSEPHINE B. STUART.

Report of Principal of High School.

Mr. Allen P. Keith, Superintendent of Schools:

Dear Sir:—I submit my report for the year 1919-20. As the total enrollment of the High School during the past few years and the success or failure of the longer school day were subjects of so much discussion last spring I believe it is unnecessary to repeat or to review the substance of those discussions in this report.

I have stated in my previous reports the reasons for the decrease of the enrollment in the High School. The reasons I gave, I believe, were the real reasons for the decreased enrollment. The change in the economic conditions in New Bedford, and the sudden change in the High School enrollment corresponding with the economic conditions, should convince intelligent, fair-minded people that the reasons given by me were sound. The total enrollment this year will show one of the largest increases in the history of the school.

I believe I can safely predict that with the change from war conditions to peace conditions the New Bedford High School will grow more rapidly during the next few years than it has during any time in its history. From 1911 to 1916 this High School was one of the most rapidly growing schools in New England. I believe that after 1920 it will grow very rapidly again.

In order to refresh our memories regarding the enrollment in the High School I give the official figures for the past thirty years:

	Total Enrollment in High School	Population of City of New Bedford
1890	477	40,705
1895	500	55,251
1900	524	62,442
1901	462	
1902	477	
1903	492	
1904	454	
1905	434	74,321
1906	428	
1907	461	
1908	471	
1909	539	
1910	541	96,652
1911	635	
1912	706	
1913	816	
1914	1,007	
1915	1,144	109,462
1916	1,271	
1917	1,357	
1918	1,255	
1919	1,035	
1920	1,016	121,217

I call attention again to the pressing need of a girls' gymnasium. It is impossible to conduct efficiently classes in physical training for boys and girls and company drills for the R. O. T. C. in one gymnasium.

I submit the usual statistics for the year without further comment. I intend at the end of this school year to present a supplementary report on the work of the entire school.

G. WALTER WILLIAMS.

Report of Principal of Evening High School.

Mr. Allen P. Keith, Superintendent of Schools:

Dear Sir:—I respectfully submit the following report of the Evening High School for the year 1919-1920:

Registration for the school was held on the evenings of September 29, 30, and October 1. The enrollment was small as compared with the three years directly preceding, but further registrations during the first week of the regular session brought the attendance up to a point where classes in all the regular subjects were formed. The school opened on the evening of October 6 and continued with an unbroken session for eleven weeks, three evenings each week, until December 18, when the Christmas recess intervened. Opening again on January 8 it completed the full sixty nights of the session, closing on March 9. At this time no class was large enough to warrant an extension of the session and the year was brought to a close.

The total enrollment for the session was 386, which was 65 less than the preceding year. The outstanding feature of the decrease in attendance is the fact that while the preceding year showed a decrease in attendance entirely on the part of the boys, this year's record shows just the reverse—a decrease on the part of the girls only. The enrollment of boys increased by 8, while that of the girls decreased by 73. There seems to be no real basic reason for this sudden change. The continued high wages paid employees outside of office work probably accounts for the smaller number of pupils who elect to study for office or civil service positions and schools prepar-

ing for this line of work will feel the effects until wages are more nearly equalized. The average membership for the session was 143.2, only twenty less than the preceding year, and the average attendance was 110.3, only sixteen less. These figures show a much better attendance record for the pupils enrolled than the preceding year's figures. The majority of pupils who attended came for real business.

Classes were held and continued throughout the session in the following subjects: Typewriting, Penmanship, Arithmetic, French, Spanish, Mathematics, Bookkeeping, both elementary and advanced, Civil Service, both elementary and advanced, and Accounting. As in preceding years the gymnasium class for women was held two nights each week in the school gymnasium. The number of applicants for this class was so large that it was necessary to divide the class—each division meeting one night per week. Under the able leadership of Miss Elva Parker these classes accomplished splendid results and held a large attendance to the end of the session. The attendance record of these classes is not, however, included in the regular evening school record. While the attendance in none of the regular classes was large, it was fairly well maintained and it was not necessary to drop any class because of lack of pupils.

The inducements offered by the Evening High School to the citizens of New Bedford are many and valuable. It is regrettable that more do not take advantage of them. At the present time education seems to have a decidedly low financial value placed upon it, when compared with many of the manual trades, but education is the basis of the high grade of citizenship we are all seeking and in time it will come into its own. I sincerely hope the citizens of this city will, in the years ahead, take more and more advantage of the free education offered in the Evening High School.

Respectfully submitted,

A. R. DORMAN.

Report of Supervisor of Drawing.

Mr. Allen P. Keith, Superintendent of Schools:

Dear Sir:—Herewith is submitted a report of the work of the Drawing Department for the year 1920.

The drawing course is planned about three centres—home, school, the community. The subject matter is planned to correlate as much as possible with other studies. In primary grades the work is mainly illustrative and constructive, being to a great extent built around the general course of study and it is expected that teachers will co-operate by making use of illustration and construction wherever they may be useful. Certain principles of design and representation must be taught and it is necessary to have a course of study as a foundation, but the course is made flexible so that it may correlate with projects which teachers and children may desire to work out. In an able paper read at the Progress Meeting of the Teachers' Association was quoted,—“When the vital situation comes in at the door throw the course of study out of the window.” Yes, but the course of study in handwork may turn itself into an active assistant to the project in hand. The principles to be taught are few and simple, such as children may comprehend and apply, whether it be to objectify their work in language or geography, in costuming a school play or planning a poster to advertise it. In grammar grades principles of design and representation are more specifically studied and the reading and making of working drawings. The High School with its better

facilities for special work takes crafts and more advanced drawing—freehand and mechanical—and color.

The idea of co-operation is kept in mind. When the community at large was invited to take interest in a greater use of books and reading in the home and in "better speech" the school children made posters illustrating Children's Book Week and the advantage of owning books, and Better Speech Week urging the use of good English. Some of these posters showed much ingenuity and originality as well as careful drawing. Of course the Pilgrim Tercentenary has been much in our thoughts and the Pilgrim story has been a fruitful subject for illustration. Miss Gartland's interesting *New Bedford's Story for New Bedford's Children* should furnish good material for illustration. At the close of the spring term the graduating class at Parker Street School held a sale of toys and other articles made by the pupils, the proceeds of which went towards the purchase of a victrola cabinet and records for the school. Dolls made at the Harrington School were sent to children at the hospital. In the school buildings in which there are community centres pupils have lettered signs and have made some posters for the community entertainments. Several High School students sent designs for textiles to the Women's Wear competition.

Primary classes in their work in language and in Americanization have been making collections of pictures which they mount in charts and albums. These are made up from material gathered by the children and arranged by them, which is quite a different proposition from what it would be if the teacher prepared the material. When in use the charts are placed on the wall and while their purpose is use rather than beauty, yet a little care in their arrangement may be a means of increasing their usefulness.

"Beauty is visual comfort", said Mr. Eggers of Chicago Art Institute at the meeting of the National Council of Education, "The ground for giving special attention to visual com-

fort is that as a rule the eye cannot choose but see." We need not touch, we can refrain from tasting, we may even shut out sound, but unless we would walk through life blindfold we must see. As the muscles pull the eye this way and that as we wish to focus upon objects according to the ease with which the eye moves along it do we find the line pleasing: good spacing allows the eye to pass comfortably over the surface without sensation of crowding or confusion and well-planned margins make for eye comfort. In the children's drawings we consider placing, spacing and margins. Thought of these is not beyond their capability in preparing the charts and albums. If rightly guided there need be no lack of spontaneity on the children's part. If comfortable conditions aid to good work "visual comfort" should bring a gain in efficiency.

In the part time classes drawing suffers, but the supervisors make extra visits when possible and the teachers of the classes give lessons when time permits in order that the children may not fall behind others of their grade.

In the past few years the character of the drawing work has been tending more and more to the constructive and in the coming year this tendency will undoubtedly increase. There is need of other kinds of constructive material besides the paper which we have to use at present. We continue to look forward to the opening of Junior High Schools when differentiation of work for girls and boys will permit finer correlation with the interests of home, school and community.

Respectfully submitted,

LUCY C. BEDLOW.

Report of Supervisor of Vocal Music.

Mr. Allen P. Keith, Superintendent of Schools:

Dear Sir:—I take pleasure in submitting to you a report of the year's progress in this department, as well as some recommendations for the further development of this branch of the school system.

Notwithstanding the limited time allotted for vocal music in our curriculum, I am able to report fair progress.

In the Primary and Grammar Grades, we have succeeded in improving tone-quality to a satisfactory degree, but, under the existing conditions, we have been unable to make very great progress in sight-reading. We are also striving to cultivate the love for good music and find that the children are responding to our efforts in a most gratifying manner.

Last year, two concerts for young people were given at the High School Auditorium, by this department. Two hundred pupils of the upper grammar grades furnished the choral music and impartial critics agreed that their work was most remarkable for interpretation and tone-quality. In respect to the above mentioned concerts, I am glad to say that very few cities in this country are doing what we are doing for the better appreciation of music during school age.

I have examined this year over one thousand changing voices. The boy with the changing voice is a constant problem, and a most important one. His future singing and speaking voice depends upon the course taken during the changing

period. In our schools, each voice is examined carefully by me and advice given to the teacher as well as to the pupil. This work necessitates a great deal of time, but it is already bearing fruit. It is certain that it will mean more and better men's voices in the future.

The introduction of Music Appreciation Courses at the High School, last year, has proven to be a success. This year the classes are about twice as large as last year, and the interest is keen. The best of music is used in connection with our studies and it is pleasing to note that the pupils enjoy it greatly.

The Girls' Glee Club is also the largest in the school's history, as it now numbers over seventy voices. I have tried to form a Boys' Glee Club, but with no success to the present time. The boys have so many other activities that it has been impossible to organize them. I hope that it may soon be possible to give them the opportunity, for many would like it.

Music is now recognized as a most important school subject in this country. Cities are realizing the wonderful influence of the greatest of all arts, and I am hoping that we may be rated amongst the foremost in this branch. But to continue our work towards that goal, it is necessary that consideration be given to the following recommendations, which I am making with the sole motive of giving of our best to the children of our schools.

1. More time should be allowed to music in Primary and Grammar Grades. The present allowance of sixty minutes is not sufficient for the proper development of this subject. Ninety minutes would not be too much.

2. Music is an art which cannot be taught by unmusical persons. It should be taught by "musical" teachers who have the ability to teach the subject. In the past, teachers who admitted that they could hardly recognize one tone from another have been expected to teach music. This can be reme-

died by selecting a few of the best qualified teachers in each school to teach this subject in their building.

3. New text books are needed in the fourth, fifth, sixth and seventh grades. The present text books are inadequate for our work. They do not permit the arrangement of a practical program, and the range of the songs they contain is most injurious to the children's voices. There is urgent need of a change here.

4. I would also recommend credit towards graduation for all High School pupils who study music with some reputable private teacher. This would also be a decided advantage to those who wish to take up music as a profession. With the present requirements it is very hard for pupils to continue successfully their musical studies during High School age, and I recommend most heartily a credit which would permit them to substitute music for one of the present subjects.

Finally, I am voicing the sentiments of this department, in assuring our teachers of our deepest appreciation for their splendid co-operation. It has been the most inspiring and encouraging feature of our work.

With profound regards, I beg to remain,

Respectfully yours,

RODOLPHE GODREAU.

Report of Grade Supervisor of Physical Training.

Mr. Allen P. Keith, Superintendent of Schools:

Dear Sir:—As requested I submit the following report of the work of the Physical Training Department.

With the additional time made possible by having an assistant, all classes are now receiving a full period of time every four weeks. Heretofore, the classes in some schools have received too short a period of supervision. Both teachers and pupils are now benefitting by the additional time.

On Saturday afternoon, May 15, 1920, a demonstration of the work was given in the High School Gymnasium. Every school and every grade was represented in this demonstration. The regular work required in the course was represented.

Twenty-seven dances were shown by different classes, one of which was an ungraded class. The kindergarten class from the William H. Taylor School led by their teacher, gave eight rhythmic action plays and dances. This was the first time the kindergarten work had been included in the demonstration. I should like to make mention of the waltz given by the 8A pupils from the Hosea M. Knowlton School. The waltz is the most difficult dance to do correctly. The boys and girls danced together, as they do in their school hall. Apart from the regular work the children from the first grade at the Cedar Street School danced a minuet.

Corrective and preventative exercises were demonstrated by the first and eighth grades. Educational gymnastics were

shown by the Congdon School. A boy from the Rodman School led classes from three schools in demonstrating Pupil Leadership.

The demonstration of the organized recess work by the Harrington School gave to some teachers their first insight into the work. Some time in June, the school demonstrated this work on their own playground to the principals of the primary and mixed schools. A discussion of its problems and advantages followed. I believe everyone left the meeting feeling that organized recess should be a part of the school curriculum.

Organized recess does not mean supervising the play of the child. The children are taught games to be played with different kinds of apparatus, and then they are allowed to choose the game they wish to play. The teacher is there to help when help is needed. I have had no reports of children who do not like the organized play. It is taken during the morning recess, as many times a week as it seems advisable to the principals. If one happens to be in the neighborhood of a school building during recess, he cannot doubt the joy and exercise derived from such a period. Many interested spectators gather, and generally enter into the spirit, often cheering with the children during a close contest.

If one happens to be in the neighborhood of a school building during recess, he cannot doubt the joy and exercise derived from such a period. Many interested spectators gather, and generally enter into the spirit, often cheering with the children during a close contest.

In some yards ten different games are being played at the same time. Each class has its assigned section of the playground. Interclass contests excite keen interest among the children. The time goes by too quickly, and in the midst of winning or losing, the whistle blows. The instant silence makes one marvel at the response of children so young. Then by the whistle, they are quickly called into lines where they

are put through setting up exercises. Through these exercises the excitement of the game is left in the yard and by the time they have reached the school room they are ready physically and mentally for the class work.

Indirectly and directly, this work has been a great help to the children. The retiring child has been encouraged to play vigorously and natural leaders have an opportunity to share their leadership with others. Many reports have been received of its direct effect upon the classroom work. The first came from the Harrington School. A child there who had always been backward in school work, who had repeated several grades, and never seemed to find any of the pleasures which most children enjoy in school, found himself through a little rope quoit. His ability to throw quoits was remarkable and he was soon looked upon by his classmates as a champion. Later it developed that his school work began to improve and all in all a new boy seemed to be growing. During a conversation with his teacher and principal over his marked change in spirit and interest in his work he said he thought it was because he was so interested in pitching quoits. He received his promotion without repeating the grade, whereas it had been necessary to repeat many of the previous grades. I have the permission of his teacher and principal to cite this little incident in the interest of organized recess work. Other parallel cases have been reported. I feel that we have accomplished a great deal in starting so successfully a movement with so wide and far-reaching results and influence.

The work should be carried on through the grammar grades, with one recess period a day, or at least two or three periods a week. In the grammar grades the course is complete as far as corrective exercises, recreative drills and folk-dances go; but, I believe something should be done for the boys and girls in the line of athletics. Interclass and possibly interschool contests might be held. Physical efficiency tests have many benefits and there is a big movement along this

line all over the country. I am working out a plan to try in one of the grammar schools later in the season.

A class for special work has been started in one of the schools. Groups of children with habitual bad posture have been selected for this class. They will meet twice a week after school for corrective exercises. The work will be in charge of a teacher in the school working under the direction of the supervisor. The children will also be given exercises to be taken at home. Classes of this sort will be organized in other schools as soon as possible.

The women's evening gym classes at the high school have continued with a larger average attendance than that of any previous year. Some of the women have scarcely missed a lesson during the three years. The classes draw from all sections of the city and the large attendance proves their appreciation of this opportunity.

Since my last report Miss Muriel Mayo, a graduate of the Posse Normal School of Gymnastics, has been appointed as assistant in the Physical Training Department. She reports earnest work and good results from the classes.

The physicians, nurses and Children's Aid Society continue to refer many special cases to me.

I wish to thank Miss Kate Moore, her teachers and pupils, for their part in making the organized recess work a success. Their presentation of the work was ideal. Let me also thank the teachers and pupils of the special classes for making the bean-bags for the games.

In closing I wish to express my appreciation of the co-operation of the teachers and principals.

Thank you, Mr Keith, for your many valuable suggestions and kindly advice.

Respectfully submitted,

ELVA M. PARKER.

Report of Director of Continuation Schools.

Mr. Allen P. Keith, Superintendent of Schools:

Dear Sir:—My report for the period ending December 31, 1920, follows.

The citizens of New Bedford at the State election November, 1919, accepted the act which provides for the establishment of schools for employed minors fourteen to sixteen years of age. While employed, these minors are required to attend school at least four hours each week. During unemployment the required attendance is at least twenty hours each week.

These schools, called compulsory continuation schools, are designed to perform the following functions:

1. To afford these minors an opportunity to continue their general education and become more intelligent citizens.
2. To help these minors to get the most out of their immediate employment; to prevent drifting in industry; to save time lost through unemployment.
3. To help these minors make more intelligent choice of occupation.
4. To establish co-operative relations between the employers and the schools.

In accordance with these provisions and aims New Bedford prepared last spring and summer to care for 2,000 girls

and boys. Homemaking courses in sewing and cookery have been laid out for the girls. Machine shop practice, wood working and electrical work have been offered to the boys. Civics, hygiene, English, mathematics and work related to shop courses have been given to all.

Pupils have come to this school with grade attainment ranging from the fourth in the elementary school to the first year of high school. As far as possible they have been assigned throughout the week as follows: Monday, fourth grade; Tuesday, fifth grade; Wednesday, grammar graduates; Thursday, sixth grade; Friday, seventh grade. Since these pupils are drawn from industry an effort has been made to distribute a given mill's employees equally throughout the week, taking about one-tenth of the number from a given factory at any one time.

Sessions of the school are held from 8 to 12 a. m. and from 1 to 5 p. m., so that a pupil attends his required four hours in one morning or one afternoon. He spends two hours in the shop and two hours in the classroom.

Each teacher instructs two hours in the morning, two hours in the afternoon, and spends two hours each day doing follow-up work. Follow-up work consists of visits to the pupils' homes and to places of employment. Thus the home, the employer and the school are brought into closer contact, and each pupil is considered in relation to his individual needs. The value of this follow-up work depends upon the ability of the teacher to interpret the significance of his observations, to see the child's needs and then to apply the proper instruction and influence.

What has been the attitude of the girls and boys towards this new type of school? In September pupils received cards notifying them when and where to report. These pupils, with very few exceptions, responded heartily to the call. Many of them expressed pleasure at being able to continue their educa-

tion; they liked the kind of school which they found awaiting them; they have aided in constructing their shops; they have been very patient when unavoidable delays in building and equipping have rendered temporary provisions necessary; some, at their own request, have been allowed to attend the school more than the required four hours per week; others have expressed a desire to attend the school after they become sixteen years of age; all have co-operated to make the school what it is today.

Without doubt the employers have been inconvenienced in adjusting themselves to the new conditions imposed upon those employing minors between fourteen and sixteen years of age. What has been their attitude? They have been glad to co-operate with the school authorities; many have opened wide their factories and welcomed our instructors into their midst that they might find wherein these pupils could be helped; overseers have indicated to teachers how these minors might receive promotion in their work; pupils have been promoted in industry through school instruction based on suggestions of the overseer; children out of work have secured employment through the combined efforts of overseer and teacher.

Teachers have been untiring in their efforts and have shown an excellent spirit in meeting the many obstacles and inconveniences incident to a new undertaking. Their work merits hearty commendation.

The school is greatly indebted to the School Committee, the Superintendent of Schools, the Inspector of School Property, the attendance department, and the office force for their generous contributions to its welfare.

Such co-operation as herein indicated cannot fail to produce an educational agency which will keep open the door of hope and opportunity to the young worker; a possible return to the conventional school; promotion in industry; an opportunity to become better citizens, possessing the ability to de-

rive a little more happiness out of this life and to help others
enjoy the same.

Respectfully submitted,

EDWARD T. N. SADLER.

ITEMS OF INFORMATION

The school is located at the corner of Cannon street and Acushnet avenue.

School sessions from 8.30 a. m. to 12 m., and from 12.45 p. m. to 4.15 p. m. There are no sessions on Saturday.

Office telephones are: Bell 2424; Automatic 1149. Shop telephone: Bell 573. Home Making Department 5441 Bell.

It is the practice of the school to notify the parents of pupils whose work is below the standard. If pupils continue to do poor work, the parents are advised to take them out of school.

The exhibition of work done by the pupils of the Evening Practical Arts Department was viewed by about 9000 people. The exhibition was held in the drill of the State Armory.

The music for this exhibition was furnished by the school orchestra under the direction of Clarence W. Arey.

At the present writing this is the only Vocational School in the State which has an orchestra, the personnel of which is made up entirely of Vocational students.

The enrollment of the Homemaking Department has increased about 100% since last year.

About 85 girls from the High School are taking advantage of the afternoon courses in sewing and millinery.

The percent of attendance for the month of December in the different departments was as follows: Machine, 97; Carpenter, 95; Power, 95.8; Homemaking, 86; Electrical, 94.4.

Among the products of the Carpenter Shop for the past year was a piano seat of red birch, six office desks, six cedar chests, bookcase for Public Library made of red birch, and a library table made of quartered oak.

For the first time in its history the school was represented by a girls' basketball team. Six games were played and three won.

The State Department of Education conducted two teacher-training classes in the school during the past season.

The new welding equipment added interest to the blacksmith work.

Under the direction of the Athletic Association class basketball was conducted during the winter months.

A complete trade record of each pupil is kept, showing the kinds of work done and the time spent on each. This record

is checked by the state, and by this method of supervision the boy is assured of a well balanced trade training.

Pupils are allowed the following number of hours lost time: First year, 60 hours; second, 50 hours; third, 40 hours; fourth, 30 hours. When the allowance for delinquences is exhausted, the pupil is expelled from school.

Penalties for disobedience, inattention and unsatisfactory work are fixed at the time the offense is committed.

Evening classes in Household Arts are held in 13 of the public schools, besides the Vocational School.

These 13 schools are so located as to divide the city into equal districts, each school serving as a centre for its own particular district.

Educational trips are taken by the boys in the different departments at some time during the year.

Residents of New Bedford may attend the school without charge. There is a tuition charge for pupils from surrounding towns, this expense being borne by the State and town from which the pupil comes.

POWER DEPARTMENT

Day School

The object of this Department is to train the boy so that he is familiar with the different types of apparatus used in a boiler room.

The instruction also prepares a boy to take the State examination for second class fireman.

On entering this department a boy is made assistant fireman. He is taught to make and keep a good fire, weigh and make a record of the amount of coal burned, ashes taken out, and volume of water evaporated. He learns to handle injectors, pumps, traps, and other necessary fire room apparatus, and to be accurate and reliable in his work. Thorough instruction in installing steam, gas and water pipes is also given in this department. Each boy is properly prepared for all the duties of an assistant fireman before the close of his second year.

The equipment of this department is divided into two groups: one group on operation and used for instruction, the other group used for instruction purposes only.

The fire group comprises a 90 H. P. vertical fire tube boiler, a 55 H. P. locomotive, with all the apparatus that boilers of these types have, a 15 K. W. Ideal direct connected unit, a 55 H. P. Producer gas engine, together with valves, traps, gauges, regulators, and so forth.

The second group, which is used for instruction purposes only, comprises a 15 H. P. vertical fire tube boiler, a 10 H. P. Watts-Campbell Corliss engine, and pumps, valves, and so forth.

Complete apparatus for testing flue gases, coal and oil has been added to the instruction equipment of this department.

Evening School

The work in this department is divided into four groups, each group taking care of different licenses. On enrolling in this department, the student tells what kind of work he is doing during the day and license held. From this information he is placed in a group from which he will derive the greatest benefit. The instruction in the different groups is carried on by means of questions and answers, supplemented by talks and explanations, by the instructor. These questions are taken from practical work and deal with practical, every-day problems, and are

revised from time to time, to meet the changing requirements and regulations: The students are invited to bring in for discussion problems that they meet during the day. This department is equipped with apparatus that has been sectioned, so that the internal workings of the machine may be readily studied by the student. For men who work nights, morning classes are conducted.

Plumbing

This course is divided into two units, one for helpers and one for journeymen.

The helpers' course is laid out so as to benefit beginners and others in the trade who have not received their State licenses. Part of the student's time is spent learning how to make the necessary trade sketches and answering questions, while the remainder is spent on practical work.

The advanced course deals with the more difficult operations of the trade, as well as the method of laying out work and figuring jobs.

DEPARTMENT OF RELATED WORK

Day School

This department teaches the technical subjects related to the several trades. These subjects are laid out in such form that they are allied very closely with the work the student is doing in the shop. Individual instruction is largely responsible for the remarkably good showing made by the students in their various subjects. Through no other method could we assimilate the large number of boys we do, whose previous education ended anywhere from the seventh grade up to high school grades.

Each trade requires different methods of applying all the well known principles, and this department teaches each student in each department that particular application that fits his special trade. Generalities in teaching related subjects such as mathematics, drawing, English, and so forth, are not productive of results, and for that reason we have special application of mathematics, drawing, and other kindred subjects, for the student in the Machine Department, special application of these studies for the student in the Electrical Department, in the Steam Department, and in the Carpentry Department.

The work in this department brings to the attention of the student the necessity of having a certain amount of specialized head work, to make him a more skillful worker with his hands.

Practical mathematics, beginning with the simplest form of fractions, and gradually working up to algebra and trigonometry as applied to shop work and shop problems, with a comprehensive course in formula work, shop mechanics, and strength of materials, comprises the work in this subject. The students in the Electrical Department are given direct and alternating current mathematics, together with the regular work.

The main object in the drawing course is not to make draftsmen, but to have the student realize a familiarity with the making and reading of drawings and blue-prints, a very necessary adjunct to his trade. We believe that the only way to teach a boy to read blue-prints correctly and easily, in the short time we have to train him, is to give him a good working knowledge of how shop drawings and blue-prints are made. With some of the advanced students, elementary work in designing is taken up, and some excellent drawings result.

English and civics hold an important place in the list of studies. The policy of the department tends toward furnishing the good tradesmen with a sufficient command of English to help when any chance of promotion in their trade offers itself. A good citizen is also of vital importance to the community, and our civics classes are carried on with that ideal as a goal.

MATHEMATICS

First year work is started in the elementary processes, as it has been found by careful observation that the student usually lacks the ability to apply them to his job. Fractions, decimals, ratio and proportion, square root, percentage, board measure, taper turning, and screw cutting, are taught in the first year classes.

Second year work consist of formula work, mensuration, shop geometry, metric system and special direct current mathematics for the electricians.

Third year work takes up elementary trigonometry, shop algebra, roof framing, stair building, applied steam mathematics, and special alternating current mathematics for the electricians.

In the fourth year a general review, with advanced algebra and applied shop trigonometry, with the strength of materials, is given.

DRAWING

First year drawing consists of lettering, free hand sketching, blue-printing, geometrical construction problems, and a complete study of projection. Special emphasis is laid on neatness during this year.

In the second year applied work in third angle projection is taken up, special attention being given to rough drafting and its relation to the finished drawing. After the foundation has been laid, each student branches out into the special drawing for his trade.

Third and fourth year students do all the finished drawings for the school, and takes up advanced work in mechanical movements, gears, cams, and so forth.

The design of a polishing machine, consisting of two heads and belt changing attachment, has been finished this year for a local shop. The machines are at present being manufactured in the Machine Department. A new design for the New Bedford Grinder, the school product, is being drawn up, and will be known as the New Bedford Grinder No. 4.

ENGLISH

First year English is devoted to the fundamental rules governing the use of language, word building, sentence construction, and shop report work.

Second year work consists of advanced continuation of first year's work, special attention being given to the introduction of a course in letter writing and technical report work, which is started during this year.

The work in third and fourth years is given over to the application of what has been already learned. This work is intended specifically to make the student able to acquit himself creditably, either in written or oral work.

CIVICS

A progressive course in civics starts in the first year, by giving the students an opportunity to see how bodies are governed, and they apply this knowledge in their own Athletic Association, which has an all-student directorate, under faculty supervision.

In the second, third and fourth years, a complete course in civil government is started. It is the aim of this course to make the boy a better citizen, to keep him conversant with up-to-date topics, to educate him to think for himself in matters politic, and to give him the highest possible standard to work towards when he leaves school. Open debate is carried on in the class room on all important topics, and the classes are addressed, from time to time, by men prominent in some branch of civic enterprise.

TRADE SCIENCE

The science of each trade is taught in the different departments as the student progresses in that department. This work covers the origin, uses, and so forth, of all materials used in their respective trades. The best methods of performing operations and standards that govern the work in each trade are also taken up.

By teaching the student the science of his trade, he becomes better fitted for efficient work earlier in his shop experience.

HYGIENE

Setting up exercises are given for twenty minutes each day, and all students are required to attend. This, together with the

school activities in athletics, gives the boy a chance to grow physically as well as mentally.

The school supports a well organized and strong athletic association, whose membership consists of all boys in all departments. Basketball and baseball are the two sports in which the school is represented.

(Note). A detailed outline of all the above studies may be obtained by applying at the school.

Evening School

The evening drawing classes are intended to help men already in the trade to become proficient in making readable shop sketches, and to teach them to read blue prints. To this end a certain amount of mechanical drawing is introduced, that in making a finished drawing, they may also read one.

Elementary and advanced mathematics are taught to tradesmen, who have found that their work called for the use of figures with which they were not familiar. These classes have been very successful.

Sheet metal drafting is given with excellent results.

Classes in advanced work in any of the above studies may be formed if sufficient number of journeymen apply.

CARPENTRY DEPARTMENT

Day School

The object of this department is to give the boys a good training in all branches of the carpenter trade.

The students are given shop talks by the instructors, teaching them the name and use of the various tools and how to sharpen and take proper care of them.

They are taught to know the different kinds of wood used, and why different kinds are used for different purposes. They are shown how a house is framed together, how and why different kinds of joints are used in different places, and the proportions of the frame to get the most strength and use the least lumber, how it is put together to have the least trouble from shrinking wood and opening of the joints.

How to board in, shingle and clapboard a house, and the various kinds of material used, how and why it is necessary to use flashing in valleys, around chimney, and various other places to make a house tight, and the different kinds of material used.

The various kinds of material for covering the outside of a house, also the outside finish for a house. The inside finish is described, and the best way to put it together is shown.

They are taught to lay out various kinds of work from a plan, also to lay out a pole or rod for various kinds of work. The first year boys are given simple work to teach them the use of the tools. As fast as they are able to use the tools they are given the better work to do, they are usually able to lay floors, set partitions, put up sheathing and upsom board, make simple cabinets, boxes, etc., and to help other students in more advanced work.

Second year boys are given more advanced work, putting up inside and outside finish, hanging and trimming doors, making lockers, cabinets, cases of drawers, etc. As fast as they seem reliable they are given work on the machines, are taught to lay out simple jobs from a plan, and are taught to make plans of simple work.

Third year boys are given still more advanced work. They are expected to be able to keep another boy at work with them. They are expected to make miter joints, intersect mouldings, etc., make hard wood cabinets, chests, bookcases, etc. The boy is

given a problem to draw a house, also the first two problems in roof framing to figure the lengths of the rafters and to lay them out and build the model of a roof to a scale. He is also given a problem to build a model of a flight of back stairs.

The fourth year boy makes plans of his work and lays it out and finishes his course in stair building, and roof framing.

During the year the boys have laid floors; finished a class room; built a garage; put up some board on the sides of the Electrical Department; built an oak table for the School Department; built a fence outside the school; a birch bookcase for the Public Library; benches, tables, lockers, etc., for the Community Center; paneled chests of oak and white wood lined with cedar; book ends, candle sticks, costume poles, etc.

The equipment of the department is thoroughly modern, and consists of a moulding machine, surface planner, buzz planer, hollow chisel mortiser, double head and cope tenoning machine, spindle shaper, band saw, swing and speed lathes.

Evening School

Two courses were conducted in this department during last season, one in general carpentry work and one in roof framing. The membership and attendance of both classes was better than in past seasons.

The course in general carpentry covered the use of tools and simple cabinet making. During the term 15 five panel door lockers for use in the day school were made, besides tool chests, tables and other simple cabinet work.

The roof framing course followed along the lines of other years, the men being instructed how to figure the length and bevels of rafters, the use of the steel square, and how to read plans.

MACHINE SHOP DEPARTMENT

Day School

The aim of this department is to give the student a practical all round training in his chosen trade. Those satisfactorily completing this course are rated as machinists and they have a better foundation for advancement than the chaps who served an apprenticeship in an outside shop, because those taking their machine training at this school not only acquire the knack of doing the different operations on the different machines, but they also get the mathematics, drawing and trade science which go with the machinist trade.

The system of trade training used in the department is modern, practical and efficient and has been praised highly by a large number of visitors and also by people from outside the city and State. A detailed outline of the system can be obtained at the school.

The boys are trained on real live projects which cover all the common machine operations and machines of the trade. The operations which are not covered by these machine projects are obtained from the shops of local manufacturers. No practice work is allowed in the department. All the boys' efforts go into a marketable machine or tool, which must pass a rigid inspection for size and finish. During the past year three fourth-year boys installed the shafting for the machines for a manufacturing plant in the city. They planned the layout and figured the diameter of the pulleys to obtain the required speed for the countershaft.

Part of the boy's training is to place him in an outside shop for two weeks in the year. This outside trade experience is beneficial to the manufacturer, as well as the boy, in that it gives him first hand information regarding the boy's capabilities. This outside experience helps the boy in that it gives him confidence in himself and the training he is receiving at school. The school would appreciate it greatly if more machine shops would co-operate and take students for a two week period.

Besides doing work for outside concerns, for which they pay commercial prices, the following projects are manufactured for commercial basis for the market and use in the school: The New Bedford Wood Lathe, the New Bedford No. 3 Grinder, the New Bedford No. 2 Grinder, 4½" Bench Vise, Drill Vise,

Planer Vise, Portable Light for garage work, 8" Bench Lathe and the New Bedford Fluting Machine.

Regarding work done for outside concerns, the school accepts only the kind that has the proper instruction value.

As the work and progress of each student is recorded fully, it would be a benefit to all concerned if, before hiring a student, the prospective employer would look up this record. These records are kept in such a way that it is possible to tell in a very short time the amount, quality and kind of work done.

The number of students in the department has increased considerably over last year and at present the department is filled to its capacity. The number of boys returning for second year work is the largest in the history of the department.

In order to carry on in a scientific manner the heat treatment of steel, a gas furnace completely equipped and a Bristol Pyrometer has been installed during the past season. A Waterhouse Welding equipment has also been added to the department.

The growth of this department during the past year is due in part to the citizens of the city realizing the splendid opportunities which are offered for a thorough training in the theory and practice of the machinist trade.

The system of trade training used in the department is modern, practical and efficient and has been praised highly by a large number of visitors and also by people from outside the city and State. A detailed outline of the system can be obtained at the school.

Evening School

This course appeals to the men in the machine shops who are ambitious to rise higher in the trade. Men who are classed as lathe hands come to the school for training on millers, planers or some other machine that they will learn to operate. It is very gratifying to know that a number of these men come back term after term, taking up new work or completing their unfinished work.

This course is laid out on a unit basis, each unit representing one type of a machine. An applicant for training chooses his own unit and is given work that he needs or desires. Employers could obtain valuable information by calling up the school when in need of an operator. A man that is ambitious enough to attend an evening school is a good man to have in the shop.

A record is kept of the kind of work the man does, the quality, and his attendance.

The instruction is all individual and the student progresses as fast as he absorbs the instructions given him.

EVENING AUTOMOBILE COURSE

This course is proving a success under our method of instruction. It is divided into four units—the Motor, Chassis, Ignition and Carburetor. The time spent in each unit is 20 weeks, the classes meeting twice a week for two hours at a time, making in all 80 hours. It is obvious that we cannot make automobile mechanics in that length of time, so the course is intended only to give men in the automobile trade a chance to study the automobile under the direction of practical instructors. The school has been very fortunate in obtaining the services of men high in the trade. It is with great satisfaction that we note that the men after completing one unit return the following term to take up another.

There has been added to the course a special class called the Ford Class. In this class the students work only on Ford cars, taking down the whole car. This has proved to be a very popular part of the course, and if we had more room we would like to have twice the number we now have.

We overhaul the cars of the citizens who can spare their car for 20 weeks, asking them to pay for the parts replaced only.

Speed and up-to-date methods are the watchwords of this class. The Ford service bulletins are used as a basis of instruction.

ELECTRICAL DEPARTMENT

Day School

It is the aim of this department to give the students a good foundation in the fundamental principles of applied electricity. They receive a thorough course in house and mill wiring, using all the different kinds of construction, such as conduit, knob and tube, metal and wooden raceways, switch installations, such as single, double, three way, four way, remote control and electrometers, bell and annunciator work. The student also receives motor and generator work covering construction, care, testing and installation. Instruction is given on batteries, auto ignition, telephones and switchboards.

Throughout the entire course the student is required to study the rules and regulations as set forth by the National Fire Underwriters.

All construction work is done from shop sketches or finished drawings made by the students. The boy who makes the drawing does not necessarily put up the work. This gives the students drill in reading someone else's drawing.

Besides the regular mathematics as given in the related department, a thorough course in magnetism, direct current mathematics and A. C. mathematics is given. Courses in D. C. and A. C. machinery are also given.

New equipment is being added from time to time, such as A. C. and D. C. meters, motors, telephones and batteries.

The only outside work done by this department is for the different city departments. It would be beneficial to the contractors, students and school, if the boys from this department were allowed to wire three or four houses each year. Some effort has been made along this line by the school, but as yet nothing definite has been decided upon.

Work done by the students must not only be electrically perfect, but must be mechanically right as well. If the work is not installed in the correct manner the boy is required to take it down and install it over again.

The students are urged to work in the trade during vacation as it helps them in practice and gives them confidence in themselves and the school, when they see from actual observance that they are able to do things as well as people much older in the trade than they are. The older students also find out for them-

selves that they have a better foundation in mathematics and theory than most tradesmen.

Among the jobs completed this past season was ampere and bell system at the Donaghy School. The telephone and bell system at the Parker Street School was completely overhauled and put in working order. The school's electric clock and program system was rewired. While this work was being done, the clocks and bells were kept in operation. Two 26 circuit panel boxes were made. The dressing houses at Buttonwood Park and Brooklawn Park were wired for lights. Telephones were installed in different departments of the school.

A record is kept for each student showing the kind, amount and quality of work done. This record is on file and the employers of students from this department are invited to consult it before hiring them.

Evening School

During the past season three courses were conducted in this department, one in house wiring, one in wireless telegraphy and one in electrical machinery.

The course in house wiring was so planned to meet the needs of persons just starting in the electrical trade and those who have been in it for some time but had not received their State license.

The wireless course was divided into two parts, one for beginners and one for advanced, who had had some wireless work. The aim of the course is to fit them for operators, and to be able to pass the required State exam for this work.

In the electrical machinery course the men took up the construction, care and operation of direct and alternating current machinery.

HOUSEHOLD ARTS DEPARTMENT

The courses given in the Household Arts Department are essentially for training in homemaking, but it is also the aim to give the girls some foundation for managerial work, such as tea room work, managing housekeeper's work, running a home bakery, or doing work in millinery and sewing for private parties or in stores.

Practical Subjects

Developing skill or ability to do the work or supervise it in the home, store, or wherever the girls may be placed.

Related Studies

Developing intelligence by finding out the reasons for methods employed, and by giving mastery of the elementary but constantly necessary processes in arithmetic and English. For instance, household accounts, bills, business letters, etc.

Cultural Studies

Developing the spirit of the homemaker and tact in working for other people.

The practical work in this department includes sewing, cooking and millinery.

The related work includes Textiles, Design, Physiology, Dietetics, Household Management and Science, Home Nursing, English and Arithmetic.

The cultural studies include Current Events, Citizenship, Reading, Hygiene, Physical Training and Music.

Cooking

The aim of the cooking course is to teach the principles of cookery and the practical application which may be worked out in the girl's home as well as in the school kitchen.

Since all of the food prepared is served at the noon-day luncheon at school or sold to outsiders, the girls exercise great care, thereby developing self-confidence and a keen sense of responsibility.

Much attention is given during the first year to bread-making and every year a bread contest is held when each girl makes a

loaf of bread entirely without supervision. The bread is judged by experts and a prize given for the best loaf.

Groups of first year girls prepare the students' luncheon which is served on trays, cafeteria style, every day. This luncheon is sold for from fifteen to twenty-five cents, depending on the amount of servings. About twenty-five to fifty trays are prepared each day. Some order cooking is done at the school, such as bread, rolls, cookies, etc.

A thorough study of foods and food values is taken up during the first two years.

The second year cookery course consists of the preparation of the teachers' luncheon every day. This is done almost exactly as the girl would prepare a meal in her own home. The kitchen where this work is done is arranged as nearly as possible like a home kitchen, and not more than four girls work there at the same time.

During the last half of the year each girl is given the definite responsibility of preparing the whole luncheon for a certain number of teachers. Twenty-six teachers are served each day. The girls do their planning, marketing and keep accounts for this luncheon.

During the third and fourth years, the girls are given some practice in more elaborate cookery. While we do not encourage this cookery in the homes, it is necessary for the girls to know something about it, in case they may be called upon to do it or to supervise it.

Some time is also given to tea-room management, suggestions as to equipment, service and business methods.

There is also a course in comparison and experimental cookery which brings more forcefully to the minds of the pupils the distinct connection between science and the kitchen.

Sewing

During the first year, the girls are taught the use and care of a sewing machine, the use of paper patterns, and to cut and make the following garments:

- | | |
|----------------------|-------------------|
| One set of underwear | One cotton dress |
| One middy blouse | Two baby garments |

In the second year sewing course the use of machine attachments and the use of power machines is taught. The required work for this year is:

Cotton dress	Graduation underwear	If girls are completing
Wool dress	Graduation dress	two years course only.
Man's shirt	Wool suit or coat	

The third and fourth year girls do more advanced work in dressmaking, including a good deal of handwork.

In addition to the making of new garments, each girl is required to do some work in the renovation and remodelling of old garments. This brings out certain principles, that the girls would not otherwise get, and is a very important feature of the course in sewing and dressmaking.

There is also a course in mending and darning which every girl is required to take.

Closely associated with the sewing course is the study of textiles. This includes the history and manufacture of different clothing materials, such as cotton, silk and wool, a knowledge of which enables the girls to select and buy cloth intelligently and economically.

Millinery

First Year:

Theory:

- History of millinery.
- Advantages of a milliner.
- Study of frames.
- Fitting the head.

Practical work:

- Renovation of winter hats, frames and materials.
- Making velvet hats and trimmings.
- Renovating of spring hats.
- Making straw hats and trimmings, including ribbon and crepe facings.

Second Year:

The same course is followed as in the first year, but more advanced work is done. Hats of fabric, satin and fur are made; also the renovation of fur muffs and neck pieces is taught.

After completing a two year course in millinery, the girl is fully equipped to go out as a milliner's assistant and after two seasons' experience in the store she should qualify as a milliner.

Design

The work done in the design classes consists of studying and applying the fundamental principles of art to every day life. This course correlates with the work done in the dress-making, millinery and domestic science classes and seeks to cultivate good taste and appreciation of beauty, whether the problem be the designing of a dress, the remodelling of a hat or the furnishing of a room.

Representation of stitches and scallops, planning of tucks, edgings and ruffles are discussed, all these to be worked out in the sewing classes.

A great deal of lettering is done, such as mottoes, the making of posters, place cards and Christmas cards. These are decorated with appropriate designs.

Household Management

This course includes the theory and practice of every process connected with housework. Planning and construction of houses are studied, much attention being given to the kitchen and kitchen equipment. This enables a girl to plan her own home successfully, keeping in mind the saving of money, time and energy.

A part of the time during the second year is given to the planning and keeping the personal budget and after that, the family budget.

Household Science

This course consists of the study of lighting, heating, water supply, plumbing and the disposal of sewage as related to the home.

Home Nursing and Hygiene

The aim of this course is to teach the girl how to keep her body in the most healthful condition and to give some knowledge of the care and comfort of the sick in the home.

The room in which this work is given is equipped like a home bedroom.

Making the bed with the patient in it, bathing and moving the patient are some of the points emphasized, a large hospital doll being used for the practice work.

Much attention is given to the care of children, bathing, dressing, etc. For this practice there is a one year old size hospital doll.

Some work in bandaging and first aid is also included in this course.

This year a four year course has been established in the school. This course is open to all girls who are grammar school graduates and it prepares them to enter Framingham Normal School for the special Household Arts Course which was established there last September. After completing three years at Framingham, the girls are fitted to teach in Household Arts Schools. Any girl who has had two years at the High School may, with two years at the Vocational School, be fitted to enter this course at Framingham. Two girls who graduated from the two years' course last year have returned to take the other two years' work.

The second and third year girls are continuing the work as teachers of cooking classes for children at the City Mission. This is excellent experience for them and at the same time they are rendering a valuable community service.

English

The course in English includes a careful study on many standard English works—both prose and poetry—and a brief survey of some of the best modern writings. Oral English is emphasized, much time being spent on discussion of the literature studied by the girls.

Only such written work as is of practical value is given, such as the writing of business and friendly letters. Here opportunity for thorough drill in grammar, punctuation and sentence construction is offered.

The course also includes a study of the drama, from the Shakespearian to the modern play as well as practice in staging, costuming and producing plays.

The aim of the course is the cultivation of better speech and the appreciation of the best in English literature.

Civics

The first year classes in civics take up the study of city conditions in general and New Bedford in particular. The history of the city is studied and later the girls are led to think of the modern problems which present themselves. Discussion is encouraged and suggestions for betterment are brought forward and talked over.

The second year girls continue along these lines, noting the

growth of the cities and discussing the causes. Particularly do they notice that through co-operation and community spirit many changes for the good have been brought about—in fact that the helpful spirit is necessary in everything, successful school life as well.

The third and fourth year girls turn their attention more particularly to the various stages and growth of our government—town, state and national.

Home Project Work

The Home Project Work which is carried on in connection with this department has added both interest and enthusiasm to the carrying over into the home the principles and processes taught at school.

Each girl remains at home one half day each week, at which time the teacher having charge of this work may visit the home and supervise the cutting of a garment, the preparation of a meal or general housework, whichever one has been chosen for the girl's special duty. All the projects are assigned after conference with the girl's mother as to what the needs of the home are for that particular day.

Many of our girls do work at home other than that assigned by the teacher. The record of this is kept by the pupil, signed by the mother and sent to the school, where credit is given the girl for the work.

The aim of the Home Project Work is to develop initiative in her own home problems on the part of the pupil and to encourage co-operation on the part of the parent.

Physical Training

The object of the Physical Training Department is to teach control of bodily movements, improve the functional activity of the body, and counteract and correct tendencies to abnormal development, especially those resulting from daily habits, by means of a proper selection of exercises, dances and games.

The principles of the Swedish System are closely followed in the exercises, each exercise having a definite aim and effect. A part of each lesson is devoted to these exercises. Attention is given cases needing special corrective exercises for extreme postural defects.

Military marching and tactics are included in each lesson, developing the power of concentration and instant response to

command. Folk dances are given to develop grace and ease. Games developing fairness of play, good judgment and team work are also included in the course.

Good health and strength are essential to happiness. With this in view, the course in physical training is planned.

PRACTICAL ARTS DEPARTMENT

The enrollment in this department this year is the largest in the history of the school. In fact this department is the largest of its kind in the State of Massachusetts. Last year there were sixty-five classes with an enrollment of over 1000 women. This year the number of classes increased to ninety-one and the enrollment to 1800. The demand for this training was so great that four new centers were opened. One of these centers was at the Sassaquin Sanitorium, where a class in sewing was conducted. This work was much appreciated by the women, since it gave them a most profitable way in which to spend their time while they were convalescing.

The cost of instruction is free to the pupils, the expense being met jointly by the city and the State.

The courses offered in this department are sewing, millinery, cooking and home nursing and are open to all women in New Bedford or surrounding towns who are sixteen years old or over.

In the sewing classes the pupils furnish their own materials for their garments.

In the cooking classes the food prepared is served to the pupils and they pay for the cost of materials used.

There are both afternoon and evening classes, each class meeting two afternoons or two evenings each week for a period of twenty weeks. Each class is in session four hours a week, making a total of eighty hours instruction for a year's course.

In the first year course in sewing much attention is given to instruction in the use of a sewing machine and attachments. Each class room is equipped with three or more sewing machines.

The garments made in this year are a cotton skirt, a wool skirt, a plain cotton waist and a fancy cotton waist. A thorough study of the use and alteration of commercial patterns is taken up this year. There is an electric iron and an ironing board in each sewing room so that the pupils may be taught to sponge and press materials properly.

This gives the women a foundation for the work of the second and third year in sewing which consists of making wool, voile and silk dresses.

The work in millinery consist of a study of the becomingness of hats, the proper fitting of the head, the renovation of

old hats and trimmings, and the making of new frames and hats.

The cooking course consists of canning, breadmaking, vegetable cookery, and the planning and preparation of balanced meals. In connection with the meals, attention is given to table setting and service. Later on, instruction is given in the use of the fireless cooker, preparing the entire meal, using the fireless.

Typewritten copies of all the recipes used are given to each pupil. In this way a valuable collection of recipes is obtained.

This department has co-operated with the Y. W. C. A. again this year in conducting classes for foreign women. Four sewing classes for Polish women and one class in millinery and one in cooking for Portuguese women were conducted.

The Home Nursing work has proved to be of great value to the people of the community. Many people are taking advantage of this opportunity to learn how to care for the sick at home.

The course consists of twenty lessons, each lesson given in a two hour period. The pupils are taught what to do in emergencies, the making and application of poultices and compresses, diet in different diseases, all pertaining to the care and comfort of the sick at home. The care of children is also taken up. The room in which this work is given is equipped as nearly as possible like a home bedroom, having a bed, dresser, table, chairs and a screen. There is an adult size hospital doll so that the pupils may have the experience of making the bed with a patient in it, also some practice in moving a patient. There is also a one year old size doll for use in teaching the care of children. All of this work is in charge of a trained nurse.

A certificate is granted to pupils who complete three years' work satisfactorily in either sewing, cooking or millinery.

A record of the work done by each pupil is kept in this office and all this data is sent to the State Department of Education in Boston at the close of evening school term. This entails a large amount of clerical work, but it is the only way we can find out definitely the far reaching results of the evening practical arts work for women.

The exhibition of all work done in these classes was held at the Armory this year and was attended by thousands of people. One interesting feature was the parade of living models by girls and women who had made their dresses and hats. There was music during the evening furnished by the Vocational School orchestra.

COST OF SCHOOL FROM DEC. 1, 1919, TO DEC. 1, 1920

Equipment items:	
Rent,	\$3,400.00
Equipment and tools,	1,232.90
Maintenance items:	
Salaries and labor,	54,467.33

ANNUAL REPORT

OF THE

SUPERINTENDENT OF STREETS

OF THE

CITY OF NEW BEDFORD, MASS.

TO THE

CITY COUNCIL

FOR THE YEAR ENDING NOV. 30, 1920

NEW BEDFORD
THE A. E. COFFIN PRESS—COFFIN BUILDING
1921

Report of the Superintendent

To the Honorable Mayor and City Council.

New Bedford, Mass.,

Gentlemen:

The Annual Report of the work of the Street Department including sewers, bridges, forestry and garbage collection for the year ending November 30, 1920 is herewith submitted.

Respectfully,

C. F. LAWTON,

Superintendent.

NEW BEDFORD—1920

GENERAL STATISTICS

Population, assessors estimate 130,331.

Valuation, assessors estimate \$182,889,883.

Area, about 19.4 sq. miles.

Accepted streets, 197.13 miles.

Bridges—New Bedford and Fairhaven bridge, 70 feet wide and $\frac{9}{10}$ mile long; $\frac{4}{5}$ maintained by New Bedford. Coggeshall Street bridge, $\frac{3}{4}$ maintained by New Bedford. Slocum Street bridge, $\frac{1}{2}$ maintained by New Bedford.

12.683 miles granite block pavement, area, 202,624.9 sq. yds.

0.82 miles wood block pavement, area, 21,511 sq. yds.

0.02 miles asphalt block pavement, area, 273 sq. yds.

0.34 miles brick pavement, area, 12,128 sq. yds.

(New Bedford and Fairhaven Bridge.)

26.044 miles bitulithic and similar pavement,
area, 448,377.1 sq. yds.

25.448 miles bituminous macadam pavement,
area, 327,807.4 sq. yds.

74.953 miles water-bound macadam pavement,
area, 929,609.4 sq. yds.

1.406 miles cobble pavement, area, 17,343.8 sq. yds.
concrete paving in alleys and track spaces,
area, 14,520 sq. yds.

154.03 miles stone curbing.

40.662 miles granolithic walks, area, 175,276.4 sq. yds.

32.062 miles tar concrete walks, area, 137,754.6 sq. yds.

29.349 miles flag walks, area, 85,801 sq. yds.

SEWERS

149.25 miles Sewers.

Cost of sewer system to date (including intercepting sewer)
\$3,953,141.72

1808 catch basins.

865 eye-holes and inlets.

CITY OF NEW BEDFORD, MASS.,
OFFICE OF THE NEW BEDFORD WATER BOARD,
DECEMBER 30, 1920.

To the City Council of the City of New Bedford:

GENTLEMEN:—In accordance with the provisions of the Water Ordinance, the New Bedford Water Board respectfully submits its fifty-first annual report. Accompanying it, will be found the reports of the Water Registrar, and the Superintendent.

The following abstract, drawn from the report of the Water Registrar, shows the financial operations of the past year in condensed form:

RECEIPTS.

Balance Dec. 1, 1919.....	\$103,919.73
Receipts from water rates.....	\$400,846.11
Receipts from other sources.....	45,411.39
	446,260.50
	\$550,180.23

PAYMENTS.

Management and repairs, less interest, bonds paid and sinking funds	\$190,139.41	
Extension of works.....	239,154.70	
Interest paid.....	70,160.00	
Bonds paid.....	19,000.00	
Sinking funds.....	27,900.00	600,354.11
		\$50,173.88
Balance deficit Dec. 1, 1920.....		
The actual outlay for the construction of these works, exclusive of debt, interest, and management and repairs account, Dec. 1, 1919, was		\$4,495,704.18
Increase in 1919:		
Alterations, assistant chief engineer's house.....	\$3,693.20	
Increase in 1920:		
Alterations, assistant chief engineer's house	1,827.99	
Lands around ponds.....	15,752.25	
Garage addition, workshop...	1,222.43	
Workshop and pipe-yard.....	5,283.86	
Distribution	228,783.66	256,563.39
		\$4,752,267.57
Actual outlay to date.....		

On June 10th, Mr. Herbert E. Cushman was re-elected a member of this Board for the term of three years by your Honorable Body.

Building activities have continued to increase, and fifty-nine petitions for the extensions of water mains have been received, fifty-three of these have been granted, and 5.52198 miles of main pipe added to the system. This is an increase of 2.6434 miles over last years work. A detailed statement of mains laid may be found in the Superintendent's report. Two hundred ninety-seven additional services have been laid.

In the early part of the season, much difficulty in obtaining labor for trench work was encountered. On April 23d, a contract was made for a one-half yard Bucyrus steam shovel equipped with a long dipper handle for this work. The shovel was received on October 11th, and its use since then has resulted in a saving in the cost of excavation for pipe laying, and at the same time solving the problem of the shortage of labor.

During the year three bills were presented to the State Legislature, which in the opinion of this Board, might, if passed, interfere with the preservation of the purity of the water of the Quittacas Ponds which are used for the supply to this city. A protest was made by this Board through the Senator and Representatives from this district, and to the Governor of the Commonwealth. The bills were not passed.

For the protection of the purity of the water supply in the Quittacas Ponds, the following properties have been purchased under the authority of your Honorable Body:—

Town of	Bought of	Area	Cost
Rochester, Mass.	Sniptuit Cranberry Co.	81 acres	\$13,000.00*
Lakeville, Mass.	Fanny H. Turner	3.2 acres	350.00
Lakeville, Mass.	Alice M. Morton	7.14 acres	2,400.00*

* Including buildings.

The gravel bank in Freetown has been enlarged by the purchase of 4.22 acres of land adjoining it at a cost of \$527.50.

In June the Fuel Committee of your Honorable Body

advertised for bids for supplying 2,000 gross tons of Pocahontas or George's Creek coal for the pumping station. No bids were received and the coal was bought by your committee, of David Duff & Son, at an average price of \$14.50 per gross ton. This is an excess of \$5.28 per ton over that of 1919.

The following are the principal contracts which have been executed this year:

Date 1919	Contractor	Supply	Consideration
Dec. 1	Gulf Refining Co.	Gasoline	\$245.00
Dec. 2	S. C. Lowe Supply Co.	Exchanging Touring Car	\$2,100.00
Dec. 31	J. C. Sherman	$\frac{3}{4}$ Ton Truck	\$2,912.30

Oct.	28	Darling Valve & Mfg. Co.	Tapping Valves	2"—\$13.20 each 4"—\$23.10 each 6"—\$37.40 each 8"—\$55.00 each
Nov.	15	The Texas Co.	Gasoline	32c per gal.

The agreement for furnishing the Town of Dartmouth with water, made under authority of Chapter 188 of Legislative Acts of 1914, which expired on July 1st, was renewed for a period of five years.

The largest single extension of the main pipe system during the year has been the laying of 5,852 feet of 36-inch main in Bowditch street, from Acushnet avenue to north side of Tarkiln Hill road. The cost was \$134,738.31. Work is still in progress, extending the main south to connect with the 36-inch main in Park avenue at Bowditch street. Thus far the expenses of this work has been paid from the surplus funds accumulated during the war, a period of lesser activity in building and pipe extensions. This work and other pipe extensions completely exhausted the balance of \$103,919.72, which we had at the end of last year, and leaves us with a deficit of \$50,000, which should be met by the receipts for water during the coming year.

When the above mentioned work is completed, we will have a continuous line of 36-inch main from the New Bedford-Freetown line through Acushnet avenue and Bowditch street to Park avenue; thence through the loop around the city to High Hill Reservoir.

The 48-inch force main, through which water is pumped from Little Quittacas Pond to High Hill Reservoir, has been in service for twenty-two years. Although it is still apparently in good condition, its age admonishes us that a duplication should soon be secured. The amount of water which can be stored in that reservoir is only sufficient for about six days' supply for the city at the present rate of consumption, and a break in this force main would prevent delivering water to the reservoir until repairs could be made.

It is, therefore, advisable that during the present year a 48-inch main be laid from the Pumping Station through the force main strip in Middleboro road and Acushnet Ave. to connect with the 36-inch main already laid from that point to the main distribution system of the city. Later on this main should be continued from the junction of the force main strip on the Middleboro road westerly to High Hill Reservoir. This will provide a means of pumping direct to the city in case of accident to the old force main, and the later extension will give us a second force main from the pumping station to the reservoir.

The estimated cost of the work is recommended for the coming year is \$700,000. As there are no funds available for this work, it will be necessary to petition the Legislature for authority to issue bonds for it. We recommend that this be done during the present session, so that the work can be carried out during next season.

It is with feeling of deep sorrow that we record the death of Damon W. Rice, a valued employee of this department. He was appointed inspector on March 29, 1907, and by faithful service advanced to clerk in the superintendent's office July 18, 1910, where he served faithfully until his death, which occurred January 2, 1920.

We also note with regret the death in New York City, of George S. Rice, who was one of the designing and constructing engineers employed during the construction of the Quittacas supply. This work together with many other engineering projects stand as a monument in his chosen line of work.

Respectfully submitted,

CHAS. S. ASHLEY,
FRANK A. McNULTY,
H. E. CUSHMAN,
WILLIAM H. PITMAN,
FREDERIC H. TABER,

REPORT OF WATER REGISTRAR.

CITY OF NEW BEDFORD,
WATER REGISTRAR'S OFFICE,
DECEMBER 1ST, 1920.

To the New Bedford Water Board:

GENTLEMEN:—I herewith present to you a detailed statement of the receipts and expenditures of the Water Works Department for the year ending at this date.

REPORT OF SUPERINTENDENT.

NEW BEDFORD WATER WORKS,
SUPERINTENDENT'S OFFICE,
DECEMBER 1, 1920.

To the New Bedford Water Board:

GENTLEMEN:—The fifty-first annual report of the Superintendent, for the year ending Nov. 30, 1920, is herewith respectfully submitted.

Through the courtesy of Mr. X. H. Goodnough, Chief Engineer of the State Department of Health, the results of chemical examinations of samples of water taken at various locations is herewith given. These show that the quality of the water remains excellent.

Copies of the rainfall records at the Little Quittacas Pumping Station and at the Long Plain storing reservoir appear upon the following pages.

WATER SHED.

This has been another year of heavy rainfall, the gauge at Little Quittacas Pumping Station recording a total of 46.95 inches for the year. As a result of the severely cold winter, the heavy snows accumulated on the water shed during the winter. When the spring thaw came, it was accompanied by heavy rains. This raised the water in Great Quittacas Pond to elevation 52.45, which is its highest level since the beginning of our records in 1894. With this ample supply in storage, the ponds remained well filled, even during the dry months of July, August, and September. The surface of Great Quittacas has varied from elevation 47.37 on Nov. 1, 1920, to elevation 52.45 on June 21, 1920, and the present height is 49.50 above mean high water in New Bedford harbor. Little Quittacas has varied from elevation 47.25 on Sept. 12, 1920, to elevation 51.00 on March 26, 1920. Present height is elevation 48.08.

For the preservation of the purity of the water in the Quittacas Ponds, several additional properties have been purchased. There is still considerable area within the water shed of these ponds which it is desirable to obtain, particularly along Black Brook, which is a large feeder to Great Quittacas Pond.

The dwelling house which was on the property purchased from C. Lillian Lewis, and known as the Perkins house, has been sold at auction and removed by the purchaser.

The pine wood on the "Turner Lot", having reached a stage where it should be cut for the good of the forest, has been partially cut and sold. The remainder of the old growth will be removed and sold during the coming year. The smaller trees are left in place. There is a good undergrowth of young pine on this property which will soon replace the wood which has been cut.

Pines have been planted on the "Jewett Place" to replace the hard wood, which has been cut. It is intended to eventually cut the hard wood, which invites the gypsy moth and other pests, from the entire water shed, replacing them with pine and hemlock which are much more satisfactory for its protection.

QUITTACAS PUMPING STATION.

The steam pumps at this station have continued to operate satisfactorily with only minor repairs necessary. On June 3d, the electrically driven centrifugal pump was put out of commission by lightning which destroyed the transformers. New transformers were ordered and placed in service on Sept. 30, 1920. Spare transformers were ordered and placed in stock by the New Bedford Gas & Edison Light Co., to prevent a recurrence of this interruption. An improved form of lightning arrester has been installed also, and it is hoped that no more trouble from this cause will be experienced. There have also been several breaks on the wires from the City to the Station which have resulted in interruptions to the service of this pump, but they were of short duration, because of the prompt repairs made by the New Bedford Gas & Edison Light Co.

The consumption is now reaching an amount in excess of the capacity of one steam pump and it frequently becomes necessary to use the electrically driven unit or the second steam pump, in order to keep the High Hill Reservoir filled. When the second steam pump is used it becomes necessary to fire the second boiler.

The expense of electric power is greater than that of steam, so in either case it makes the cost excessive when the pumpage is more than ten million gallons per day, which is the capacity of one steam pump. It will be advisable to consider the erection of an additional steam pumping unit of fifteen or twenty million gallons capacity before many years.

Another matter which should have consideration before long is the intake of the pumps and the screen chamber on the outer end of that intake. With the increased draft through the screen it becomes clogged more quickly than when the rate of pumping was slower. The revolving screen installed in 1908 has improved this situation somewhat, but further steps will need to be taken before long. By running a pipe line of ample size from the present pump well to Great Quittacas pond, and locating a screen chamber there, we would solve this problem and at the same time solve the problem of anchor ice, which is a source of frequent trouble when the water in the ponds is near the freezing point, but the

surface not frozen over. This could also be used for a force main, in case it should later be deemed advisable to locate a pumping station on Great Quittacas Pond.

Another method of increasing the supply to the pump well and avoiding anchor ice, would be by running a second intake from the pump well to a point near the westerly shore of Little Quittacas Pond. This, however, would necessarily be laid in the bottom of the pond and would make the supply to the City muddy while the work is in progress.

RAILROAD.

The railroad connecting the pumping station with the New York, New Haven & Hartford Railroad at Braley's has needed only minor repairs. It is used for transporting coal and other heavy supplies. The height of cars in which coal is received continues to increase and it became necessary to cut a larger opening in the arch over the door at the coal shed, reinforcing this arch by a heavy I beam.

FORCE MAIN.

Only minor repairs have been necessary on the 48-inch steel force main. The estimated life of the main when installed was twenty years. It has now been in service twenty-two years and while it is still apparently in good condition, we are reminded that the time is approaching when provision should be made for its renewal. I would respectfully call your attention to a recommendation, later in this report, for a duplication of that part of the main from the pumping station to the Middleboro Road during the coming year. In the near future this second force main should be extended to High Hill Reservoir.

An order has been placed with the Payne Dean Limited for an electrical control device which will be installed on the 48-inch gate in the steel force main at Beaver Dam, thus making it possible to operate this gate electrically by a switch located at the Quittacas Pumping Station. The apparatus has been shipped from the factory and should be in service early in the coming year.

HIGH HILL RESERVOIR.

This reservoir has remained in good condition and no repairs of consequence have been necessary. The banks and surrounding grounds have been kept in good condition, and the usual crop of hay has been cut from them. I would recommend that the fence around this reservoir be painted during the coming year.

OLD SYSTEM.

The wood on the Ansel White property near the Mill Road has been sold on the stump, and is now being cut. The hard wood will be removed and allow the growth of the young pine which have already a good start on this ground.

The wood on the Whelden's Mill property has also been sold and is now being cut. This wood has reached its maturity and would soon die if left standing.

The unusually large accumulation of snow through the winter followed by exceptionally heavy spring rains resulted in washing away sections of the earth embankment over the old conduit in two places, because the sluiceway underneath was not sufficiently large to carry the water of the heavily swollen streams. One of these was at Morse's Brook and the other at Whelden Brook. At each of these places the sluiceway has been cleaned and enlarged, and the embankment replaced.

The receiving reservoir, Purchase Street Pumping Station and Mt. Pleasant Distributing Reservoir remain as last reported, and the old system is in readiness for instant use, should occasion require. In fact, the water in Mt. Pleasant Distributing Reservoir automatically flows into the distributing system through check valves, whenever the pressure on the system drops below that of High Hill Reservoir.

DISTRIBUTING SYSTEM.

On Dec. 27, 1919, a serious leak occurred in the 12-inch main in Grinnell Street just west of County Street. A piece of iron about 3 ft. long and about one third of the circumference of the pipe blew out, causing a great

loss of water and some flooding of cellars in the vicinity; also considerable damage to the street surface in the square. This pipe passed through an old sand catcher, which had been filled up and may have been damaged when the filling was done, although no evidence of damage appeared at the time the filling was done.

On Nov. 13, 1920, another serious leak occurred on the 16-inch main in State Street, just north of Pope.

This also resulted in some flooding and damage to street surface.

The following table shows the total number of leaks and cost of repairing same:

There have been twenty-one leaks upon the mains the past year, as herewith shown:

DATE	SIZE	LOCATION	CAUSE	COST
1919				
Dec. 20	36 in.	Acushnet av. 2706 ft. N. of Nye lane	Pipe leaking	\$22.06
Dec. 27	16 in.	Tarkiln Hill rd. 15 ft. W. of Acushnet av.	Wooden joint started	7.30
Dec. 27	12 in.	Grinnell near W. line County	Pipe burst	305.10
1920				
Jan. 3	6 in.	Blackmer W. of Second	Joint started	15.03
Jan. 3	2 in.	Smith St. ct. N. of Smith	Pipe burst	39.65
Jan. 3	30 in.	Water 30 ft. N. of Maxfield	Joint started	22.29
Mar. 20	6 in.	Sycamore 40 ft. E. of County	Joint started	10.70
Apr. 10	30 in.	Bowditch 32 ft. S. of Weld	Joint started	43.76
June 12	8 in.	Hawthorn W. of Gould	Joint started	9.59
July 10	30 in.	Bowditch 32 ½ ft. S. of Weld	Joint started	28.76
July 21	30 in.	Bowditch 32 ft. S. of Weld	Joint started	30.50
July 31	10 in.	Hillman at Liberty	Joint started	16.67
Aug. 28	8 in.	Front S. of Logan	Joint started	14.27
Sept. 4	6 in.	Nelson W. of County	Joint started	16.98
Sept. 4	30 in.	First at Potomska	Joint started	34.71
Sept. 22	6 in.	Mill W. line Summer	Joint started	8.99
Sept. 23	30 in.	Bowditch 40 ft. S. of Weld	Joint started	52.87
Nov. 13	36 in.	Assonet rd. near Turner's Pond	Wooden joint started	33.91
Nov. 13	20 in.	State 40 ft. N. of Pope	Pipe split	334.66
Nov. 19	6 in.	Union 20 ft. E. of Front	Pipe burst	42.78
Nov. 21	4 in.	Bethel 24 ft. S. of Elm	Pipe burst	33.49

Photograph of Stand-pipe corner Mt. Pleasant and Peckham
Streets taken at time of completion.

View looking east from top of Stand-pipe at time of completion.

View looking east from Stand-pipe taken just before removing.

The stand pipe at the southeast corner of Peckham and Mt. Pleasant Street, was disconnected from the piping system many years ago. This spring a bad bulge appeared on the east side of it about 20 ft. above the ground; probably caused by the action of frost. As there appeared to be danger of the brick falling from the bulged section, it was deemed best to remove the whole structure. A contract for doing this was accordingly made with Arthur A. Fouquette on May 11, 1920. There was some value in the stone, brick and iron removed, and these were retained by this department. The lot has been cleared off and left in an orderly condition. A corner of this lot has been taken by the Street Department to eliminate a sharp angle at the intersection of these streets, no compensation being allowed this department for land taken.

The stand pipe was built in 1873, and since then has been a land mark in that section of the city. Photographs taken from the top of the stand pipe, looking easterly, at the time it was built and at the present time, showing the growth of this section of the city, from pastures to a thickly populated district, are interesting.

The structure was found to be exceptionally well built, and speaks well for the quality of the work which was done on the original system.

The most important extension of the distributing system this year was the laying of 5,852 feet of 36-inch main in Bowditch Street, from its junction with Acushnet Avenue, southerly to the north side of Tarkiln Hill Road. The cost of this work to date is \$134,738.31. Work is still in progress on this main and it is expected that before the end of the season, it will be completed as far south as Park Avenue, where it connects with the 36-inch main from High Hill Reservoir to the loop around the city. This makes the 36-inch line complete from the loop around the city, through Bowditch Street and Acushnet Avenue to the New Bedford-Freetown line.

It was expected that the balance from last year's account, together with the usual receipts for water would provide sufficient funds to pay for this work. But the demands for other main pipe extensions, on account of building operations in the outlying districts, together

with the increased cost of materials and labor have completely exhausted the funds and leave a deficit of approximately \$50,000.

It is advised that during the coming year a 48-inch main be laid from the Pumping Station through the force main strip, Middleboro Road and Acushnet Avenue to connect with the 36-inch main already laid from that point to the main distribution system of the city. To do this will require 18,553 ft. of pipe and the estimated cost of the work is \$700,000.

In order to do this work, it will be necessary to issue bonds to cover the cost of the same. It is recommended that proper steps be taken to obtain from the State Legislature, at the coming session, the authority for so doing.

The steam shovel which was ordered April 23, 1920, arrived on October 9, 1920, and its use has resulted in a saving of cost and speeding up of the work on main pipe extensions.

It has always been the custom of this department since the beginning of the works, to use lead for making joints in cast iron pipe. During the past fifteen years various less expensive substitutes for lead for this purpose have been placed on the market and widely advertised in the Water Works field. The oldest of these is known as "Leadite." Some years ago a few joints were made here with two of these compounds, viz; Leadite and Lead Hydrotite, and both appear to be giving good results here. The use of either of these substitutes result in considerable saving over the cost of lead joints.

Some cities and water companies have been using them for several years with satisfactory results and considerable saving of labor, as well as in the cost of materials.

Early in the season, extensive experiments were made to determine the relative value of these two compounds. As a result, "Leadite" was adopted, and has been used for the greater part of the work laid this year. Its use has resulted in a saving of from 70 to 80 per cent. in the cost of material besides a considerable saving in the cost of labor, as the leadite does not need

to be caulked after it is poured into the joint, as is necessary with lead.

Additional saving in the cost of joints has been effected by the use of braided jute yarn in the place of ordinary loose jute for the backing of the joint.

A three-quarter ton Atlas truck has been purchased and equipped with a device for operating gates in the main pipe line by power directly from the engine of the truck. This truck is held in readiness to respond to emergency calls and results in great saving of time in shutting off burst main pipes and hydrants, thus reducing the loss of water from these leaks, and thereby also reducing the damage to surrounding property.

Thirty thousand seven hundred and thirty feet of main pipe have been laid during the year and fifteen hundred seventy-four feet of pipe previously laid have been removed. This is the greatest addition to the distributing system that has been made for some years.

Fifty feet of small sized distribution pipe (less than 4-inch) has been laid and three hundred five feet of pipe previously laid has been removed. The total length now in use is 6700 feet.

Seventy-five new stop gates have been set and three of those previously set have been removed. The total number now in use is 2470.

One new small sized gate has been removed. The total number now in use is 106.

Four new waste gates have been set. The total number now in use is 186.

Eighteen new stop gates for private supplies have been set. The total number now in use is 412.

Four new air taps have been set. The total number now in use is 194.

Ninety-three new hydrants have been set and twenty-four of those previously set have been removed. The total number now in use is 1591.

Two watering cart hydrants have been removed. The total now in use is 63.

Three hundred twenty-three service pipes have been laid and twenty-six of those previously laid have been removed. The total number now in use is 15,962.

One hundred seventy-five service taps have been

cleaned as follows: Rust, 135; trouble inside, 37; sediment, 3.

*Includes population supplied in towns of Dartmouth and Acushnet:
584 taps, 3,350 consumers.

The consumption per capita remains about the same as last year which makes the average daily consumption over 10,000,000 gallons. By referring to the table of comparison of consumption, it will be seen that this is the first time that we have exceeded the 10,000,000 gallons per day consumption.

The present system was designed for a maximum of 10,000,000 gallons daily average consumption, and it will be necessary before many years to take steps to increase the capacity of some parts of the system, attention to which is called earlier in this report and may be summarized as follows:

1. A second force main with direct connection to the City distribution system.
2. Greater intake capacity for the pumps.
3. Increased pumping capacity.

The consumption for the year may be divided as follows:

	Gallons	Daily Average	Per Capita	% of Total
Domestic consumption,	1,356,730,420	3,717,070	28	36
Manufacturing consumption,	1,958,134,854	5,364,753	41	52
Fires, testing, flushing, fountains, and all other purposes,	409,614,930	1,122,232	9	12
Totals,	3,724,480,204	10,204,055	78	100

Respectfully submitted,

STEPHEN H. TAYLOR,
Asst. Supt.

TABLE A.
STATEMENT OF WORK DONE BY LEAVITT ENGINE A FOR YEAR ENDING DEC. 1, 1920.

Diameter Steam Cylinders, 16% and 36 1/4 in.
Diameter Pump Plungers, 13 7/10 and 19% in.
Stroke of Piston and Pump Plungers, 90 inches.

Average working steam pressure, 185 lbs.
Average static head, 166.20 ft.

MONTHS	Number of days of parts of days pumping		Total pumping time		Total number of strokes per month	Average per minute of strokes	Total fuel used for all purposes		Total number of gallons pumped per month, allowance being made for ship	Number of gallons pumped per pound of coal for total coal		Number of gallons raised 100 ft. per lb. coal for total coal		Average dynamic head against pump in feet: no allowance for friction in suction		Average duty in pounds raised one foot high per 100 lbs. of coal, calculated on total fuel used for all purposes. No deductions.

The duty is based on total fuel used for all purposes, engine during day and electric light engine at night.

This includes banking fires, starting, heating building, running shop No deduction for ashes, moisture in coal or anything else.

TABLE C.

STATEMENT OF WORK DONE BY ELECTRICALLY OPERATED DE LAVAL CENTRIFUGAL PUMP C FOR THE YEAR ENDING DEC. 1, 1920.

Number of revolutions per minute,	1760 to 1800
Capacity when pumping alone 24 hours,	6¼ million gallons
Capacity when pumping with one Leavitt Engine 24 hours,	6 million gallons
With Little Quittacas at elevation 50, static head,	166.32
Average dynamic head for year,	188.52

Months		Number of days or parts of days pumping	Total pumping time per month	Current used per month K. W. H.	Number of gallons pumped per month	Number of gallons pumped per K. W. H.
			H. M.			
December,	1919	8	123-30	27,900	30,820,000	1,104
January,	1920	6	81-00	18,600	19,870,000	1,068
February,	1920	5	50-00	11,600	12,190,000	1,051
March,	1920	12	165-30	37,400	42,255,000	1,129
April,	1920	9	119-05	27,000	30,848,000	1,142
May,	1920	5	61-30	14,200	16,147,000	1,137
September,	1920	1	9-30	2,200	2,294,000	1,137
October,	1920	13	183-20	41,300	45,556,000	1,103
November,	1920	9	150-15	35,300	39,668,000	1,123
Totals and averages		68	942-40	215,500	239,648,000	1,112

Number of K. W. H. required to raise one million gallons into reservoir, 899.23

$$\text{Duty} = \frac{239,648,000 \text{ gallons} \times 8.34 \times 100 \times 188.52 \text{ feet}}{215,500 \text{ K. W. H.}} = 174,843,711$$

million pounds raised one foot high per 100 K. W. H.

SUMMARY OF STATISTICS.

FOR THE YEAR ENDING 1920.

IN FORM RECOMMENDED BY THE NEW ENGLAND
WATER WORKS ASSOCIATION.

NEW BEDFORD WATER WORKS.

NEW BEDFORD,

BRISTOL COUNTY, MASS.

GENERAL STATISTICS.

Population by census of 1915, 109,568.

Date of construction, 1866 to 1869, inclusive. Further supply, 1895 to 1901, inclusive.

By whom owned, City of New Bedford.

Source of supply.—Water was first introduced on Nov. 26, 1869.

From that date until July 10, 1899, the supply was taken from a storing reservoir artificially formed by constructing a dam across the valley of the Acushnet River, seven miles north of the centre of the City. This supply was augmented by a connection made in 1886 with Little Quittacas Pond.

Since July 10, 1899, the whole supply has been taken from Great and Little Quittacas Ponds, eleven miles north of the centre of the city.

Mode of supply.—Previous to July 10, 1899, the water flowed by gravity from the Acushnet Storing Reservoir (grade 40' + high water New Bedford Harbor) through a brick conduit 3 feet wide, 4 feet high, 5 6-10 miles long to a receiving reservoir (capacity 3 million gallons; grade 30') located opposite the Purchase Street Pumping Station. Thence it was pumped into the Mt. Pleasant Distributing Reservoir (capacity 15 million gallons; grade 154') located 1,879 feet distant, from whence it flowed by gravity into the city's distributing system.

Since July 10, 1899, the entire supply has been pumped from Little Quittacas Pond (grade 52' through a 48-inch steel force main $8\frac{1}{4}$ miles long) to a distributing reservoir (capacity 67 million gallons; grade 216') located upon High Hill, in the town of Dartmouth. From this reservoir it flows into the city's distributing system by gravitation through two 36-inch cast iron pipes averaging 4 1-17 miles in length.

The first named system is not now in use, but is held in reserve to meet any emergency which might occur.

PUMPING STATISTICS.

1. Builders of Pumping Machinery.
Purchase Street Station:
 - a. McAlpine engine,
built by Quintard Iron Works, Cap. 5,000,000 gals. per 24 hrs.
 - b. High duty engine,
built by Henry R. Worthington, Cap. 5,000,000 gals. per 24 hrs.
- Little Quittacas Station:
 - a. b. Leavitt engines in duplicate,
built by Dickson Mfg. Co., Capacity of the two engines
20,000,000 gallons per 24 hrs.
 - c. DeLaval electrically operated centrifugal pump, directly connected with a General Electric squirrel cage, type I, Form K, 3 phase, 60 cycle, 550 volt, 250 H. P., induction A. C. motor, operating at about 1800 revolutions per minute, built by DeLaval Steam Turbine Co. Current purchased of New Bedford Gas and Edison Light Co. Capacity about 6,000,000 gals. delivered into High Hill Reservoir in 24 hours.

LITTLE QUITTACAS STATION—Engines A and B.

2. Description of fuel used.
 - a. Kind—bituminous.
 - b. Brand of coal—Pocahontas.
 - c. Price of coal per gross ton—delivered Little Quittacas Station, \$14.50.
 - d. Percentage of ash—7.
 - e. Wood, price per cord—none used.
3. Coal consumed for the year—4,201,650 lbs.
4. [Pounds of wood consumed] ÷ 3 = equivalent amount of coal—none used.
5. Total equivalent coal consumed for the year = (3) + (4), 4,201,650 lbs.
6. Total pumpage for the year—3,555,816,624 gallons, with allowance for slip.
7. Average static head against which pumps work—166.58 feet.
8. Average dynamic head against which pumps work—185.84 feet.
- 9a. Number of gallons pumped per pound of equivalent coal (5)—846.

9b. Number of gallons raised 100 feet per pound of equivalent coal (5)—1572.

10. Duty— $\frac{\text{gals. pumped (6)} \times 8.34 (\text{lbs.} \times 100 \times \text{dynamic head (8)})}{\text{Total fuel consumed (5)}} = 131,067,043$

LITTLE QUITTACAS STATION—Engine C.

11. Total pumping time for the year, 942 $\frac{2}{3}$ hours.
12. Total current used for the year, 215,500 K. W. H.
13. Total pumpage for the year, 239,648,000 gallons.
14. Number of gallons pumped per K. W. H., 1112.
15. Number of K. W. H. required to raise one million gallons into High Hill Reservoir, 899.23.
Cost per K. W. H. varies in accordance with amount of energy consumed.
16. Average cost per K. W. H., \$.024.
17. Cost per million gallons raised into High Hill Reservoir, (Engine C only) \$21.58.
Total cost of pumping, figured on pumping station expenses, viz.: \$71,571.22.
18. Per million gallons pumped—\$18.86.
19. Per million gallons raised one foot (dynamic)—10 cents.
Cost of pumping figured on total maintenance and interest on bonds, (see financial CC+DD) viz.: \$260,299.41
20. Per million gallons pumped—\$68.58.
21. Per million gallons raised one foot (dynamic)—37 $\frac{1}{10}$ cents.

figured on total maintenance + interest on
bonds\$68.58
- Includes population supplied in the Towns of Dartmouth
and Acushnet.

STATISTICS RELATING TO DISTRIBUTING SYSTEM.

MAINS.

1. Kind of pipe, cast iron and steel.
2. Sizes, from 4 in to 48 inch.
3. Extended 30,730 feet during the year.
4. Discontinued 1,574 feet during year.
5. Total now in use, 179 $\frac{54411}{100000}$ miles.
6. Cost of repairs per mile, \$21.34.
7. Number of leaks per mile, .116965.
8. Length of pipes less than 4 inches diam., 1 $\frac{2689}{100000}$ miles.
9. Number of hydrants added during year (public and private), 86.
10. Number of hydrants (public and private) now in use, 2036.
11. Number of stop gates added during the year, 72.
12. Number of stop gates now in use, 2470.
13. Number of stop gates smaller than 4 inch, 106.
14. Number of blow offs, 186.
15. Range of pressure on mains, 16 lbs. to 91 lbs.

SERVICES.

16. Kind of pipe: lead, wrought iron and cast iron.
17. Sizes, $\frac{1}{2}$ inch to 10 inch.
18. Extended 14,314.5 feet.
19. Discontinued 695 feet.
20. Total now in use, 116.48 miles.
21. Number of service taps added during year:
New Bedford297
Dartmouth172
Acushnet 57
- Total added526
22. Number now in use.
New Bedford15,962
Dartmouth 410
Acushnet 174
- Total in use16,546
23. Average length of service, 38.5 feet.
24. Average cost of service for the year.
a. Gross, \$37.89.
b. Net, \$16.86.
25. Number of meters added, 297.
26. Number now in use, New Bedford only, 15,316.
27. Percentage of services metered, 95 $\frac{1}{10}$.
28. Percentage of receipts from metered water ($B \div C$) 100.

ANNUAL REPORT OF THE WATER BOARD FOR THE YEAR 1920.

IN BOARD OF ALDERMEN,

January 3, 1921.

Received, ordered printed in City Documents and
sent down for concurrence.

W. H. B. REMINGTON,

City Clerk.

IN COMMON COUNCIL,

January 3, 1921.

Concurred.

HAROLD WINSLOW.

Clerk.

CITY ORDINANCES
AND AMENDMENTS
PASSED BY THE CITY COUNCIL
OF THE
CITY OF NEW BEDFORD

From Oct. 28, 1920 to June 6, 1921

NEW BEDFORD:
THE A. E. COFFIN PRESS — COFFIN BUILDING
1921

RANKING OF POLICEMEN**CITY OF NEW BEDFORD**

In the Year One Thousand Nine Hundred and Twenty-One.

AN ORDINANCE

Amending Section 404 of the Revised Ordinances of 1916, Relative to the Ranking of Police Officers.

Be it ordained by the City Council of the City of New Bedford as follows:

Section 1. Section 404 of the Revised Ordinances of 1916 is hereby amended by the insertion, after the word "named" in the fourth line thereof, of the words "except that the rank of lieutenants and inspectors shall be the same," so that said Section 404, as amended, shall read as follows, viz.: Section 404. The police department shall consist of a chief, deputy chief, captains, chief inspector, lieutenants, inspectors, clerk, and sergeants, who shall rank in the order named, except that the rank of lieutenants and inspectors shall be the same, and such other officers as may be designated by the mayor. The number of employes in the department shall be determined by the Mayor and Board of Aldermen. All appointees to the police force shall, before entering upon their duties, be sworn to the faithful discharge thereof.

Section 2. This ordinance shall take effect upon its passage.

Presented to and approved by the Mayor, Oct. 28, 1920.

AMENDMENT CALENDAR RULE

Change Affecting the Joint Rules of the City Council.

CITY OF NEW BEDFORD

In Board of Aldermen.

January 13, 1921.

Ordered, That Section 8 of the Joint Rules and Orders of the City Council, known as the "Calendar" Rule, be amended by the addition, at the end thereof, of the following paragraph, viz.: "This rule may be suspended in any specific instance by vote of a majority of either branch of the City Council."

In Board of Aldermen, January 13, 1921.

Adopted and sent down for concurrence.

In Common Council, January 13, 1921.

Concurred.

Presented to and approved by the Mayor, January 13, 1921.

A true copy, attest:

W. H. B. REMINGTON,

City Clerk.

PUBLIC VEHICLE STANDS**CITY OF NEW BEDFORD**

In the Year One Thousand Nine Hundred and Twenty-One.

AN ORDINANCE

Amending Section 634 of the Revised Ordinances of 1916, as amended, relating to Stands for Public Vehicles.

Be it ordained by the City Council of the City of New Bedford as follows:

Section 1. Section 634 of an ordinance approved by the Mayor May 8, 1919, and entitled "An Ordinance Repealing Section 630-654 inclusive of Revised Ordinances of 1916, and an Ordinance ordained by the City Council of the City of New Bedford March 27, 1919, and approved by the mayor March 28, 1919, and substituting a Revision of the Same," is hereby amended by striking out the words "City Clerk" contained therein and substituting therefor the words "Chief of Police," so that the said section, as amended, shall read as follows: Section 634. The stand or stands, and the stable, garage, office or other specified place at which persons may engage for hire vehicles licensed under Class A may be as specified by the applicant in the application for the license, unless the Chief of Police, in his discretion, deems that such stands or places will be objectionable to general traffic in the streets, or inconvenient for the public desiring the service.

Section 2. This Ordinance takes effect upon its passage.
In Board of Aldermen, March 9, 1921.

Passed to be ordained.

CHAS. S. ASHLEY,

Mayor.

In Common Council, March 10, 1921.

Passed to be ordained.

JOHN McCULLOUGH, 3d,

President.

Presented to and approved by the Mayor, March 11, 1921.

A true copy, Attest:

W. H. B. REMINGTON,

City Clerk.

GARAGE HEARING**CITY OF NEW BEDFORD**

City Clerk's Office,
April 14, 1921.

Attention is called to the following order, adopted by the Mayor and Aldermen at a meeting held April 13, 1921, viz.:

CITY OF NEW BEDFORD,

In Board of Aldermen.

April 13, 1921.

Ordered, That from and after this date a public hearing shall be given by the Board of Aldermen to all persons interested in any application for permission to construct or add to a commercial garage. For the purposes of this order a commercial garage is hereby described as follows: Any building used or intended to be used for the storage of more than four pleasure automobiles, and, any building used or intended to be used for the storage of more than two business automobiles. And be it further

Ordered, That the City Clerk is hereby authorized to set the dates for all such hearings. The City Clerk is hereby directed to give notice, in writing, of all such hearings to each owner of land adjacent to the lot on which a commercial garage is to be built. Such notice shall be mailed to said abutting land owners at least seven days previous to the date set for any hearing; and no hearing shall be given on any petition unless notices have been sent in accordance with this order.

Adopted.

In Board of Aldermen, adopted, April 13, 1921.

A true copy, Attest:

W. H. B. REMINGTON,
City Clerk.

RANK OF POLICEMEN**CITY OF NEW BEDFORD**

In the Year One Thousand Nine Hundred and Twenty-One.

AN ORDINANCE**Relative to the Ranking of Policemen.**

Be it ordained by the City Council of the City of New Bedford as follows:

Section 1. Section 404 of the Revised Ordinances of 1916, as amended by an ordinance passed by the City Council and approved by the Mayor Oct. 28, 1920, is hereby repealed, revoked and rescinded, and in its place a new section is hereby substituted, said section to read as follows:—Section 404. The police department shall consist of a Chief, Deputy Chief, Captains, Chief Inspector with the rank of Captain, Lieutenants, Inspectors with the rank of Lieutenant, Clerk with the rank of Lieutenant, Sergeants and Detective Sergeants with the rank of Sergeants, and such other officers as may be designated by the mayor. For promotion under Civil Service, the Chief Inspector shall be of equal rank and classed with Captains; Inspectors and Clerk, of equal rank, and classed with Lieutenants; and Detective Sergeants of equal rank, and classed with Sergeants.

Section 2. This ordinance shall take effect upon its passage.

In Board of Aldermen, May 26, 1921.

Passed to be ordained.

C. W. BARTLETT,

Acting Mayor.

In Common Council, May 26, 1921.

Passed to be ordained.

JOHN McCULLOUGH, 3d,

President.

Presented to and approved by the Mayor, June 6, 1921.

A true copy, Attest:

W. H. B. REMINGTON,

City Clerk.

SEWER ASSESSMENTS**CITY OF NEW BEDFORD**

In the Year One Thousand Nine Hundred and Twenty-One.

AN ORDINANCE**Amending an Ordinance Regulating Sewer Assessments.**

Be it ordained by the City Council of the City of New Bedford as follows:

Section 1. An ordinance entitled "An Ordinance Regulating Sewer Assessments," passed by the City Council May 8, 1919, and approved by the mayor May 9, 1919, is hereby amended by striking out, in the thirteenth line of section one of said ordinance the words "one and one-half," and substituting in place thereof the word "two" so that said ordinance, as amended, shall read as follows, viz.: "Seventy-five per cent. of the cost of a sewer or drain shall be assessed upon abutting land in proportion to street frontage of the land benefited, but in no case shall such assessment exceed two dollars per linear foot of frontage assessed. All assessments levied under the provisions of this section shall exempt the land assessed to a depth of fifty feet from further assessment on account of sewers laid in cross streets. Nothing herein contained shall be construed to change or affect the exempted area under any former method of assessment.

Section 2. This ordinance shall take effect upon its passage.

In Board of Aldermen, May 25, 1921.

Passed to be ordained.

C. W. BARTLETT,

Acting Mayor.

In Common Council, May 26, 1921.

Passed to be ordained.

JOHN McCULLOUGH, 3d,

President.

Presented to and approved by the Mayor, June 6, 1921.

A true copy, Attest:

W. H. B. REMINGTON,

City Clerk.
